Pre-existing Potential Violations:

Rule: 62-701.320(1)

Question Number: 2.40

Explanation: see 2.24

Corrective Action: 2.24

Rule: 62-701.500(8)(h), 62-701.500(2)(j), 62-701.500(8)(b)

Question Number: 2.24

Explanation: During the inspection DEP staff observed that wind had blown foam from the process tank at the leachate treatment plant onto the building and outside of the containment. Facility staff indicated that the dried solids would be swept up from the ground and placed into the landfill dumpster. The process for cleaning the sides of the building should be carefully evaluated to prevent contact water from running off into stormwater.

Corrective Action: Please provide the Department with a plan for the clean-up of the building outside containment and the management of liquids generated. Any liquids should be treated as leachate unless the County can provide assurance otherwise. Specific Condition 7.b.

Comments:

01/09/2009

In emails from the County on December 16, 2008 and December 19, 2008, facility staff indicated that the foam had been pressure washed, contained and placed into the leachate storage tank. In addition, the County indicated that a "skirt" had been installed around the top of the tank to prevent any future release of foam outside the containment area.
