# **FACILITY INFORMATION:**

Facility Name: CITRUS CENTRAL SLF

On-Site Inspection Start Date: 09/29/2009
On-Site Inspection End Date: 09/29/2009

**WACS No.:** 39859

Facility Street Address: 3MI E LECANTO, SR44

City: LECANTO

County Name: CITRUS

**Zip:** 34452

#### **INSPECTION PARTICIPANTS:**

(Include ALL Landfill and Department Personnel with Corresponding Titles)

Principal Inspector: Melissa Madden, Inspector

Other Participants: Casey Stephens; Carmen Bruno

#### **INSPECTION TYPE:**

Routine Operation Inspection for Landfill - Class I facility

Routine Operation Inspection for Landfill - Class I Closed - Long Term Care facility

Routine Operation Inspection for Other Facilities - Yard Trash Processing Facility

Routine Operation Inspection for Other Facilities - Waste Tire Collection Center facility

### ATTACHMENTS TO THE INSPECTION CHECK LIST:

This Cover Page to the Inspection Checklist may include any or all of the following attachments as appropriate.

**SECTION 1.0 - FILE REVIEW** 

SECTION 2.0 - LANDFILL OPERATION AND MAINTENANCE

SECTION 3.0 - LANDFILL LONG-TERM CARE

**SECTION 9.0 - WASTE TIRE FACILITIES** 

SECTION 10.0 - YARD TRASH PROCESSING FACILITIES

### **SECTION 1.0 - FILE REVIEW**

# Requirements:

The requirements listed in this section provide an opportunity for the Department's inspector to indicate the conditions found at the time of the inspection. A "Not Ok" response to a requirement indicates either a potential violation of the corresponding rule or an area of concern that requires more attention. Both potential violations and areas of concern are discussed further at the end of this inspection report.

Item No.	FILE REVIEW (Pre- or Post-Inspection, as appropriate.) Completed	Ok	Not Ok	Unk	N/A
1.1	For landfills, is the method and sequence of filling wastes according to plans? 62-701.500(2)(f)			~	
1.2	For landfills, are the following records being reported to the Department?(Check any that are Not OK.)  Waste reports (quarterly) 62-701.500(4)  Annual estimate of remaining life 62-701.500(13)(c)	~			
1.3	Is leachate sampled, tested and disposed as required? 62-701.500(8)(a) & 62-701.510(6)(c)	~			
1.4	Is gas monitoring being performed as required by the permit? 62-701.500(9) & 62-701.530(2)	~			
1.5	Are the results of the gas sampling reported to the Department quarterly? 62-701.530(2)	~			
1.6	Is water quality sampling and testing performed according to standard procedures and at the required frequencies? See 62-701.510(2) for landfills; 62-701.730(4)(b) & (10) for C&D debris sites; 62-713.400(3) for stationary soil treatment facilities.			~	
1.7	Do the results of the water quality testing suggest there may be adverse impacts to water quality from the operation of the solid waste facility? 62-701.510(3) & (4)			~	
1.8	For closed landfills and C&D disposal facilities with final elevations higher than 20 feet above grade, has a final survey report verifying the final elevations and contours of the facility been submitted to the Department? 62-701.610(3) & 62-701.730(9)(c)	~			
1.9	Is financial assurance adequate? See 62-701.630 for landfills; 62-710(7)(a) & (10)(a) for WPFs; 62-701.730(11)(a) for C&D debris facilities; 62-713.600(6)(a) for stationary soil treatment facilities; 62-711.500(3) for waste tire facilities. NOTE: The Solid Waste Financial Coordinator in Tallahassee can assist with this information.			~	
1.10	Are cost estimates current and adjusted every year? See 62-701.630(4) for landfills; 62-701.710(7)(b) & (10)(a) for WPFs; 62-701.730(11)(b) for C&D debris facilities; 62-713.600(6)(b) & (c) for stationary soil treatment facilities; 62-711.500(3) for waste tire facilities.	~			
1.11	For C&D debris disposal and disposal with recycling facilities, is an Annual Report submitted to the Department for the disposal operation by April 1st of each year? 62-701.730(12)				~
1.12	For C&D recycling facilities with no disposal, is an Annual Report for the recycling operation submitted to the Department by April 1st of each year? 62-701.710(9)(b)				~
1.13	For compost facilities, has the compost product been sampled and analyzed every 20,000 tons or every 3 months (whichever is sooner)? 62-709.530(1)				~
1.14	For compost facilities, has the annual report been submitted by June 1st? 62-709.530(3)				~

## **Pre-existing Area Of Concern:**

Area: Phase I Landfill

Rule: 62-701.400(9)(c), 62-701.500(10)

Question Number: 2.30

Explanation:

A dark stained leachate seep was observed flowing through an erosional feature near the center of Phase II and had ponded along the top of the N slope (against a berm of a temporary leachate line extension gate valve). The seep appeared to initiate at an intermediately covered and mulched area of the N slope of Phase IA. Some erosional evidence observed suggested that the seep may have traveled beyond the pipe berm, however, two smaller berms to slow down stormwater were observed at lower elevations and would have likely contained any run-off. No further active seepage was observed beyond the ponding at the top of the slope. Ponded leachate should be pumped off and the seep repaired with a low permeability cover material and the erosion re-graded.

During the inspection, Department staff observed erosion with exposed waste along the Phase I access road. Water was observed flowing along the erosion over the exposed waste (leachate) and to the west. Erosional evidence appeared to indicate that any water in this area would have been directed back east along the toe of slope and been contained by a berm to direct stormwater to the E. The continuity of the lower berm could not be confirmed due to heavy vegetation.

In Phase I, above the areas where the exposed waste was observed on the access road, tannic stormwater was observed flowing from mulch covered areas as small discreet lighter stained seeps. Operator indicated that the lighter

staining was likely from the mulch cover (on top on intermediate) rather than true leachate seeps. Exposed waste and active seeps should be adequately covered and then re-graded to prevent ponding and promote flow to the stormwater system.

Corrective Action:

Specific Condition C.6.a., C.12.b. Department staff received documentation that the areas identified in this area of concern were addressed and repaired as of October 2, 2009.

### **COMMENTS:**

#### 10/08/2009

Reminder: Final leachate assesment report, videotape, and inspection report and water quality monitoring plan evaluations due Feb 1, 2010.

#### 09/29/2009

Minor ponding observed in the YT area. The grinder contractor will be at the site on October 5 and the pad will be re-graded at that time.

#### 09/29/2009

Department staff observed bulbs in the Citizen Service Area in the open PVC tubes. Operator indicated that are boxed up inside the shed at the end of each day. Universal waste lamps should be managed in accordance with 40 CFR Part 273.13.

Department staff observed that the facility had purchased a bulb crusher for the HHW. This practice does not appear to be included in the facility's current HHW Operation Plan and may need to be included in future iterations of the report.

#### 09/29/2009

The cover on the lower terrace of the south slope of Phase I could not be effectively evaluated due to overgrowth of vegetation. Facility staff indicated that the slopes would be walked down as soon as they are dry enough and should be completed by Dec/Jan.

#### 09/29/2009

The E lift station at the 7 acre cell is hooked up to a generator due to power outage. This system has been in place for several months. Facility indicated reclosure should begin by December.

#### 09/29/2009

The facility has begun using the Posi-Shell alternate daily cover (ADC). An area near the toe of the active area appeared to have minor exposed waste. It could not be determined if the waste had been covered with the ADC, however the area was receiving soil intermediate cover at the time of the inspection. They are mixing latex paint and water as a manufacturer recommended additive to the ADC Posi-Shell at a water source near the HHW/leachate tanks.

#### 09/29/2009

The facility has received 6.5 inches of rain in September as of the 26th.

#### 09/29/2009

The 7 acre cell appeared very wet and vegetation was high. Facility plans to mow when the rainy season subsides.

# 09/29/2009

Leachate ponding observed at base of bermed working face. A pump was observed for pumping the leachate prior to placing waste in the area. The leachate was being pump across the top of Phase II into temporary leachate collection piping via a gate valve.
