MJY needs to respond to Dave Quenterson's letter of 1/30/01.

The only way relief can be issued in this case is through a variance. FTR would have to demonstrate "hardship" through expiring records. MJY will advise of this option in her response letter.

Per Fred Wicks, this is not insurance, so we do not have to shut facility down prior to expiration. FTR would not be in violation until expiration state. No action would be required until 90th day (call bond). Still 30 days to comply.

FTR needs to get new closure cost estimate in.
