Re: Trail Ridge Landfill Storm Event Erosion Notice

Dear Mr. Raulerson,

This letter is to inform you that Trail Ridge Landfill experienced erosions due to the past week's storm event. As of this writing, the site has received 6.05-inches of rainfall. Since the submittal of the previous letter the site has received 9.55-inches, of which 8.55-inches have fallen in August. Extended time and work is needed to repair the eroded areas.

This notice follows the letter dated July 6, 2010 which updated the status of the repairs from the June 6, 2010 storm events. The July 6, 2010 letter had a stated completion date of August 23, 2010. All previous erosions had been repaired, stormwater piping installation had begun and seeding and haying had been scheduled.

The following is offered as a plan to address the storm damage:

- Currently existing landfill personnel are actively addressing the erosion areas.
- Additional personnel and equipment, two additional bulldozers and an additional trackhoe, have been brought to the site to assist with the required work.
- Employee working hours have been extended to help facilitate a timely clean-up.
- Seeding and haying is scheduled to be placed on repaired areas to reduce the reoccurrence of the erosions.
- Additional stormwater controls (i.e. earthen berms, stormwater pipes, etc.) have been incorporated in the repair plan.
- It is anticipated that the required erosion work will be completed by September 6, 2010.

The above plans are obviously contingent on more favorable weather patterns and the absence of any unforeseen problems or concerns. We will promptly contact you if any issues arise that may alter the completion date set forth above.

We appreciate your considerations and please contact us with any further questions or comments at (904) 289-9100.

Sincerely,

Edward Schmalfeld II, P.E.
District Manager
