RE: Scale Fee

Due to the exploding costs of compliance and the recent enforcement of strict bonding requirements by the Department of Environmental Regulation (DER) for licensed "Waste Tire Processors" such as FTR, we find it necessary to revise our scale fee.

As initially difficult as any price increase is, it is absolutely imperative for all of us who operate in the tire industry to act responsibly and according to the regulations. Your obligation is a function of the compliance observed by each person to whom you consign your scrap tires. FLORIDA TIRE RECYCLING, INC. is a company fully licensed to accept your waste tire liability.

\$ 80.00 PER TON

This revised schedule will become effective JUNE 1, 1992. Thank you for your continued business and the support of our effort to provide you with long-term, legal scrap tire disposal.
