Hello Jim,

Per our conversation, we would like to come out to the above site on Monday and Tuesday, April 22nd and 23rd to collect a few more soil samples and replace previous monitoring wells MW-1, MW-7, MW-9, MW-15, and MW-17.

I attached a maps showing the proposed SBs and MWs. Since we've been to this site several times and since the site conditions have not changed, no pre-drill activities are warranted. Please let me know if this is not the case.

Please also let me know if you have any questions or concerns regarding our field schedule. We appreciate the opportunity to be of service.

Kindest Regards,

Michael Minard, PG
