Request for Information Letter

Dear Mr. Lewis:

A hazardous waste compliance inspection was conducted at your facility on June 26, 2007. This inspection was conducted under the authority of Section 403.091, Florida Statutes, and Chapter 403, Part IV, Florida Statutes. The inspection is designed to ascertain the compliance status of your facility with 40 CFR 260-268 and 279, adopted in Florida Administrative Code Chapters 62-730 and 62-710.

During the inspection, Safety-Kleen personnel were unsure how the drum washer was engineered. Please provide the Department with a schematic of how the drum washer was originally designed to operate and how it was actually constructed, including the location of back flow prevention devices, if any. Also, please provide a narrative explanation of the drum washing process and how Continued Use Solvent and solvent categorized as "hazardous waste" is also used in the drum washer process.

Thank you in advance for your cooperation and assistance. If you have any questions concerning this matter please email me at [Janine.Kraemer@floridadep.net](mailto:Janine.Kraemer@floridadep.net) or call me at (407) 893-3323. Your response to this request for information should be mailed to me at the address on the letterhead above.

Sincerely,

  
Janine Kraemer, CHMM  
Hazardous Waste Program
