Pensacola, FL 32503-5106

The Florida Department of Environmental Protection has reviewed your application for registration as a transporter or handler for universal waste lamps and devices destined for recycling. Based on the information received, the facility located at **195 E Fairfield Dr, Pensacola, FL 32503-2956** has been registered through **March 1, 2011** with the following status:

Facility ID # **FLR000136861**
Transporter of Universal Waste Lamps and Devices
Small Quantity Handler Facility for Universal Waste Lamps and Devices
(Less than 2,000kg of Lamps (8,000) and/or 100kg of Devices for 1 Year)

The registration form for the year **2011** will be sent to the contact person on your application.

Chapter 62-737, Florida Administrative Code (F.A.C.), (copy enclosed) specifies several other requirements including packaging, training and record keeping for transporters and handlers of and reverse distribution programs for universal waste lamps or devices destined for recycling. These requirements are simple, flexible and make good business and environmental sense (summarized on enclosed fact sheets).

This registration does not allow you to transport or handle universal waste lamps or devices which are destined for landfill or other disposal. The transportation or handling of universal waste lamps or devices destined for disposal is subject to our hazardous waste management regulations under Chapter 62-730, F.A.C.

If any of your facility's information on the Universal Waste Lamp and Device Transporter and Handler Registration Form changes, please notify me at Mail Stop 4555 at the address above. I can also be contacted at (850) 245-8759 or at Laurie.Tenace@dep.state.fl.us.

Sincerely,

Laurie Tenace

Plan of Operation for Pensacola Recycling.

January 5, 2010

Pensacola Recycling has a call list and this list has each month, 90 days, 6 months, one year and will call. This depends on how the account is set up. We call the customer or the customer will call us for a pick up. We schedule a day to go pick the up and we ask them how many bulbs they have, and are they loose or in boxes. Some of our company's we give 150 Count Fiber drum to put there 4 Ft. bulbs in for storage and other use them for the U- shaped bulbs for storage.

Every Job is different. Some customer don't know how many Bulbs they have on hand and they will tell us maybe 100 bulbs and when we get there they have about 1,000 or more and ballast. We had that happen several time.

Went we go to a job and fine a few bulbs broken we sweep the broken bulb up and put it into a DOT bucket. If there is a full box of 30 count bulbs broken, we tape all opening and we put the box into a 150 count Fiber drum for safety.

If customers call about a mercury spill we refer them to Southern Waste Services and let them handle it from there until they need us to come get the material already contained in a five gallon bucket or larger container.

In 1999 we had a customer call us and tell me that they had some manufacture Mercury containing article in two 55 Gal steel drum, The first thing I ask the customer was any of the article broken and they told me no, they we all intact. When I got to the Job, I open the first drum and found several articles that were broken. I closed the drum and resealed the drum. I call the customer and told him what I had found and told him we would have to ship it out hazard waste and he would

have to let the DEP for that month that his company generated Hazard waste.

I called Southern waste service to see if they had and Plastic bags and any 85 gal drums on hand, which they did and two bags of absorbent material.

When we got back to the job we weighed the 55 gallon drum and the 85 gallon drum and the 2 bags of absorbent material. Then we weighted the 55 gallon drums that contained the mercury articles. We took the fork lift and lifted the 55 gallon drum and slid the plastic bags on the drum and lined the 85 gallon drum with absorbent material and then put the 55 gallon drum into the 85 gallon for shipping. After the 55 gallon drum was in the 85 gallon drum we weighed both together to get an accurate weight for the BOL with Veolia Technical Solutions. Once everything was contained we then called our recycling facility we use out of Tallahassee and set up the date and time for them to come and pick up the mercury articles.
