Overall, the draft permit looks OK. I suggest the following:

Remove the sentences on the first page about this facility being new ("This is a new facility. The Permittee shall not use this facility until the Department has reviewed the 'as built' drawings and authorized use.") and rewrite it as a permit condition. This permit condition should also explicitly state that a substantial modification to the permit would be required x days (suggest 30 or 60) after the Department authorizes use of the permitted facility to incorporate the final "as built" drawings and details on how the permitted facility will operate. Recommend placing the new permit condition as either Specific Condition I.3 or I.18.
