Ringhaver  
Inspection Summary

Dear Mr. Spinuzza:

A routine hazardous waste compliance inspection was conducted at your facility on November 7, 2001. The inspection was conducted under the authority of Section 403.091, Florida Statutes, and Chapter 403, Part IV, Florida Statutes, and is designed to determine the compliance status of your facility with Title 40 Code of Federal Regulations Parts 260 through 268, as adopted in Florida Administrative Code (F.A.C.) Chapter 62-730.

Ringhaver generates hazardous wastes associated with automotive maintenance. The facility was last inspected on October 10, 1997 and was found to be in compliance.

Inside the facility, inspectors observed closed and labeled drums of used oil, used oil filters, and antifreeze. The used oil, used oil filters, and antifreeze wastes are serviced by Earthcare/IPC Magnum.

Additionally, inspectors observed four parts washers and a sandblast box, which is cleaned out every two years. Safety Klean services the parts washers. Rag laundering is contracted to Cintas.

Outside the facility, inspectors observed one 55-gallon black poly-drum labeled "NFG" with unknown contents located by the dumpster. Within 30 days receipt of this letter provide proof to the Department that a waste determination was conducted on the contents of the drum.

All records were reviewed. The Department requests copies of battery receipts within 30 days receipt of this letter.
