Kathy,

I have attached the pictures you requested of the drain in the NW corner of building. All run off will go directly into the sewer system as per request. Thanks again. David

Thanks so much for your quick response and you are still within your timeframes on returning to compliance so no reason to apologize. Glad I could give you some compliance assistance and feel free to ask for help anytime.

Kathy Winston,

Good afternoon, I have attached the corrected manifest that you asked for. The generator has signed we have initialed and the TSD (PSC) has acknowledge and everyone has been sent new copies. We have discussed this mistake with TSD PSC and everyone will make sure that the manifests are completely correct on any future pick ups. We want to thank you again for all your help and the additional information you sent to us. I want to let you know the people we have doing the drain work will finally be done tomorrow and I will email you pictures in the afternoon. I apologize for the delay. David

Subject: Today's inspection

First I want to apologize for misleading you this morning, as I should have been thinking in terms of you as the transporter when we were discussing the manifest. I am attaching a scanned copy of the original manifest with circles indicating where you need to make corrections. You can then inform your TSD of this discrepancy and have them acknowledge that on their letterhead and then issue a corrected manifest to the actual generator along with a brief note explaining the mistake. Please forward me copies of both PCP's acknowledgment and the corrected manifest that was sent to the generator. I am also attaching a draft inspection report that gives you checklists for both transporters and CESQGs, so you will be able to see what is expected of you. There was nowhere to indicate the issue concerning the concrete pad outside; therefore, that will be included in the final report you will receive which includes a narrative description of the inspection. Also, as promised, here are three websites that should be useful. The first concerns Universal Waste Pharmaceuticals, the second; what drugs are known to be hazardous waste, and finally a booklet concerning management and disposal of hazardous pharmaceuticals. These should help you impress your customers with all you know concerning these issues. If you have any questions, or if this email is unclear, call me at the contact information below. Look forward to working with you to help you return to compliance and understand the rules you are to meet.
