RECORD OF TELEPHONE CONVERSATION

Date: 06/01/2011	Time: 3:01pm	Facility: Lewis Environmental
Call In/Out	Out: Returning call	EPA ID #: FLR000048561
To: Jerry Stapp		Phone #: 904.703.7840
Subject: Used oil burned in off-road vehicles		

Jerry first called me on 5/5/11 to ask about the requirements or restrictions involved in mixing used oil that they transported from customers with diesel to form an off-road fuel. He provided me with a fax on 5/6/11 with information regarding this off-road use (see Oculus). I called Jerry back on 6/1/11 and told him that, per 40 CFR 279.12 any used oil burned as a fuel in off-road vehicles would be required to be on-spec used oil. I also said that there would need to be tests performed and kept on-file to prove that the used oil is on-spec. Jerry said that he understood and given that they market on-spec used oil anyway it would not be a problem to have the tests performed.
