Bureau of
Waste Management
Chief's Office

Dear Mr. Frey:

In response to your letter dated October 23, 1986 Nabors Trailers, Inc. has engaged Enviropact of Jacksonville, FL. to test our waste sand on October 28, 1986. I have been told by Chris Gibbon of Enviropact that the results of these tests may not be known until November 21, 1986. Until further notice from your office all sand has been stored in the sandblast building.

I am having a copy of the test results sent directly to Janet Grey in order that this matter might be reconciled as soon as possible.

Thanking you in advance for your cooperation in this matter.

Sincerely,

William B. Hinchman

William B. Hinchman,
Assistant Plant Manager
