11/03/2023

On site for the routine compliance inspection with Discovery Tank Testing. The facility has two 10,000 gallon, double wall underground storage tanks. Both tanks and both STP sumps have electronic monitoring with a Veeder-Root.

The two STP sumps are in good shape; they are dry and all entry boots are ok.

The spill buckets are double wall. The outside port (interstice) is accessible. The buckets are labeled ok.

The drop tubes are equipped with flapper valves for overfill protection.

The four dispensers are in good shape; hoses, entry boots and shear valves are ok.

All records were sent by Discovery Tank; Insurance, CFR, COI, placard, monthly release detection, breach of integrity test and yearly release detection tests. Physically the facility was in good shape.
