Subject: Used Oil shipments to Kingsland

Jeff – per our discussion, I see by the records that you shipped used oil by rail to the Synergy Recycling LLC facility in Kingsland GA on the dates below in 2015 and 2016. Can you please provide me with information on where and how the used oil specification determination is made for the shipments to Kingsland.

If it is made by Synergy Recycling of Central Florida, provide me with copies of the analyses related to these oil shipments.

Page 2 of Attachment IV of your permit application, the Analysis Plan, discusses sampling and recordkeeping procedures. You should have a record of the batch number and sample date that can be cross referenced to the used oil delivery record(s) for the batch – see 40 CFR 279.74(b)
