Tallahassee, FL 32301

RE: Topographic Map Surface Flow Information for
Part B Application of International Solvent
Recovery, Inc.

Dear Mr. Diltz:

It has been brought to our attention that our Part B Application is lacking the necessary surface flow information on our topographic map of the site. We would like to propose that the surface water flow information be submitted after the site has been graded for construction. The surface water flow information was not completed because the information will change after the site has been graded. Once construction has begun and the initial grading completed, we will submit this information for your review.

Sincerely,

Mark A. Worley

Dear Mr. Diltz:

Please find enclosed revisions to our present permit application. The pages enclosed will replace those in the most current draft of our application.

In some cases new pages were added. These pages are numbered with a number followed by the letter "A". These pages are to be inserted after the numbered page which appears on the revised page.

If you have any questions regarding these changes please do not hesitate to call.

Sincerely,

Mark A. Worley
