Re: Safety-Kleen Systems, Inc. - Sanford -FLD 984171165  
Operating Permit Renewal  
HO59-0022198  
First Notice of Deficiency  
Extension Request

Dear Mr. Aoussat:

On 30 August 1998 the Department issued a letter to Safety-Kleen Systems, Inc. outlining notices of deficiencies related to the Permit Renewal Application submitted in July of 1998. Safety-Kleen would like to request a one week extension in replying to these deficiencies in the Permit Reapplication. Our original intention was to submit responses by 30 September 1998. Due to unforeseen circumstances we are unable to meet this deadline.

The necessity to activate our hurricane preparedness plan for some of our Florida Facilities during the week of 21 September diverted time which had been allocated for completion of our responses. Also, the Northeast District of FDEP issued a preliminary draft operating permit renewal for our Orange Park Service Center on Friday the 25th of September. The 30th of September 1998 has been established as a deadline for submittal of comments.

We appreciate your understanding in this matter. If you have any questions concerning this request please call me at (813) 626-0052.

Sincerely,

Richard R. Morris  
Environmental, Health & Safety Manager
