Subject: FDEP / Pinellas County Hazardous Waste Inspection Follow-up

Good afternoon,

Thank you for accompanying us on the hazardous waste inspection of Ring Power Corp. located at 2700 Gandy Blvd Pinellas Park. As a follow-up to the inspection, the Department noted that the facility may be generating at a Very Small Quantity Generator (VSQG) rate. The facility notified as a Small Quantity Generator (SQG) of hazardous waste on 8/26/2020 (See attached). If you would like to maintain the SQG generator status, the only documentation that is needed is the Letters to Authorities:

- A small quantity generator of hazardous waste shall make emergency response arrangements with the following: Fire Department, Police, Hospital, and Emergency Response Contractor. Letters containing the contingency plan shall be sent to each of these authorities and a copy of the letter and an acceptance or rejection from the authority should be kept onsite. If you are able to send a copy of your contingency plan to the mentioned local authorities and either CC me on the email or send me documentation of the attempt to make the arrangements, I can correct this violation. If you would like to re-notify as a VSQG this is not required.
- Please send the documentation by **close of business Monday February 1** if you would like to maintain SQG status.

For the used oil transport/transfer facility requirements, transfer facilities can only hold used oil generated from off site for up to 35 days. Please provide documentation on how this can be corrected. Eg: putting used oil from offsite in a separate container and shipping off at least every 35 days or; shipping all used oil offsite at least every 35 days.

- Please send this information by **close of business Monday February 1**.

Finally, please see the below information on managing aerosol cans as universal waste:

- The State of Florida has adopted the EPA Final Rule that added aerosols to the universal waste program. The Final Rule was effective on October 30, 2020, <https://floridadep.gov/waste/permitting-compliance-assistance/content/hazardous-waste-rulemaking>

Please let me know if you have any questions or concerns. The Department appreciates your cooperation in this matter.

Thanks,

Good Morning Rick,

I see this location as having an 8 week service term, not as needed. To verify, would you still like to have the service term changed to 4 weeks?

Thank you,

Subject: Used Oil Pickup Schedule Change for Ring Power-Pinellas Park Facility

Alex,

Please adjust the Used Oil pickup schedule for the Ring Power-Pinellas Park facility from as needed to every 30 days. This is needed so Ring Power will not be classified as a Used Oil Processor.

Please confirm via email.

Thank you,

Rick Vaughn
