Subject: Southern Oil Recovery info

I drove down the driveway to see if the property owner was onsite, or if someone would give DEP and Seminole County permission to enter private property. The property owner was not onsite. Joyce Bittle with FDOH inspected the property prior to my arrival. She spoke with someone who was at the property and stated that majority of the drums on site were empty. The drums that were being used contained used oil and oil filters. Since no one was onsite to give FDEP OER permission onto private property Responder Mullin demobilized from the site. While leaving the site it appeared that there were approximately 30 – 40 drums that contained used oil/ petroleum products. It also appeared that the drums were marked with nonhaz labels. The drums were in good condition and no spills were observed. The following contact information was obtained:

Company know – Southern Oil Recovery
Company phone number – 407-349-9132
Property owner - Kerry Pressley
Property owner phone number – 407-509-9683

Let me know if you have any questions.

Thank you,

James Mullin
