Subject: Courtesy Notification of Fire Event on 11/17/2019 (Facility ID 0250014)

Sir/Madam:

Yesterday at approximately 11:30am at the Miami Cement Plant, a fire occurred in a storage building used to house alternate fuels. The proper emergency response procedures were followed as outlined in the facility's emergency response plan. The fire was contained and extinguished within 70 minutes of notification to emergency services. No casualties or injuries were sustained. Please do not hesitate to contact me if you have any questions or require further information.

Subject: Cooler hydraulic leak.

Good evening,

Sorry to inform you but I Just want to report we had an hydraulic hose connection fail and leaked out 100 to 130 gallons of hydraulic oil under the SE side of the cooler. We did manage to contain the oil and cover it with sand to prevent it from going any where else. We did add (2 drums) 110 gal of oil back to the tank so the amount lost on the ground is close to being correct..

The incident happened around 7PM on Saturday night on B-shift.

Going to need it cleaned and disposed of correctly as you mentioned.

Regards...

Roger

It was reported this morning that during a route inspection at the top of clinker pan conveyor 491-AC1, one of the oil drums that was up there (to fill up gearbox if needed) was punctured (perhaps when some jackhammering was recently done) and leaked. See attached picture for reference.

Robert & some Yard personnel will be cleaning it up today.
