All Clean Earth, Inc. transportation companies are hazardous and non-hazardous waste transportation companies.

II. Emergency Reporting

In the event of an emergency or a hazardous waste spill during transportation, any Clean Earth, Inc. transportation company, will immediately notify 911, the appropriate state agency, and the National Response Center with the following information required by 263a.30 and 40 CFR Subpart 263.30(c) incorporated at 25 Pa. Code 263a.10:

1. Name of the person reporting the incident.
2. Transporter's name, address and the EPA identification number:

Clean Earth Specialty Waste Solutions, INC
2850 100th Ct NE
Blaine, MN 55449
EPA ID# MNS000110924
DOT# 1348411

3. Phone number where the person reporting the incident can be reached.
 - a. Emergency Response Coordinator's phone number

4. Date, time and location of the incident.

5. Mode of transportation and type of transport vehicle.

CleanEarth	CLEAN EARTH Integrated Management System		Rev Date: 07/20/2022 Revision #: 2
	Transportation Spill Contingency Plan		
Location: All Clean Earth Facilities, Locations, and Employees	Issuing Department: CE Corporate	Approving Department: CE Corporate	Page: Page 5 of 17

6. A brief description of the incident, including the type of incident.

7. For each waste involved in the spill:

- The name and EPA identification number of the generator of the waste.
- Shipping name, hazard class and UN or NA number of the waste.
- Estimated quantity of the material or the waste spilled.
- The extent of the contamination of land, water, or air.

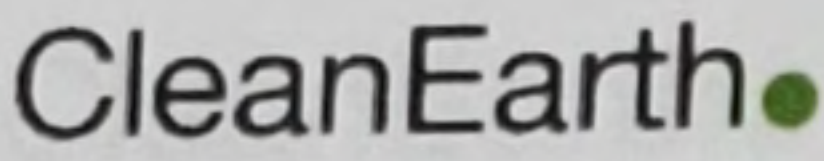

8. Shipping name, hazard class, and the UN or NA number of any other material carried.

In the event of an emergency or hazardous waste spill during transportation, any Clean Earth transportation company will immediately notify the affected municipality of the occurrence and the nature of the spill.

All Clean Earth, Inc. transportation companies will submit a report of the incident in writing as required by 49 CFR 171.16 to the Director, Office of Hazardous Materials Regulations, Materials Transportation Bureau, Dept. of Transportation, Washington DC 20590, and send copies of the report to the Department of Environmental Protection, and generator.

III. Emergency Procedures for Driver

- Use cell phone located in truck to call local authorities, fire and police.
- Notify the primary and/or secondary Clean Earth transportation company's Emergency Coordinator and follow the emergency reporting procedures under Section II of Contingency Plan.
- Remain with the vehicle (truck, tractor and/or trailer) and warn all pedestrians and motorists to stay away from the spill area, pointing out to them the danger involved.
- Upon arrival of police/fire departments, the driver will inform the authorities of what kind of material was spilled and utilizing the Emergency Response Guide request the area be blocked off to both pedestrians and vehicles according to the recommendations listed in the guide to prevent property damage or any serious personal injury.
- Containment of the spill is critical, preventing the material from entering a storm/sanitary sewer or stream is of the greatest importance. Locate the emergency spill kit; use the appropriate personnel protective equipment, respirator, Tyvek™, gloves, safety-glasses and attempt to create a barrier with booms and pads located in spill kit. The source of the leak must also be located and controlled, over pack, drum plug, turn upside down.

		CLEAN EARTH Integrated Management System	Rev Date: 07/20/2022 Revision #: 2
Transportation Spill Contingency Plan			
Location: All Clean Earth Facilities, Locations, and Employees	Issuing Department: CE Corporate	Approving Department: CE Corporate	Page: Page 6 of 17

6. The possibility of evacuation should be considered in the event of a major spill, a collision with another vehicle or a loaded trailer that has turned over, with subsequent container(s) rupturing. Major concerns involve ignitable/combustible material that may catch fire and explode or generate toxic fumes. If fire threatens or actually occurs, personnel should be evacuated a distance of a half-mile.

IV. List of Emergency Response Agencies, Coordinators, and Contractors

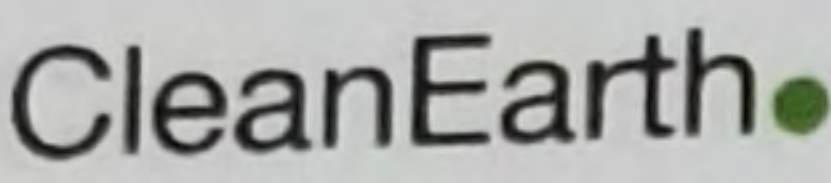

See Attachment I: "List of Emergency Response Agencies and Coordinators" for the appropriate contacts for each subsidiary.

V. Emergency Equipment

The following emergency equipment and supplies will be located in each truck that Clean Earth, Inc. operates to transport hazardous and non-hazardous waste:

- Absorbent Pads – Chemical and oil capable.
- Absorbent Booms – Chemical and oil capable to stop potential runoff of a liquid spill.
- Absorbent Mats – Chemical and oil capable to cleanup spilled materials.
- Oil Dry –oil dry to absorb spilled oily liquids.
- Chemical Absorbent –inorganic absorbent to clean up non-oily liquids.
- Full Face Respirator – With combination cartridges for organics, inorganics and mercury.
- Gloves – Various types of gloves to properly protect our drivers from all types of chemicals.
- Protective Suits – Paper Tyvek, and saran Tyvek to properly protect our drivers from all types of chemicals.
- First Aid Kit
- Safety Glasses
- Hard Hat
- Steel Toe Shoes
- Fire Retardant Protective Clothing – All drivers will be wearing company uniform with long sleeve shirts to reduce risk of injuries.

"All equipment shall be tested and maintained as necessary to assure its proper operation in time of emergency. After an emergency, all equipment shall be decontaminated, cleaned, and fit for its intended use before normal operations resume."

Location: All Clean Earth Facilities, Locations, and Employees	Issuing Department: CE Corporate	Approving Department: CE Corporate	Page: Page 7 of 17

VI. External Communications

Clean Earth, Inc. trucks will all be equipped with cellular phones to properly contact the emergency coordinator and/or notify the emergency response agencies in the event of an accident or emergency.

VII. Routine Decontamination Procedures

Routine decontamination typically is discarding of PPE after a truck is loaded or unloaded. All containers that are to be transported are checked for leaks and any material on top of the containers.

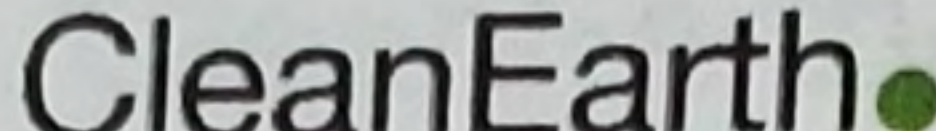

If dry material is left in a container (box van trailer, roll off box, drums) after a load has been delivered, the decontamination procedure will take place at a Clean Earth, Inc. facility on a truck decontamination pad. All 40-hour HAZWOPER (29 CFR 1910.120) trained personnel will determine correct level of PPE before any work is to begin. If the container is determined to be a confined space a confined space permit will be completed along with metering of atmosphere before and during entry procedures.

Dry material will be swept or vacuumed, collected and placed into a DOT certified drum, labeled and placed into inventory at Clean Earth, Inc. facility for future disposal. PPE then will be discarded into a DOT certified drum, labeled and placed into inventory. The confined space permit if applicable will then be closed.

If a heel of material is left in a container (tanker, roll off box, drums) after all product has been removed that has to be washed from a holding container, this will take place at Clean Earth, Inc. facility on a truck decontamination pad. All 40-hour HAZWOPER (29 CFR 1910.120) trained personnel will determine correct level of PPE before any work is to begin. If the container is determined to be a confined space a confined space permit will be completed along with metering of atmosphere before and during entry procedures.

Decontamination will be accomplished first by collecting the solids by shoveling and containerizing into DOT approved drums. The holding container will then be pressure washed and the rinsate will be collected and then pumped using an air driven diaphragm pump into DOT certified drums. All drums will be labeled and placed into inventory at Clean Earth, Inc. facility for future disposal. PPE then will be discarded into a DOT certified drum, labeled and placed into inventory. The confined space permit if applicable will then be closed.

If equipment needs decontamination on site before moving the procedure is to have a temporary decontamination pad constructed using two layers of 6-mil poly, hay bales, and absorbent booms.

Transportation Spill Contingency Plan			
Location: All Clean Earth Facilities, Locations, and Employees	Issuing Department: CE Corporate	Approving Department: CE Corporate	Page: Page 8 of 17

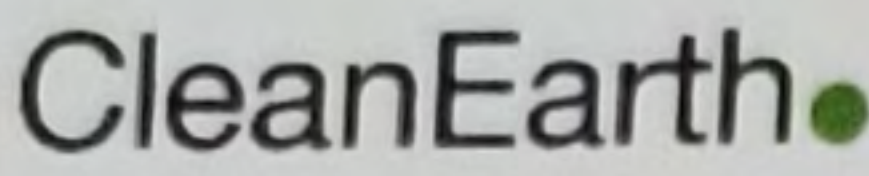

If the container is determined to be a confined space a confined space permit will be completed along with metering of atmosphere before and during entry procedures.

All solids will be collected and placed into DOT approved containers. If washing or scrubbing of equipment is needed all rinsate will be collected and pumped into DOT approved containers. All material that was used to construct the temporary decontamination pad will be gathered together and placed into DOT approved containers. All collected material will be labeled, manifested and shipped to Clean Earth, Inc. facility. The confined space permit if applicable will then be closed.

VIII. EMPLOYEE/DRIVER TRAINING PROGRAM

All employees that are active in field technical work go through a series of training courses whether done on site or through an outside training company:

- DOT training (49 CFR 126,181,215, 383, 390-399 and DRGHW 263.104) which includes:
 - Hazardous Materials Security
 - Shipping papers
 - Packaging
 - Placarding
 - Federal Motor Carrier Safety Regulations
 - Applicable State Regulations
- 24 Hour HAZWOPER 29 CFR 1910.120 which includes:
 - Hazardous Communication, Employee right to know, MSDS
 - First responder training (what to do to if you are first on the scene of a spill)
 - Decontamination procedures
 - Correct PPE selection
- RCRA Training (40 CFR 262.34(A)(4)) which includes:
 - What is and what is not a hazardous waste.
 - EPA codes, how these are determined
- Blood borne Pathogens (29 CFR 1910.1030(g)(2)) which includes:
 - What is a blood borne pathogen?
 - Decontamination of equipment that could be contaminated
- Fire Prevention (29 CFR 1910.38) which includes:
 - What are flammable and combustible materials?
 - How to properly store flammable and combustible materials.
 - Classes of fire.
- Fire Extinguisher Training (29 CFR 1910.157(g) which includes:
 - How to use a fire extinguisher properly to put out a fire.
 - What type of fire extinguisher to use with certain fires?
- First Aid training (29 CFR 1910.151)
- Accident Investigation which includes:

Transportation Spill Contingency Plan			
Location: All Clean Earth Facilities, Locations, and Employees	Issuing Department: CE Corporate	Approving Department: CE Corporate	Page: Page 9 of 17

- What is a reportable accident to OSHA?
- How to prevent accidents from happening.

All employees receive retraining yearly for all subjects. Monthly safety meetings are held on certain aspects of each major heading.

IX. Implementation Schedule

Clean Earth, Inc. has implemented this entire plan to ensure the health and safety of our employees, the public, and the environment. We are eager to demonstrate our commitment to compliance and health and safety. This plan will be updated routinely upon significant changes.

Attachment 1 Emergency Contacts

List of Emergency Response Agencies.

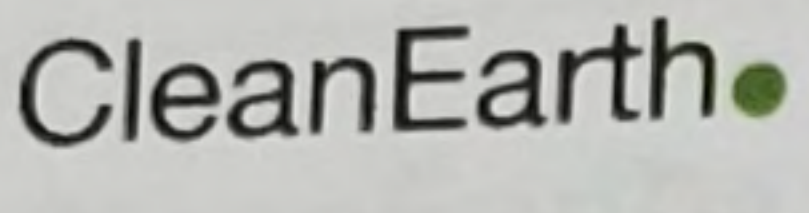

These Agencies must be notified in the event of an incident:

1. State and local police and fire department Dial 911 or 0 (operator).
2. The National Response Center at (800) 424-8802 (24 hours) or (202) 426-2675 if the spill equals or exceeds the RQ value or if any condition listed below is met:

As a result of Hazardous Materials-

- a. A person is killed or requires hospitalization due to injuries;
- b. Carrier or property damage exceeds \$50,000;
- c. Accident/spill involves radioactive materials or etiological agents;
- d. Evacuation of the general public occurs lasting one or more hours;
- e. One or more transportation arteries are shut down;
- f. The operation flight pattern of an aircraft is altered;
- g. There has been a release of a marine pollutant in a quantity exceeding 119 gallons or 882 pounds;
- h. Notification caused by continuing dangers to life;
- i. A situation exists of such a nature that in the judgment of the carrier, it should be reported to the Department, even though it does not meet the criteria of paragraphs a through h.

3. The generator of the waste.
4. The environmental agency of the particular where the incident occurs. The following is a list of the agencies and their phone numbers. The most up-to-date information can be found at the following website: <https://www.epa.gov/home/health-and-environmental-agencies-us-states-and-territories>. When a conflict between the website and the following list occurs, the website's listing is the valid contact.

CERTIFICATE OF REGISTRATION
FOR REGISTRATION YEAR(S) 2022-2025

Registrant: CLEAN EARTH SPECIALTY WASTE SOLUTIONS INC
ATTN: Stacy Johnson
2850 100TH COURT NE
BLAINE, MN 55449

This certifies that the registrant is registered with the U.S. Department of Transportation as required by 49 CFR Part 107, Subpart G.

This certificate is issued under the authority of 49 U.S.C. 5108. It is unlawful to alter or falsify this document.

Reg. No: 051022550043EG **Effective:** July 1, 2022 **Expires:** June 30, 2025

HM Company ID: 78603

Record Keeping Requirements for the Registration Program

The following must be maintained at the principal place of business for a period of three years from the date of issuance of this Certificate of Registration:

- (1) A copy of the registration statement filed with PHMSA; and
- (2) This Certificate of Registration

Each person subject to the registration requirement must furnish that person's Certificate of Registration (or a copy) and all other records and information pertaining to the information contained in the registration statement to an authorized representative or special agent of the U. S. Department of Transportation upon request.

Each motor carrier (private or for-hire) and each vessel operator subject to the registration requirement must keep a copy of the current Certificate of Registration or another document bearing the registration number identified as the "U.S. DOT Hazmat Reg. No." in each truck and truck tractor or vessel (trailers and semi-trailers not included) used to transport hazardous materials subject to the registration requirement. The Certificate of Registration or document bearing the registration number must be made available, upon request, to enforcement personnel.

For information, contact the Hazardous Materials Registration Manager, PHH-52, Pipeline and Hazardous Materials Safety Administration, U.S. Department of Transportation, 1200 New Jersey Avenue, SE, Washington, DC 20590, telephone (202) 366-4109.

Subject: Notification of PCB Activity

Thank you for filing the Notification of PCB Activity form for the facility location listed below:

Received: July 15, 2022
TSCA ID Number: MNS000110924
Handler Name: CLEAN EARTH SPECIALTY WASTE SOLUTIONS
Location Address: 2850 100TH CT NE
BLAINE, MN 55449

This is to notify you that EPA's Office of Resource Conservation and Recovery (ORCR) has received your request to modify the facility entry from the PCB waste handlers database. The modification you requested has been made, and this letter serves as your confirmation.

If you have any questions regarding the PCB waste handlers database, please contact the ORCR PCB Team at ORCRPCBs@epa.gov.

Sincerely,

A handwritten signature in cursive script, appearing to read "Amanda Kohler".

CHARLES ALUTTO
CEO
STERICYCLE SPECIALTY WASTE SOLUTIONS INC
2850 100TH COURT NE
BLAINE, MN 55449

Dear CHARLES ALUTTO:

HAZARDOUS MATERIALS SAFETY PERMIT
HM Safety Permit ID: US-1348411-MN-HMSP
Effective Date: January 9, 2019

The Hazardous Materials Safety Permit (HMSP) is verification of the motor carrier's permission to engage in the transportation of hazardous materials listed in 49 CFR 385.403 by motor vehicle in interstate, intrastate, or foreign commerce.

This HMSP will be effective beginning January 9, 2019 and remain effective through January 31, 2021 if your company maintains compliance with the requirements pertaining to the safe and secure movement of hazardous materials for the protection of the public (49 CFR 385 and other applicable Federal Motor Carrier Safety Regulations and Hazardous Material Regulations). Failure to maintain compliance will constitute sufficient grounds for suspension or revocation of this authority.

Willful and persistent noncompliance with applicable safety fitness regulations as evidenced by a Department of Transportation safety fitness rating less than "Satisfactory" or by other indicators, could result in a proceeding requiring the holder of this permit to show cause as to why this authority should not be suspended or revoked.

For questions regarding this document you may contact the FMCSA Hazardous Materials Division at 202-366-6121.

Sincerely,

Joseph P. DeLorenzo
Director, Office of Enforcement and Compliance

The Florida Department of Environmental Protection has reviewed your application for registration as a transporter or handler for universal waste lamps and devices destined for recycling. Based on the information received, the facility located at **2850 100th NE, Blaine, MN 55449** has been registered through **March 1, 2023** with the following status:

Facility ID # **MNS000110924**
Transporter of Universal Waste Lamps and Devices

Requirements for packaging, training and recordkeeping for transporters and handlers of universal waste lamps or devices destined for recycling are contained in Chapter 62-737, Florida Administrative Code (F.A.C.). These requirements are simple, flexible, and make good business and environmental sense. The requirements and fact sheets summarizing them can be found on the following website: <http://www.dep.state.fl.us/waste/categories/mercury/pages/registration.htm>

This registration does not allow you to transport or handle universal waste lamps or devices which are destined for landfill or any other disposal. The transportation or handling of universal waste lamps or devices destined for disposal is subject to our hazardous waste management regulations under Chapter 62-730, Florida Administrative Code (F.A.C.).

The renewal notice for this registration will be sent to the contact person on your application. If any of your facility's information changes, please notify the Department using the Florida Notification of Regulated Waste Activity, DEP Form 62-730.900(1)(b), F.A.C.

If you have any questions, you may contact me at (850)245-8705 or Jeff.Gregg@dep.state.fl.us.

Sincerely,

Susan L. Harlick

Medley, FL 33166

The Florida Department of Environmental Protection has reviewed your submittal for a hazardous waste DEP/EPA Identification Number or status/information change.

Based on the information received, you have been issued the following number or reports for **Cleaneath Specialty Waste Solutions INC** located at **8505 NW 74th St, Miami, FL 33166-2327**

DEP/EPA Identification Number: **FL0000702985**

Your facility status is the following: **Very Small Quantity Generator (VSQG), Universal Waste - Batteries, Universal Waste - Pesticides, Universal Waste - Lamps, Universal Waste - Devices, Authorized to Manage VSQG Hazardous Waste, Large Quantity Handler.**

Florida Administrative Code 62-730 requires all persons who generate, transport, recycle, store, or dispose of hazardous waste to notify the department of their hazardous waste activities. You are required to renotify on form 8700-12FL when there are changes in your operations which would affect your status, activity or contact information. Additional hazardous waste information including the 8700-12FL form can be found at:

<https://floridadep.gov/waste/permitting-compliance-assistance/content/hazardous-waste-management-main-page>.

Please note that pending program registrations, certifications, or permits will be sent to you separately. **To review the details of your status**, visit:

https://fldeploc.dep.state.fl.us/www_RCRA/Reports/handler_results.asp?epaid=FL0000702985.

For further assistance, please contact me at (850) 245-8707 or email me at Jeff.Gregg@dep.state.fl.us.
