Hi Michael

I am looking to speak to someone to see if there are options for an extension to a 10 day hazardous waste transfer facility registration that we have.

Our primary hazardous waste incinerator suffered a fire shortly before the holiday. They are going to be out for an extended period of time. After reaching out to other hazardous pharmaceutical waste incinerators to see if they have the ability to handle the waste, but the industry capacity issues prevent them from accepting any additional waste.

We service hospitals in the area and we are working with our generators to maximize on-site storage space and accumulation times based on their generator status.

There have been a couple that generate a significant volume of waste that exceeds their ability to store waste safely on-site and they are considered about safety, compliance, and public health issues. I am just looking to explore whether we could get an extension of our 10 day time limit in an effort to support in dire cases.

Please feel free to give me a call if you have any questions!
