**Re: Notification of Hazardous Waste Activity**

In accordance with 40 CFR 262.16(b)(8)(vi), Small Quantity Generators (SQGs) of hazardous waste are required to contact the local hospital, emergency response teams, police and fire departments for emergency planning purposes. We are notifying you that our business (construction equipment servicing) generates hazardous waste. In the unfortunate event of an emergency that we may require your assistance. The property location is:

**Ring Power Corporation  
7500 26<sup>th</sup> Ct East  
Sarasota, FL 34243**

The resultant hazardous wastes generated, and the quantities typically observed at our site include:

➤ **Aerosol Liquid Waste\***

Not more than (NMT) 30 gallons total onsite

➤ **Used Diesel\*** contaminated with water (NMT 10% water)

NMT 120 gallons (usually contained in 55-gallon containers and/or 320-gallon totes)

NOTE: Waste Diesel is typically removed from site within 7-10 days

\*Typical Waste Profile attached

Attached is a site diagram showing the facility layout including locations where hazardous wastes are managed. Personnel are typically located throughout the facility, to include all shop buildings, offices and exterior laydown areas. Potential injuries could range from mild to 3<sup>rd</sup> degree burns, dismemberment, exposure to toxic chemicals (as a result of a security threat/terrorism, spill/discharge, fire, explosion),

Our effort is to mitigate or eliminate possible unfortunate events by properly managing our hazardous wastes. However, in the unfortunate event of an emergency we may require your assistance. Please let us know if you need additional information; you may contact me at (813) 638-9332 or [David.Harriman@RingPower.com](mailto:David.Harriman@RingPower.com) if you wish to schedule a site visit for planning purposes. Thank you for your time and attention concerning this matter.

Respectfully,
