

P. Information Regarding Potential Releases from Solid Waste Management Units:

*A Solid Waste Management Unit (SWMU) is a discernible unit at which solid wastes have been placed at any time, irrespective of whether the unit was intended for the management of solid or hazardous waste. Such units include all areas at a facility where solid wastes have been routinely and systematically released, as described in the July 27, 1990 Federal Register (55 FR 30798). The SWMU list in DEP Form 62-730.00(2)(c) does not include all types of SWMUs: these are a sampling of the more common types of units. If you have a different type of Solid Waste Management Unit, mark yes under "other."*

Solid waste, including hazardous waste, is stored onsite in permitted areas. The storage areas contain secondary containment and have equipment capable of cleaning potential releases.
