Ms. Jade Knight
Florida Department of Environmental Protection
Compliance Assurance Program
Southeast District – West Palm Beach

June 8, 2023

Dear Ms. Knight,

On May 23, 2023, a site inspection was conducted at the Cummins Sales and Service branch located at 3754 Interstate Park Way, Riviera Beach, FL 33404. This correspondence serves as response to your email dated May 26, 2023, regarding a list of items for follow-up. Responses are as follows:

1. ***“At the time of the inspection the cleaning state on the outside wall was coated all around with used oil with various buckets and a filter covered in used oil. There were major cracks in the concrete near the drain, which could lead to used oil seeping through into the soil beneath.”***

- a. The oil filter was placed in the “used oil filter” container & the wash bay has been cleaned.

- b. We have contacted several contractors regarding the cracks in the concrete. We have approached several contractors, who are conducting site visits this week. The contractors are preparing quotes to seal and/or repair the cracks.

**Sales and
Service**

2. ***“At the time of inspection one of the Satellite Accumulation Area were 2 red trash bins. One of the container labels was worn out and illegible.”***

a. The can has been relabeled.

3. ***“At the time of inspection there was a used oil caddy with no ‘used oil’ label.”***

a. The caddy has been relabeled.

Please advise if there is any additional information that is needed upon your review.

Sincerely,

Phil Alcantara
Area General Manager
