Subject: oil shipments from Winter Haven to Kingsland Ga.

Hi. Beth

The used oil that is shipped from Winter haven to Kingsland has been tested with a Dexsil kit to make sure it hasn't been Mixed with Chlorinated Solvents. Once the oil arrives at the kingsland Facility it is unloaded into day tanks with other incoming streams of used oil from other Facility's. The used oil is than either processed into a fuel for Energy Recovery or Refined into Vacuum Gas Oil. Prior to Refining or sale for Energy Recovery an on-specification analyas is performed.If you have anymore questions you can call me, or –e-mail me .Thanks again Beth.

Thank you, Jeff Englin
