The samples in this SDG were analyzed on an "as received" basis.

Data Summary:

All sample data provided in this report met the acceptance criteria specified in the analytical methods and procedures for initial calibration, continuing calibration, instrument controls and process controls where applicable, with the following exceptions.

Quality Control (QC) Information

Matrix Spike (MS/MSD) Recovery Statement

The percent recoveries (%R) obtained from the MS/MSD analyses are evaluated when the sample concentration is less than four times (4X) the spike concentration added. The MS/MSD (See Below) did not meet the recommended quality control acceptance criteria for percent recoveries for the following applicable analyte. The post spike recovery was within the required control limits. This verifies the absence of a matrix interference in the post-spike digested sample. The recovery may be attributed to possible sample matrix interference and/or non-homogeneity.

Sample	Analyte	Value
1205690436 (12045.B1.Top Front.EPAMS)	Mercury	172* (80%-120%)

Duplicate Relative Percent Difference (RPD) Statement

The RPD obtained from the designated sample duplicate (DUP) is evaluated based on acceptance criteria of 20% when the sample is >5X the contract required reporting limit (RL). In cases where either the sample or duplicate value is less than 5X the RL, a control of +/-RL is used to evaluate the DUP results. Not all the applicable analyte RPD values were within the acceptance criteria.

Sample	Analyte	Value
1205690435 (12045.B1.Top Front.EPADUP)	Mercury	68.6* (0%-20%)

Technical Information

Sample Dilutions

Dilutions may be required for many reasons, including to minimize matrix interferences or to bring over range target analyte concentrations into the linear calibration range. Sample 660771002 (12045.B1.Middle Front.EPA) was diluted to ensure that the analyte concentration was within the linear calibration range of the instrument.

Analyte	660771
	002
Mercury	2X

Certification Statement

Where the analytical method has been performed under NELAP certification, the analysis has met all of the requirements of the NELAC standard unless otherwise noted in the analytical case narrative.

Qualifier Definition Report for

PERM001 Perma-Fix of Florida

Client SDG: 660771 GEL Work Order: 660771

The Qualifiers in this report are defined as follows:

- * A quality control analyte recovery is outside of specified acceptance criteria
- B Either presence of analyte detected in the associated blank, or MDL/IDL < sample value < PQL
- J Value is estimated
- N Metals--The Matrix spike sample recovery is not within specified control limits
- U Analyte was analyzed for, but not detected above the MDL, MDA, MDC or LOD.

Review/Validation

GEL requires all analytical data to be verified by a qualified data reviewer. In addition, all CLP-like deliverables receive a third level review of the fractional data package.

The following data validator verified the information presented in this data report:

Re: VTD TSCA TEST 2024 2024VTD_POST_TEST_4-PFF
Work Order: 660974

Dear Sophia Barbour:

GEL Laboratories, LLC (GEL) appreciates the opportunity to provide the enclosed analytical results for the sample(s) we received on April 02, 2024. This original data report has been prepared and reviewed in accordance with GEL's standard operating procedures.

Test results for NELAP or ISO 17025 accredited tests are verified to meet the requirements of those standards, with any exceptions noted. The results reported relate only to the items tested and to the sample as received by the laboratory. These results may not be reproduced except as full reports without approval by the laboratory. Copies of GEL's accreditations and certifications can be found on our website at www.gel.com.

Our policy is to provide high quality, personalized analytical services to enable you to meet your analytical needs on time every time. We trust that you will find everything in order and to your satisfaction. If you have any questions, please do not hesitate to call me at (843) 556-8171, ext. 4422.

Sincerely,

Adrian Melendrez for

Summary:

Sample receipt: The samples arrived at GEL Laboratories LLC, Charleston, South Carolina on April 02, 2024 for analysis. The samples were delivered with proper chain of custody documentation and signatures. The samples were screened according to GEL Standard Operating Procedure. All sample containers arrived without any visible signs of tampering or breakage. Containers were checked for pH, where appropriate, and matched the preservative as documented on the accompanying chain of custody. Shipping container temperature was within specification (0 - 6C). Samples were received within the specified holding time. There are no additional comments concerning sample receipt.

Sample Identification: The laboratory received the following samples:

Data Summary:

All sample data provided in this report met the acceptance criteria specified in the analytical methods and procedures for initial calibration, continuing calibration, instrument controls and process controls where applicable, with the following exceptions.

Calibration Information

Continuing Calibration Verification Requirements

All Calibration Verification Standards (CCV) did not meet the acceptance criteria as outlined in Method 8260D for samples and the associated QC. However, the method allows for a designated number of outliers dependent on the requested analyte list. This SDG satisfied the 8260D outlier acceptance criteria. The results are reported.

Quality Control (QC) Information

Blank (MB) Statement

Target analytes were detected in the blank 1205694060 (HB) below the reporting limit. The associated data are qualified accordingly and reported.

Technical Information

Sample Dilutions/Methanol Dilutions

Samples were analyzed employing a methanol dilution extraction procedure because the sample matrices were not amenable to more concentrated analyses.

Miscellaneous Information

Additional Comments

Samples were characterized as miscellaneous solids.

Certification Statement

Where the analytical method has been performed under NELAP certification, the analysis has met all of the requirements of the NELAC standard unless otherwise noted in the analytical case narrative.

Qualifier Definition Report for

PERM001 Perma-Fix of Florida

Client SDG: 660974 GEL Work Order: 660974

The Qualifiers in this report are defined as follows:

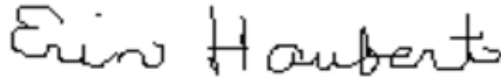

- * A quality control analyte recovery is outside of specified acceptance criteria
- ** Analyte is a surrogate compound
- B The target analyte was detected in the associated blank.
- J Value is estimated
- U Analyte was analyzed for, but not detected above the MDL, MDA, MDC or LOD.
- DL Indicates that sample is diluted.
- RA Indicates that sample is re-analyzed without re-extraction.
- RE Indicates that sample is re-extracted.

Review/Validation

GEL requires all analytical data to be verified by a qualified data reviewer. In addition, all CLP-like deliverables receive a third level review of the fractional data package.

The samples in this SDG were analyzed on an "as received" basis.

Data Summary:

All sample data provided in this report met the acceptance criteria specified in the analytical methods and procedures for initial calibration, continuing calibration, instrument controls and process controls where applicable, with the following exceptions.

Calibration Information

Initial Calibration

The ICV (initial calibration verification) standard recovered above the acceptance criteria for several target analytes. This non-compliance had no adverse impact on the data as the failed analytes were not detected in the associated samples. The data were reported.

Please note that due to software issues at the time of packaging, the Initial Calibration Summary (ICV) forms (Form 07) for samples in this SDG displayed the Maximum Drift 20%, not the Method required 30%. 660974001 (12039.B4.Top Front.PFF), 660974002 (12039.B4.Middle Front.PFF), 660974003 (12039.B4.Bottom Front.PFF), 660974004 (12040.B4.Top Back.PFF), 660974005 (12040.B4.Middle Back.PFF) and 660974006 (12040.B4.Bottom Back.PFF).

CCV Requirements

All Calibration Verification Standards (CCV) did not meet the acceptance criteria as outlined in Method 8270D/E for samples 660974001 (12039.B4.Top Front.PFF), 660974002 (12039.B4.Middle Front.PFF), 660974003 (12039.B4.Bottom Front.PFF), 660974004 (12040.B4.Top Back.PFF), 660974005 (12040.B4.Middle Back.PFF) and 660974006 (12040.B4.Bottom Back.PFF) and the associated QC. However, the method allows for a designated

number of outliers dependent on the requested analyte list. This SDG satisfied the 8270D/E outlier acceptance criteria. If required, a CRDL was analyzed after the CCVs to demonstrate that there is adequate sensitivity to detect the failed compounds at the applicable lower quantitation limit.

Quality Control (QC) Information

Spike Recovery Statement

The MS and MSD (See Below) did not meet spike recovery acceptance criteria. There was a detected presence of bis(2-Ethylhexyl)phthalate above the reporting limits in the un-spike parent sample that caused biased calculated results in the MS and MSD. The data results have been reported.

Sample	Analyte	Value
1205692353 (Non SDG 660558002MS)	bis(2-Ethylhexyl)phthalate	1260* (17%-133%)
1205692354 (Non SDG 660558002MSD)	bis(2-Ethylhexyl)phthalate	675* (17%-133%)

MS/MSD Relative Percent Difference (RPD) Statement

The relative percent differences (RPD) for the MS and MSD, (See Below), were not within the acceptance limits. The failures were attributed to matrix interference. The data were reported.

Sample	Analyte	Value
1205692353MS and 1205692354MSD (Non SDG 660558002)	bis(2-Ethylhexyl)phthalate	RPD 43* (0%-30%)

Miscellaneous Information

Additional Comments

Diphenylamine Statement

Diphenylamine has superseded the reporting of N-Nitroso-diphenylamine. As per the EPA, N-Nitroso-diphenylamine decomposes in the gas chromatographic inlet and cannot be separated from Diphenylamine. Studies of these two compounds at GEL, both independent of each other and together, showed that they not only co-elute, but also have similar mass spectra. N-Nitroso-diphenylamine and Diphenylamine are therefore reported as Diphenylamine on all reports and forms.

Certification Statement

Where the analytical method has been performed under NELAP certification, the analysis has met all of the requirements of the NELAC standard unless otherwise noted in the analytical case narrative.

Qualifier Definition Report for

PERM001 Perma-Fix of Florida

Client SDG: 660974 GEL Work Order: 660974

The Qualifiers in this report are defined as follows:

- * A quality control analyte recovery is outside of specified acceptance criteria
- ** Analyte is a surrogate compound
- E Concentration of the target analyte exceeds the instrument calibration range
- J Value is estimated
- U Analyte was analyzed for, but not detected above the MDL, MDA, MDC or LOD.
- DL Indicates that sample is diluted.
- RA Indicates that sample is re-analyzed without re-extraction.
- RE Indicates that sample is re-extracted.

Review/Validation

GEL requires all analytical data to be verified by a qualified data reviewer. In addition, all CLP-like deliverables receive a third level review of the fractional data package.

The following data validator verified the information presented in this data report:

The chromatogram displays a series of peaks over a 16-minute period. The y-axis represents Abundance, ranging from 0 to 1,400,000. The x-axis represents Time in minutes, ranging from 2.00 to 16.00. Numerous peaks are labeled with their corresponding chemical names, such as 1,4-Dioxane, Ethyl methacrylate, N-Nitrosodimethylamine, and many others. The peaks vary in height, with some reaching near the maximum abundance shown on the scale.

The samples in this SDG were analyzed on an "as received" basis.

Data Summary:

All sample data provided in this report met the acceptance criteria specified in the analytical methods and procedures for initial calibration, continuing calibration, instrument controls and process controls where applicable, with the following exceptions.

Technical Information

Sample Dilutions

Dilutions may be required for many reasons, including to minimize matrix interferences or to bring over range target analyte concentrations into the linear calibration range. Samples 1205692117 (12038.B2.Pre-Test.EPADUP), 1205692118 (12038.B2.Pre-Test.EPAMS) and 1205692119 (12038.B2.Pre-Test.EPASDILT) were diluted to ensure that the analyte concentrations were within the linear calibration range of the instrument.

Certification Statement

Where the analytical method has been performed under NELAP certification, the analysis has met all of the requirements of the NELAC standard unless otherwise noted in the analytical case narrative.

Qualifier Definition Report for

PERM001 Perma-Fix of Florida

Client SDG: 660974 GEL Work Order: 660974

The Qualifiers in this report are defined as follows:

- * A quality control analyte recovery is outside of specified acceptance criteria
- N/A RPD or %Recovery limits do not apply.
- U Analyte was analyzed for, but not detected above the MDL, MDA, MDC or LOD.

Review/Validation

GEL requires all analytical data to be verified by a qualified data reviewer. In addition, all CLP-like deliverables receive a third level review of the fractional data package.

The following data validator verified the information presented in this data report:

Re: VTD TSCA TEST 2024 2024VTD_POST_TEST_4_EPA
Work Order: 660968

Dear Sophia Barbour:

GEL Laboratories, LLC (GEL) appreciates the opportunity to provide the enclosed analytical results for the sample(s) we received on April 02, 2024. This original data report has been prepared and reviewed in accordance with GEL's standard operating procedures.

Test results for NELAP or ISO 17025 accredited tests are verified to meet the requirements of those standards, with any exceptions noted. The results reported relate only to the items tested and to the sample as received by the laboratory. These results may not be reproduced except as full reports without approval by the laboratory. Copies of GEL's accreditations and certifications can be found on our website at www.gel.com.

Our policy is to provide high quality, personalized analytical services to enable you to meet your analytical needs on time every time. We trust that you will find everything in order and to your satisfaction. If you have any questions, please do not hesitate to call me at (843) 556-8171, ext. 4422.

Sincerely,

Adrian Melendrez for

Summary:

Sample receipt: The samples arrived at GEL Laboratories LLC, Charleston, South Carolina on April 02, 2024 for analysis. The samples were delivered with proper chain of custody documentation and signatures. The samples were screened according to GEL Standard Operating Procedure. All sample containers arrived without any visible signs of tampering or breakage. Containers were checked for pH, where appropriate, and matched the preservative as documented on the accompanying chain of custody. Shipping container temperature was within specification (0 - 6C). Samples were received within the specified holding time. There are no additional comments concerning sample receipt.

Sample Identification: The laboratory received the following samples:

SDG #: 660968**

Product: Volatile Organic Compounds (VOC) by Gas Chromatograph/Mass Spectrometer

Analytical Method: SW846 8260D

Analytical Procedure: GL-OA-E-038 REV# 29

Analytical Batch: 2591977

Preparation Method: SW846 5035

Preparation Procedure: GL-OA-E-039 REV# 13

Preparation Batch: 2591975

The following samples were analyzed using the above methods and analytical procedure(s).

The samples in this SDG were analyzed on an "as received" basis.

Data Summary:

All sample data provided in this report met the acceptance criteria specified in the analytical methods and procedures for initial calibration, continuing calibration, instrument controls and process controls where applicable, with the following exceptions.

Calibration Information

Continuing Calibration Verification Requirements

All Calibration Verification Standards (CCV) did not meet the acceptance criteria as outlined in Method 8260D for samples and the associated QC. However, the method allows for a designated number of outliers dependent on the requested analyte list. This SDG satisfied the 8260D outlier acceptance criteria. The results are reported.

Quality Control (QC) Information

Blank (MB) Statement

Target analytes were detected in the blank 1205694060 (HB) below the reporting limit. The associated data are qualified accordingly and reported.

Technical Information

Sample Dilutions/Methanol Dilutions

Samples were analyzed employing a methanol dilution extraction procedure because the sample matrices were not amenable to more concentrated analyses.

Miscellaneous Information

Additional Comments

Samples were characterized as miscellaneous solids.

Certification Statement

Where the analytical method has been performed under NELAP certification, the analysis has met all of the requirements of the NELAC standard unless otherwise noted in the analytical case narrative.

Qualifier Definition Report for

PERM001 Perma-Fix of Florida

Client SDG: 660968 GEL Work Order: 660968

The Qualifiers in this report are defined as follows:

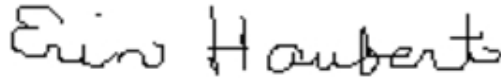

- * A quality control analyte recovery is outside of specified acceptance criteria
- ** Analyte is a surrogate compound
- B The target analyte was detected in the associated blank.
- J Value is estimated
- U Analyte was analyzed for, but not detected above the MDL, MDA, MDC or LOD.
- DL Indicates that sample is diluted.
- RA Indicates that sample is re-analyzed without re-extraction.
- RE Indicates that sample is re-extracted.

Review/Validation

GEL requires all analytical data to be verified by a qualified data reviewer. In addition, all CLP-like deliverables receive a third level review of the fractional data package.

The following data validator verified the information presented in this data report:

Data Summary:

All sample data provided in this report met the acceptance criteria specified in the analytical methods and procedures for initial calibration, continuing calibration, instrument controls and process controls where applicable, with the following exceptions.

Calibration Information

Initial Calibration

The ICV (initial calibration verification) standard recovered above the acceptance criteria for several target analytes. This non-compliance had no adverse impact on the data as the failed analytes were not detected in the associated samples. The data were reported.

Please note that due to software issues at the time of packaging, the Initial Calibration Summary (ICV) forms (Form 07) for samples in this SDG displayed the Maximum Drift 20%, not the Method required 30%. 660968001 (12039.B4.Top Front.EPA), 660968002 (12039.B4.Middle Front.EPA), 660968003 (12039.B4.Bottom Front.EPA), 660968004 (12040.B4.Top Back.EPA), 660968005 (12040.B4.Middle Back.EPA) and 660968006 (12040.B4.Bottom Back.EPA).

CCV Requirements

All Calibration Verification Standards (CCV) did not meet the acceptance criteria as outlined in Method 8270D/E for samples 660968001 (12039.B4.Top Front.EPA), 660968002 (12039.B4.Middle Front.EPA), 660968003 (12039.B4.Bottom Front.EPA), 660968004 (12040.B4.Top Back.EPA), 660968005 (12040.B4.Middle Back.EPA) and 660968006 (12040.B4.Bottom Back.EPA) and the associated QC. However, the method allows for a designated

number of outliers dependent on the requested analyte list. This SDG satisfied the 8270D/E outlier acceptance criteria. If required, a CRDL was analyzed after the CCVs to demonstrate that there is adequate sensitivity to detect the failed compounds at the applicable lower quantitation limit.

Quality Control (QC) Information

Spike Recovery Statement

The MS and MSD (See Below) did not meet spike recovery acceptance criteria. There was a detected presence of bis(2-Ethylhexyl)phthalate above the reporting limits in the un-spike parent sample that caused biased calculated results in the MS and MSD. The data results have been reported.

Sample	Analyte	Value
1205692353 (Non SDG 660558002MS)	bis(2-Ethylhexyl)phthalate	1260* (17%-133%)
1205692354 (Non SDG 660558002MSD)	bis(2-Ethylhexyl)phthalate	675* (17%-133%)

MS/MSD Relative Percent Difference (RPD) Statement

The relative percent differences (RPD) for the MS and MSD, (See Below), were not within the acceptance limits. The failures were attributed to matrix interference. The data were reported.

Sample	Analyte	Value
1205692353MS and 1205692354MSD (Non SDG 660558002)	bis(2-Ethylhexyl)phthalate	RPD 43* (0%-30%)

Miscellaneous Information

Additional Comments

Diphenylamine Statement

Diphenylamine has superseded the reporting of N-Nitroso-diphenylamine. As per the EPA, N-Nitroso-diphenylamine decomposes in the gas chromatographic inlet and cannot be separated from Diphenylamine. Studies of these two compounds at GEL, both independent of each other and together, showed that they not only co-elute, but also have similar mass spectra. N-Nitroso-diphenylamine and Diphenylamine are therefore reported as Diphenylamine on all reports and forms.

Certification Statement

Where the analytical method has been performed under NELAP certification, the analysis has met all of the requirements of the NELAC standard unless otherwise noted in the analytical case narrative.

Qualifier Definition Report for

PERM001 Perma-Fix of Florida

Client SDG: 660968 GEL Work Order: 660968

The Qualifiers in this report are defined as follows:

- * A quality control analyte recovery is outside of specified acceptance criteria
- ** Analyte is a surrogate compound
- E Concentration of the target analyte exceeds the instrument calibration range
- J Value is estimated
- U Analyte was analyzed for, but not detected above the MDL, MDA, MDC or LOD.
- DL Indicates that sample is diluted.
- RA Indicates that sample is re-analyzed without re-extraction.
- RE Indicates that sample is re-extracted.

Review/Validation

GEL requires all analytical data to be verified by a qualified data reviewer. In addition, all CLP-like deliverables receive a third level review of the fractional data package.

The following data validator verified the information presented in this data report:

Product: Mercury Analysis Using the Perkin Elmer Automated Mercury Analyzer

Analytical Method: SW846 7471B

Analytical Procedure: GL-MA-E-010 REV# 40

Analytical Batch: 2590723

Preparation Method: SW846 7471B Prep

Preparation Procedure: GL-MA-E-010 REV# 40

Preparation Batch: 2590722

The following samples were analyzed using the above methods and analytical procedure(s).

The samples in this SDG were analyzed on an "as received" basis.

Data Summary:

All sample data provided in this report met the acceptance criteria specified in the analytical methods and procedures for initial calibration, continuing calibration, instrument controls and process controls where applicable, with the following exceptions.

Technical Information

Sample Dilutions

Dilutions may be required for many reasons, including to minimize matrix interferences or to bring over range target analyte concentrations into the linear calibration range. Samples 1205692117 (12038.B2.Pre-Test.EPADUP), 1205692118 (12038.B2.Pre-Test.EPAMS) and 1205692119 (12038.B2.Pre-Test.EPASDILT) were diluted to ensure that the analyte concentrations were within the linear calibration range of the instrument.

Certification Statement

Where the analytical method has been performed under NELAP certification, the analysis has met all of the requirements of the NELAC standard unless otherwise noted in the analytical case narrative.

Qualifier Definition Report for

PERM001 Perma-Fix of Florida

Client SDG: 660968 GEL Work Order: 660968

The Qualifiers in this report are defined as follows:

- * A quality control analyte recovery is outside of specified acceptance criteria
- N/A RPD or %Recovery limits do not apply.
- U Analyte was analyzed for, but not detected above the MDL, MDA, MDC or LOD.

Review/Validation

GEL requires all analytical data to be verified by a qualified data reviewer. In addition, all CLP-like deliverables receive a third level review of the fractional data package.

The following data validator verified the information presented in this data report:
