PETROLEUM CONTACT WATER (PCW) WEEKLY INSPECTION RECORD

Authorized Inspectors:

Site Location:

Inspection Date:

Inspection Time:

Inspector's Initials:

Site Status:

COMPANY NAME:

INSPECTION ELEMENTS:

1. Check all drums for leaks/tanks, corrosion, bulging, etc.
2. Ensure all drums/tanks are closed and stored in secondary containment.
3. Make sure there is isle space between rows of drums.
4. Ensure ground straps available and unsealed containers of ignitables are grounded.
5. Ensure all drums/tanks are marked with the words "Petroleum Contact Water"
6. Check containment condition; clean, dry drain secure.
7. Ensure facility secured against unauthorized entry.
8. Make sure personal Protective equipment is available.
9. Check condition of loading/unloading area
10. Check site perimeter: vegetation trimmed and no signs of leakage (dead vegetation or discolored soil).
11. Check for spill control supplies
12. Make sure fire extinguishers are full and sealed.
13. Check operation of emergency equipment (phone, alarm, water supply)
14. Make sure drums of used oil are in designated areas.
15. Make sure Contingency Plan emergency phone numbers are posted.

THIS FORM IS TO BE USED TO INSPECT PCW CONTAINERS OR TANKS THAT ARE NOT REQUIRED TO BE REGISTERED UNDER F.A.C. 62-761 or 62-762.

REMARKS (Date corrective action taken, sump drainage and other observations):

NOTE: Inspections must be conducted at least every 7 days. Facility must maintain a record of each inspection for 3 years
