**Re: Hazardous Waste Lead Contaminated Soil Removal
Trail Ridge Landfill
Facility Permit No. 0013493-017-SO
WACS Facility Identification No.: 33628
Duval County - Solid Waste**

Dear Ms. Clem:

The Florida Department of Environmental Protection (DEP) Northeast District Solid Waste staff has finished reviewing the January 26, 2011, email containing the following files:

- 1.01-12-2011 Update on TRLF Incident.pdf
- 2.J31438-1 FL_L2E Final Report.pdf
- 3.J31517-1 FL_L2E Final Report.pdf
- 4.J31539-1 FL_L2E Final Report.pdf
- 5.J31656-1 FL_L2E Final Report.pdf

DEP finds that the submitted information sufficiently indicates that all unacceptable mixed hazardous waste/contaminated soil has been adequately removed from the contaminated soil stockpile area of the Trail Ridge Landfill. DEP further finds that the post-removal confirmatory samples verify that both areas A and B on the attached figure are once again suitable to begin receiving, stockpiling, and using contaminated soil in accordance with the specifications set forth in Permit Specific Condition 22.

With regard to the Trail Ridge Landfill contaminated soil stockpile area no additional action is require.

If you have any questions or comments concerning this matter, please contact Brian Durden at the letterhead address or at telephone number 904.256.1575.

Sincerely,

Brian Durden
Northeast District Solid Waste Section
