Closure Cost Estimate

Dear Mr. Reisig:

The Department hereby approves the closure cost estimate, dated January 27, 2011, certified by Clinton Howerton, Jr, P.E. on February 1, 2011, and received February 3, 2011 for the subject facility, and a copy of the approved estimate is enclosed for your records. Please submit the financial assurance documents (Escrow Account Audit Report, etc.) corresponding to the approved estimates to:

Solid Waste Financial Coordinator
Attention: Tor Bejnar
Florida Department of Environmental Protection
2600 Blair Stone Road, Mail Station 4565
Tallahassee, Florida 32399-2400

The next closure and long-term care cost estimates or inflation adjustment statement, as applicable, will be due between January 1 and March 1, 2012.

Should you need further information, please call Albert D. McLaurin at (863) 314-5975, extension 101. Your cooperation in this matter is appreciated.

Sincerely,

Charles Emery III
Environmental Administrator

Closure Cost Estimate
for
Florida Tire Terminal Facility
400 Feagin St.
Avon Park, FL 33825
Revised on Jan 17, 2011

If a closing should have to occur at the Florida Tire Terminal facility in Avon Park, FL, the following costs would apply. Florida Tire Terminal has a letter from Emanuel Tire Company (attached) stating the cost to load and remove all tires is \$110.00/ ton.

The actual waste tire quantities on hand and the weights associated with each category are the results of an inventory taken on 1/05/10 in cooperation with Polston Engineering. These figures indicate the maximum capacities of the various tire storage cells that are indicated on the Facility Plan.

Passenger Tires- 34 units at 25 lbs/unit=850lbs which is equivalent to .425 Tons.

Light Truck Tires- 1106 units at 35 lbs/unit =38,710 lbs which is equivalent to 19.36Tons.

Truck Tires- 1910 units at 120 lbs/unit = 229,200 lbs which is equivalent to tons 114.60 Tons

Large Truck Tires- 1756 units at 150 lbs/unit=263,400 lbs which is equivalent to 131.70 Tons.

The total of waste tires equals 266.10 tons.

The following calculation applies.

266.10 tons of waste tires x \$110.00 = \$29,271.00

The 266.10 tons represents 4806 total units, which is well below the maximum 15,000 maximum units that are agreed to in the alternative procedures plan but maximum capacities will vary by the size of the tires inventoried.

This figure of \$29,271.00 represents the total closing cost using 110.00 as the per ton cost to remove the tires.

Dear Mr. McLaurin,

The purpose of this letter is to introduce myself. I am the Manager of Florida Tire Terminal of Avon Park, Fl. We have been in business since 1985 and I believe that we provide a valuable service to the recycling industry in the State of Florida and beyond. We provide tire removal services to many City, County, State and Federal entities. This service also provides FTT with an abundant quantity of used tires which we in turn sell to the public thereby lowering their tire costs.

The FTT 2011 Closing Costs Estimate is included with this letter. Please review and make any recommendations to my e-mail address.

Subject: Facility Clean Up

Dear Mr. Reisig:

Should a total facility clean up is ever needed at the Florida address listed above, the cost would be as follows: Emanuel Tire Company would provide loading and unloading of all remaining tires. These tires would be transported and shredded at a state licensed facility at a cost of \$110.00 per ton.

I thank you for the opportunity to quote your business and should you have any further questions or concerns, please feel free to contact me at the above phone number.

Sincerely,

Norman Emanuel, Owner
