Temple Terrace, FL 33637-0926

RE: Response to December 30, 2010 FDEP Site Inspection (Received via email March 28, 2011)
Enterprise Class III Landfill
WACS No.: 87895

Dear Ms. Gaskin:

We reviewed the referenced inspection report and provide this letter in response to selected items and/or concerns. The format of this letter response is to list the applicable portion of the Department's observation with our response immediately following.

1. Question Number: 2.19

Rule: 62-701.500(7)(f), F.A.C.

Explanation: During this inspection an area of exposed waste was observed on the NW corner and along the Northern slope of the active lift in Cell 3.

Corrective Action: Please repair the cover in this area and continue to monitor it to ensure that no waste is exposed. Specific Condition C.11.(c) & Operations Plan Section 8.

Response: Rule 62-701.500(7)(f), F.A.C. requires that an intermediate cover in addition to the six-inch initial cover be applied and maintained within seven days of cell completion if additional solid waste will not be deposited within 180 days of cell completion. The referenced area and the landfill cell have not been completed and are not at final grade. However, maintenance of this area was undertaken on December 30, 2010 in accordance with the requirement of Rule 62-701.500(7)(e), F.A.C. Test holes were dug (see pictures below) to verify that at least 6-inches of initial cover had been placed in this area. It is possible that in this area some materials were tracked-up by the equipment and/or were caught up in the placement of the initial cover. Nevertheless, the area has been maintained in accordance with the provisions of the Operation Plan and applicable rules and we will continue to monitor the initial cover and perform maintenance activities.

Please let me know if you have any questions or if you need any additional information.

Sincerely,

John Arnold, P.E.
