**RE: American Cement Company, LLC
Waste Tire Facility, WACS No. 98523
Audit 3-28-2011, Request for Information**

In your report from the Waste Tire Facility Audit at American Cement Company, LLC, WACS No. 98523 performed on March 28, 2011 you requested information about material stored north of the cement plant.

The materials stockpiled north of the plant are soil and coal fines, and Spanish gypsum rock. Both of these materials are used in the cement manufacturing process. The storage area was constructed with a clay base and a berm around the entire area.

The materials are stored to eliminate any prospect of contamination to the environment.

If you have any questions call me at 352-569-2217.

Sincerely,

AMERICAN CEMENT COMPANY, LLC
