Inspection Report Transmittal

Dear Mr. Esteves:

On February 07, 2012, a representative of the Florida Department of Environmental Protection conducted an inspection at the above referenced facility to determine the status of compliance with the Department's solid waste regulations. A copy of the inspection report is attached for your review.

At the time of the inspection a substantial quantity of cardboard was stored on site. According to "Appendix H -Materials Disposition" of the Operational Plan, included in the December 15, 2010 permit application, the maximum storage volume for cardboard at the site should be 1500 cubic yards. We understand that the appropriate facility to which the baled cardboard is shipped to is closed for business until March 2012. Please ensure that the quantity of cardboard is reduced to the permitted storage volume as soon as possible.

Please contact me by telephone at (407) 897-4312 or by e-mail at Gloria.Depradine@dep.state.fl.us, or contact Carolin Heaviside at (407) 897-4327 or by e-mail at Carolin.Heaviside@dep.state.fl.us if you have any questions or need additional information.

Sincerely,

Gloria-Jean DePradine

Recycling Operation for Cardboard: At the time of the inspection the cardboard recycling compactor equipment was operational, thus the cardboard in bays 1 and 2 were reduced significantly since the last inspection. However, large amounts of the processed cardboard/bales of cardboard, were stacked four layers tall in height as shown in the pictures below located at the

front portion of the site. Mr. Esteves mentioned that the cardboard mills are not accepting cardboard at this time but are due to reopen for business in March 2012.

Also, the equipment that processes the wood pallets, the chipper, was not operational at the time of the inspection but was due for repairs this month.

There was also an accumulated amount of processed plastics that were baled to the back of the transfer station building. Mr. Esteves said the baled plastics in this location were due to be removed off site the week of the inspection.

The inspector also observed a small amount of scrap metal recovered at the site during the inspection. Also, all waste tires were stored in containers.
