Re: Landfill Gas - Citrus County Landfill

Dear Mr. Moore:

Permit S009-111795

Please keep the Department updated on the progress to remediate the gas problems at the Citrus County Landfill. A review of your December 16, 1992 letter indicates your intention to study gas migration from the 7-acre cell and install an interceptor trench. Consideration should be given to gas migrating from the unlined disposal areas. Sandy seams encountered during trench excavations 30 to 40 feet below grade may be carrying gas. Plans for permanent corrective measures shall be signed and sealed by a professional engineer, and submitted to this office for review. If you have any questions you may call me at (813) 744-6100, extension 382.

Sincerely,

Kim B. Ford, P.E.
Solid Waste Section
Division of Waste Management
