Re: Construction Permit - Hardee County Sanitary Landfill

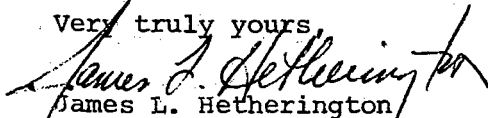

Dear Mr. Snipes:

Pursuant to your telephone call to Mr. Doug Darden, Envisors, informing him that the subject permit has now expired, we request that the construction permit be extended until November 30, 1984.

At present, a representative from Seaburn and Robertson and myself are scheduled to meet with Mr. Putzier of DER on Friday, August 24, 1984 in Tampa, to discuss an application for an operating permit. This will include completing a groundwater monitoring plan which will probably require construction activity including installing additional monitoring wells. We expect to be assisted in the hydrology work by Seaburn and Robertson.

We have been delayed several months in closing out the construction phase of this project because it was believed Envisors' original scope of work during the landfill construction covered a part of the work required for the monitoring plan. This has finally been resolved and we are ready to commence work necessary to apply for the operating permit.

Very truly yours,

  
James L. Hetherington  
Acting County Administrator
