Re: J.E.D. Solid Waste Management Facility
Initial Water Quality Monitoring Event
Monitoring Wells MW-22R (A, B and C)
Omni Waste of Osceola County, LLC
1501 Omni Way
St. Cloud, FL
WACS Facility ID 89544

Dear Mr. Lubozynski:

Submitted herewith is the subject report documenting the results of the initial water quality monitoring event for replacement well cluster MW-22R (A, B and C) at the J.E.D. Facility. This report is being submitted as required for compliance with the conditions contained within the Monitoring Plan Implementation Schedule (MPIS) for the Permit (current permit number SO49-0199726-022 issued July 12, 2012) and the requirements as described in paragraph 62-701.510(6)(b)1 of the Florida Administrative Code (FAC). Please note that analytical results for the initial sampling event were received by WSI on April 3, 2012 and per the MPIS were due 60 days after; however, due to errors in the laboratory ADaPT electronic data deliverable (EDD) there was a delay in receipt of the ADaPT files. The analytical laboratory worked with the FDEP Tallahassee office to resolve the issue. The ADaPT laboratory EDD files were received by WSI on July 9, 2012.

As noted in the MPIS, two electronic copies of the initial water quality report are being submitted to FDEP. Each electronic copy contains a pdf of the entire water quality report and the required ADaPT compatible EDD saved on a compact disk (CD). One CD is attached to this transmittal letter. The second CD containing an electronic copy of this report, including the EDD compatible with the ADaPT software has been sent to the attention of Mr. Clark Moore in Tallahassee, Florida.
