Re: Manatee County Solid Waste Management Facility  
Waste Quantity Report

Dear Mr. Lee:

Enclosed is the waste quantity report for the period January through June 1998. Data derived from scale records were used to prepare the report. This data is included for your review.

Because fuel (recycled material) tonnages for April, May and June were not entered into the scale record, I have include the raw data. This data was provided by our contracted vendor. These tonnages will appear on the 1998 July scale record. For fuel not weighed, a conversion factor of 750lbs/cy was used. If you have any questions or need additional information, please contact me at (941) 748-5543, Extension 5444.

Sincerely,

Benjamin L. Alex  
Solid Waste Technical Coordinator

Gwen;

Here are the numbers you've requested.

The product '1111' loads are not weighed consistently, so we use an average tonnage of 21.5 tons.

On yardage loads, we convert yards to tons by multiplying by 38.

This number is arrived at by an average weight of 750 pound per yard, divided by 2000 pounds

If you have any questions, just give me a call.

Regards: *Chuck*
