RE: Volusia County - Tomoka Farms Road Landfill
Request to Replace Vertical Extraction Well EW-22 and EW-23

Facility ID: 1270117, Permit No. 1270117-005-AV

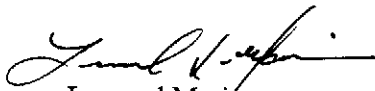

Dear Ms. Shine:

Volusia County is submitting this notification to the Florida Department of Environmental Protection (FDEP) to request permission to replace vertical gas extraction well EW-22 and EW-23 and replace each with EW-22A and EW-23A, respectively, at the Tomoka Farms Road Landfill (Landfill). Existing wells EW-22 and EW-23 have been raised up several times with solid HDPE pipe as waste has been placed around the well. Wells EW-22 and EW-23, located on the top deck of the north cell, will be replaced with EW-22A and EW-23A respectively and will be located in the general vicinity of their replacement wells. Both these wells have been in compliance with NSPS, but we feel gas extraction could be greatly improved with this construction event.

A full account of construction activities will be submitted to FDEP in the construction certification report.

If you should have any questions regarding this gas collection system expansion please do not hesitate to contact me at (386) 943-7889 or Cliff Koenig (HDR Engineering, Inc.) at (904) 598-8931.

Sincerely,
Volusia County and HDR Engineering, Inc.
