Subject: Construction Completion Report
Sinkhole Remediation Stage 5 – Isolation of Impacted Clay Liner
Hillsborough County, Southeast County Landfill

Dear Richard,

On behalf of the Hillsborough County Public Works Department, Solid Waste Management Division (SWMD), HDR Engineering, Inc. (HDR) encloses one bound original and one electronic copy of the Construction Completion Report (Report) for the Sinkhole Remediation Stage 5 – Isolation of Impacted Clay Liner (Stage 5) at the Southeast County Landfill. As stated in the Report, HDR served as the Engineer of Record and provided on-site Construction Quality Assurance (CQA) services during the construction of the project as a representative of the SWMD.

Construction of Stage 5 began on December 12, 2013 and final completion was achieved on July 19, 2014. Stage 5 was the final stage of the Sinkhole Remediation Plan developed by the SWMD and HDR dated December 22, 2010. As indicated in the enclosed Report, Stage 5 successfully completed the remediation of the sinkhole.

Please call me if you require any clarifications or additional information.

Sincerely,
HDR Engineering, Inc.

Robert B. Curtis, P.E.
Senior Project Engineer
