**Subject:** RE: Questions regarding West Pasco Waste Reports

I have called into our Fire Marshal to schedule an inspection of the tire storage area. The operation plan list the types of equipment that we have in the event of a fire which include;

- 3000 gallon water truck with cannon sprayers
- 6" non-potable water line with camlock connection @ 75psi
- 6000 gallon tanker truck to fill Emergency Responding equipment
- 3 - 7 yard front end loaders
- 2 bull Dozier's, D-6 & D-8
- Tires are stored on lime rock and appropriate setbacks as required by our Fire Department.

I will follow up on the inspection and let you know when we have a time and date of the inspection. Once the inspection is completed and we have an inspection report we will send a copy to you attention.

Sincerely,

*John Power*

John,

I hope your morning is going well. When you get back to me with the fire safety inspection as it relates to the waste tire permit, can you also let me know what fire-fighting capability and considerations are taken for the landfill in general? I am referring to Rule 62-701.500(11)(e), Florida Administrative Code (F.A.C.), which simply requires adequate fire-fighting capability for controlling accidental burning of solid waste in the landfill. Fire protection can include procedures for notification of local fire agencies, as well as fire extinguishers in operators' trucks and/or throughout the facility that are inspected periodically by the Fire Marshal so that they are current and working.

For the above info request, you don't have to send me a formal report, just an e-mail letting me what measures are taken on-site.

Thanks again,  
Amaury

Hi John,

Thanks for getting back to me earlier today. I just wanted to double-check with you regarding the annual waste tire permit fire inspection. I also e-mailed Viet earlier today regarding the WTE annual fire safety inspection as well.

Thanks,  
Amaury

**Subject:** Questions regarding West Pasco Waste Reports

Hi John,

I hope you are well. It was good meeting you earlier this year at the Pasco County Resource Recovery Facility and West Pasco Landfill.

When you have a moment, I am missing the following reports:

- (1.) Water quality monitoring plan evaluation due March 31, 2015 **I believe someone else does this. . . .**
- (2.) Q1 2015 Waste tire report **I am sitting here working on this right now – yes, it is late –**
- (3.) Q1 2015 Waste quantity reports **I have just finished this, and was debating whether to bother sending it this quarter (which I usually do) because they are only required**

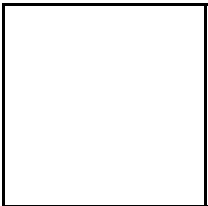

annually since 2010. Last quarter when I submitted it, I got an email from DEP reminding me that they are only due annually.

- (4.) Revised cost estimates and proof of funding for Class III (Due March 1 for Class III, but not due until September for Class I). **This must be a mistake!** I have no awareness of Class III changing to due as of March 1<sup>st</sup>. As a matter of fact, I have the approval letter from last year which states that it is due as of September 1<sup>st</sup> as usual.

Thanks,  
Amaury
