**COMMENTS:**

I arrived onsite to conduct an inspection. The site has a permit to use tires, tire fluff, biomass, and contaminated soil as a fuel source. The site stopped using contaminated soil several months ago but continues to use tires, tire fluff, and bio mass. At the time of inspection there was 250 cubic yards of bio mass, 4 trailers of tires, and 60 cubic yards of tire fluff. All material was properly stored. The biomass was stored in the building that use to store the contaminated soil. I did not observe any issues.
