Assumptions and Notes:

1. Assumed future projected waste received increased by 2% per year. Actual volumes are subject to market and business conditions.
2. Estimated future projected waste received converted to in-place volumes using an average industry standard in-place waste density of 1,600 lbs/cy.
3. Aerial topo survey and fill volume check completed by Bullseye Design Services and Base Mapping on May 20, 2015. Airspace consumed as of May 20, 2015 equals 15,829,960 cubic yards.
