NOTICE OF PERMIT MODIFICATION

By-Email

casey.stephens@bocc.citrus.fl.us

In the Matter of an
Application for Permit by:
Citrus County Board of County Commissioners
110 North Apopka Avenue
Inverness, Florida 34450

Citrus County
WACS # 39859
Citrus County Central
Class I Landfill Facility
DEP File No: 21375-018-SO/01

Attention: Casey Stephens

Pursuant to Sections 403.061(14) and 403.707, Florida Statutes, the Department hereby issues modification number 21375-024-SO/MM. The following conditions of permit number 21375-018-SO/01 are modified as follows:

SPECIFIC CONDITIONS	FROM	TO	TYPE OF MODIFICATION
Page 1 of 29	Existing	Amended	Reference to Permit Mod. No. 21375-024-SO/MM added.
#E.9.a	Existing	Amended	Deletes references to Rules 62-520.420 and 62.520.400.
#E.9.a.2	Existing	Amended	Removes regulatory levels for leachate effluent.
#E.10	Existing	Amended	Modifies reporting requirements leachate sampling.

Attached is Permit Number 21375-018-SO/01 as modified by this Order. The attached permit replaces all previous permits and permit modifications for this facility.

A person whose substantial interests are affected by this modification of permit may petition for an administrative proceeding (hearing) under Sections 120.569 and 120.57, F.S. The petition must contain the information set forth below and must be filed (received) in the Office of General Counsel of the Department at 3900 Commonwealth Boulevard, Mail Station 35, Tallahassee, Florida 32399-3000.

Petitions by the applicant or any of the parties listed below must be filed within fourteen days of receipt of this written notice. Petitions filed by other persons must be filed within fourteen days of publication of the notice or receipt of the written notice, whichever occurs first. Under Section 120.60(3), F.S., however, any person who asked the Department for notice of agency action may file a petition within fourteen days of receipt of such notice, regardless of the date of publication. The petitioner shall mail a copy of the petition to the applicant at the address indicated above at the time of filing. The failure of any person to file a petition within the appropriate time period shall constitute a waiver of that person's right to request an administrative determination (hearing) under Sections 120.569 and 120.57, F.S., or to intervene in this proceeding and participate as a party to it. Any

subsequent intervention (in a proceeding initiated by another party) will be only at the discretion of the presiding officer upon the filing of a motion in compliance with Rule 28-106.205, F.A.C.

A petition that disputes the material facts on which the Department's action is based must contain the following information:

(a) The name, address, and telephone number of each petitioner, the applicant's name and address, the Department File Number and the county in which the project is proposed;

(b) A statement of how and when each petitioner received notice of the Department's action or proposed action;

(c) A statement of how each petitioner's substantial interests are or will be affected by the Department's action or proposed action;

(d) A statement of all material facts disputed by petitioner or a statement that there are no disputed facts;

(e) A statement of the ultimate facts alleged, including a statement of the specific facts which the petitioner contends warrant reversal or modification of the Department's action or proposed action;

(f) A statement of the specific rules or statutes the petitioner contends require reversal or modification of the Department's action or proposed action; and

(g) A statement of the relief sought by the petitioner, stating precisely the action the petitioner wants the Department to take with respect to the Department's action or proposed action.

A petition that does not dispute the material facts on which the Department's action is based shall state that no such facts are in dispute and otherwise shall contain the same information as set forth above, as required by Rule 28-106.301, F.A.C.

Because the administrative hearing process is designed to formulate final agency action, the filing of a petition means that the Department's final action may be different from the position taken by it in this notice. Persons whose substantial interests will be affected by any such final decision of the Department have the right to petition to become a party to the proceeding, in accordance with the requirements set forth above. In accordance with Section 120.573, F.S., the Department advises that mediation is not available in this case under the provisions of that statute. This does not prevent any interested parties from agreeing to other forms of alternate dispute resolution.

Any party to this order has the right to seek judicial review of it under Section 120.68, F.S., by filing a notice of appeal under Rule 9.110, Florida Rules of Appellate Procedure, with the clerk of the Department in the Office of General Counsel, Mail Station 35, 3900 Commonwealth Boulevard, Tallahassee, Florida 32399-3000, and by filing a copy of the notice of appeal accompanied by the applicable filing fees with the appropriate district court of appeal. The notice of appeal must be filed within thirty days after this order is filed with the clerk of the Department.

Executed in Leon County, Florida.

PERMIT/CERTIFICATION

WACS ID No:SWD/09/39859
Permit No: **21375-018-SO/01**
Date of Issue: **10/20/2010**
Expiration Date: **12/20/2015**
County: Citrus
Lat/Long: 28° 51' 07"
82° 26' 12"
Sec/Town/Rge: 1/19S/18E
Project: Citrus County Central
Class I Landfill

This permit is issued under the provisions of Chapter 403, Florida Statutes, and Florida Administrative Code Rule(s) 62-4, 62-302, 62-330, 62-520, 62-522, and 62-701. The above named permittee is hereby authorized to perform the work or operate the facility shown on the application and approved drawing(s), plans and other documents, attached hereto or referenced in [Specific Condition #A.2.](#), and made a part hereof and specifically described as follows:

To **operate** a Class I landfill with leachate storage and treatment, and related facilities (approx. 80.0 acres), and to provide long-term care, monitoring, and maintenance of a the closed Class I landfill (approx. 60.0 acres), referred to as the **Citrus County Central Landfill** subject to the specific and general conditions attached, located near **S.R. 44, 3 miles east of Lecanto, Citrus County, Florida**. The specific conditions attached are for the operation and maintenance of:

1. Class I Landfill, Leachate Storage and Treatment Facility
2. Closed Class I Landfill and related appurtenances
3. Gas Collection and Control System

General Information - Phase I, Cells 1, 1A, 2, & 3

Disposal acres	25.8 acres
Bottom liner design & LCS design	Phase 1 – 16.5 acres – Single, 60 mil HDPE, Primary LCS piping Phase 1A – 3.3 acres – Double, 60 mil HDPE, Primary LCS piping, Geonet LDS Phase 2 – 6 acres – Double, 60 mil HDPE, Primary LCS piping, Triplanar Geonet LDS Phase 3 – 6.8 acres – See Construction Permit #21375-013-SC/01, or its successors
Bottom elevation of cell	Phase 1A – min. +35.35 feet NGVD at sump Phase 2 – min +35.00 feet NGVD Phase 3 – min 48.00 feet NGVD, in primary sump
Final top elevation at buildout (including cover)	max. +218.1 feet NGVD (max 215 feet NGVD in Phase 1/1A) [ref. SC#A.2.a(4), Sheet 4 of 9]
Slopes	max. 3H:1V side slopes, 3-5% top slope [ref. SC#A.2.a(4), Sheet 4 of 9]
Gas Collection and Control System	See Construction Permit #21375-016-SC/08, or its successors

Replaces Permit No. 21375-018-SO/01 and modifications

Includes modification No. 21375-019-SO/MM, dated **03/15/2011**; 21375-021-SO/MM, dated **6/4/2012**; 21375-022-SO/MM, dated **6/4/2012**; 21375-023-SO/MM dated **10/21/2013**, and 21375-024-SO/MM dated **12/19/2013**.

This permit contains compliance items summarized in **Attachment 1** that shall be complied with and submitted to the Department by the dates noted. If the compliance dates are not met and submittals are not received by the Department on the dates noted, enforcement action may be initiated to assure compliance with the conditions of this permit.

GENERAL CONDITIONS:

1. The terms, conditions, requirements, limitations and restrictions set forth in this permit, are "permit conditions" and are binding and enforceable pursuant to Sections 403.141, 403.161, 403.727, or 403.861, Florida Statutes. The permittee is placed on notice that the Department will review this permit periodically and may initiate enforcement action for any violation of these conditions.
2. This permit is valid only for the specific processes and operations applied for and indicated in the approved drawings or exhibits. Any unauthorized deviation from the approved drawings, exhibits, specifications, or conditions of this permit may constitute grounds for revocation and enforcement action by the Department.
3. As provided in subsections 403.087(6) and 403.722(5), F.S., the issuance of this permit does not convey any vested rights or any exclusive privileges. Neither does it authorize any injury to public or private property or any invasion of rights, nor any infringement of federal, State, or local laws or regulations. This permit is not a waiver of or approval of any other Department permit that may be required for other aspects of the total project which are not addressed in this permit.
4. This permit conveys no title to land or water, does not constitute State recognition or acknowledgment of title, and does not constitute authority for the use of submerged lands unless herein provided and the necessary title or leasehold interests have been obtained from the State. Only the Trustees of the Internal Improvement Trust Fund may express State opinion as to title.
5. This permit does not relieve the permittee from liability for harm or injury to human health or welfare, animal, or plant life, or property caused by the construction or operation of this permitted source, or from penalties therefore; nor does it allow the permittee to cause pollution in contravention of Florida Statutes and Department rules, unless specifically authorized by an order from the Department.
6. The permittee shall properly operate and maintain the facility and systems of treatment and control (and related appurtenances) that are installed and used by the permittee to achieve compliance with the conditions of this permit, are required by Department rules. This provision includes the operation of backup or auxiliary facilities or similar systems when necessary to achieve compliance with the conditions of the permit and when required by Department rules.
7. The permittee, by accepting this permit, specifically agrees to allow authorized Department personnel, upon presentation of credentials or other documents as may be required by law and at reasonable times, access to the premises where the permitted activity is located or conducted to:
 - (a) Have access to and copy any records that must be kept under conditions of the permit;
 - (b) Inspect the facility, equipment, practices, or operations regulated or required under this permit; and
 - (c) Sample or monitor any substances or parameters at any location reasonably necessary to assure compliance with this permit or Department rules.

Reasonable time may depend on the nature of the concern being investigated.

GENERAL CONDITIONS:

8. If, for any reason, the permittee does not comply with or will be unable to comply with any condition or limitation specified in this permit, the permittee shall immediately provide the Department with the following information:
 - (a) A description of and cause of noncompliance; and
 - (b) The period of noncompliance, including dates and times; or, if not corrected, the anticipated time the noncompliance is expected to continue, and steps being taken to reduce, eliminate, and prevent recurrence of the noncompliance.

The permittee shall be responsible for any and all damages which may result and may be subject to enforcement action by the Department for penalties or for revocation of this permit.

GENERAL CONDITIONS: (Cont'd)

9. In accepting this permit, the permittee understands and agrees that all records, notes, monitoring data and other information relating to the construction or operation of this permitted source which are submitted to the Department may be used by the Department as evidence in any enforcement case involving the permitted source arising under the Florida Statutes or Department rules, except where such use is prescribed by Sections 403.111 and 403.73, F.S. Such evidence shall only be used to the extent it is consistent with the Florida Rules of Civil Procedure and appropriate evidentiary rules.
10. The permittee agrees to comply with changes in Department rules and Florida Statutes after a reasonable time for compliance; provided, however, the permittee does not waive any other rights granted by Florida Statutes or Department rules.
11. This permit is transferable only upon Department approval in accordance with Rule 62-4.120 and 62-730.300, Florida Administrative Code, as applicable. The permittee shall be liable for any non-compliance of the permitted activity until the transfer is approved by the Department.
12. This permit or a copy thereof shall be kept at the work site of the permitted activity.
13. This permit also constitutes:
- (a) Determination of Best Available Control Technology (BACT)
 - (b) Determination of Prevention of Significant Deterioration (PSD)
 - (c) Certification of compliance with State Water Quality Standards (Section 401, PL 92-500)
 - (d) Compliance with New Source Performance Standards
14. The permittee shall comply with the following:
- (a) Upon request, the permittee shall furnish all records and plans required under Department rules. During enforcement actions, the retention period for all records will be extended automatically unless otherwise stipulated by the Department.
 - (b) The permittee shall hold at the facility or other location designated by this permit records of all monitoring information (including all calibration and maintenance records and all original strip chart recordings for continuous monitoring instrumentation) required by the permit, copies of all reports required by this permit, and records of all data used to complete the application for this permit. These materials shall be retained at least three years from the date of the sample, measurement, report, or application unless otherwise specified by Department rule.
 - (c) Records of monitoring information shall include:
 - 1. the date, exact place, and time of sampling or measurements;
 - 2. the person responsible for performing the sampling or measurements;
 - 3. the dates analyses were performed;
 - 4. the person responsible for performing the analyses;
 - 5. the analytical techniques or methods used;
 - 6. the results of such analyses.
15. When requested by the Department, the permittee shall within a reasonable time furnish any information required by law which is needed to determine compliance with the permit. If the permittee becomes aware the relevant facts were not submitted or were incorrect in the permit application or in any report to the Department, such facts or information shall be corrected promptly.

SPECIFIC CONDITIONS: PART A, Solid Waste Facility General Requirements

1. **Facility Designation.** This site shall be classified as a **Class I Landfill**, and shall be operated, monitored, and maintained in accordance with all applicable requirements of Chapter 403, Florida Statutes and Chapters 62-4 and 62-701, Florida Administrative Code.

Amended 10/16/2013

2. **Permit Application Documentation.** This permit is valid for **operation** of the Phases 1, 1A, 2, and 3 of the Class I landfill and other related facilities, and long-term care, monitoring, and maintenance of the closed Class I landfill and related systems, in accordance with all applicable requirements of Department rules and in accordance with the reports, plans and information submitted by SCS Engineers (SCS), (unless otherwise noted), as follows:

a. Citrus County Class I Central Landfill Operations Permit Renewal Application, (one 3-ring binder and plan set) dated and received February 1, 2010, prepared by SCS Engineers, as revised, replaced or amended (information inserted into original*) dated and received April 21, 2010, July 12, 2010, and September 30, 2010. This information includes, but is not limited to:

- 1) "Operations Plan" (Attachment K-1) dated July 12, 2010;
- 2) "Water Quality and Leachate Monitoring Plan, Central Landfill, Citrus County, Florida," prepared by SCS Engineers, dated September 22, 2010;
- 3) "Closure Plan" (Attachment O-1);
- 4) Plan Sheets titled, Citrus County Solid Waste Management Division Central Landfill Operations Permit Renewal Drawings (9 sheets) dated February 2010 (received February 1, 2010), including revised Sheets 1, 3, 4, & 7 of 9, received April 21, 2010 (revised sheets inserted into original plan set*); and
- 5) "Emergency Incidents and Contingency Plan" (Op. Plan, Appendix B) dated March 2010.

b. Consent Agreement #05-1078, executed September 20, 2005.

c. Citrus County Central Landfill, Request for Minor Modification – Leachate Effluent Regulatory Level Change, dated and received January 20, 2011 (permit application fee received January 21, 2011), prepared by SCS Engineers, as revised, replaced or amended by information received February 18, 2011. This information includes but is not limited to:

- 1) Table 1 – Arsenic Concentrations in Leachate, Citrus County Central Landfill;
- 2) Table 2 – Arsenic Concentrations in Current Background and Compliance Monitoring Wells, Citrus County Central Landfill.

New 03/15/2011.

d. Citrus County Central Landfill, Request for Minor Modification – Phase 1/1A Leachate Riser Rehabilitation Pump, dated and received February 22, 2011, prepared by SCS Engineers.

New 03/15/2011.

e. Citrus County Central Landfill, Request for Minor Modification – Leachate Leakage Action Rate Change, dated March 21, 2012 (received March 22, 2012), prepared by SCS Engineers.

New 6/4/2012.

f. Citrus County Central Landfill, Request for Minor Modification – Leachate Force main, dated and received May 3, 2012, prepared by Burrell Engineering, Inc., as revised, replaced or amended by information received May 24, 2012 and May 31, 2012. This information includes, but is not limited to:

- 1) Operations Plan, Section 8 – Leachate Management, dated April 30, 2012 [inserted into Operations Plan referenced in SC #A.2.a.(1), above]; and
- 2) Sheets 1, 3, 40, and 41 of the plan set titled Construction Plans for Central Landfill Leachate Force Main, dated April 27, 2012 (received May 3, 2012).

* see OCULUS for un-collated submittals

SPECIFIC CONDITION, PART A Solid Waste Facility General Requirements

g. Citrus County Central Landfill, Request for Minor Modification – Leachate Effluent and Percolation Pond Monitoring, Dated and Recieved October 11, 2013. This information includes but is not limited to a letter dated October 4, 2013 (received October 7, 2013) from William Beeson, P.G. of CDM Smith, Inc. to Richard Tedder, P.E. describing the requestd modifications to the ground water sampling plan, treated leachate effluent sampling treatment plant sludge sampling and leachate treatment plant sludge.

New 10/16/2013

3. Permit Modifications.

a. Any construction or operation not previously approved as part of this permit shall require a separate Department permit unless the Department determines a permit modification to be more appropriate. Any changes to the operations at the facility may require a permit modification. Permits shall be modified in accordance with the requirements of Rule 62-4.080, F.A.C. A modification, which is reasonably expected to lead to substantially different environmental impacts, which require a detailed review, by the Department, is considered a substantial modification.

b. This permit authorizes the **operation** of the Phase 1, 1A, 2, and 3 Class I disposal facility, the leachate storage and treatment facility, the landfill gas collection and control system and related appurtenances.

c. This permit authorizes the **long-term care, monitoring, and maintenance** of the closed 60 acre Class I landfill, and related systems.

d. This permit does not authorizes the **operation** of the Phase 3 portion of the Class I landfill (including filling over Phases 1, 1A, & 2 associated with Phase 3 operation) until the provisions of [Specific Condition #C.1.b.](#) have been completed and approved by the Department.

4. **Permit Renewal. No later than October 15, 2015**, the permittee shall apply for a renewal of a permit on forms and in a manner prescribed by the Department, in order to assure conformance with all applicable Department rules. Permits shall be renewed at least every five years as required by Rule 62-4.090, F.A.C. and Rule 62-701.320(10)(b), F.A.C. In the event that the regulations governing this operation are revised, the permit renewal shall include modification of those specific operation conditions which are affected by the revision of regulations to incorporate those revisions in accordance with [Specific Condition A.8.](#) Operation permit renewal shall include, but not be limited to, an updated [Operations Plan](#) and Site Plans for sequence of filling with cross-sections of lifts, a water quality monitoring plan evaluation, and revised (not inflation-adjusted) financial assurance cost estimates.

Amended 10/16/2013

5. **Professional Certification.** Where required by Chapter 471 (P.E.) or Chapter 492 (P.G.), Florida Statutes, applicable portions of permit applications and supporting documents, which are submitted to the Department for public record, shall be signed and sealed by the professional(s) who prepared or approved them.

6. **General Conditions.** The permittee shall be aware of and operate under the "General Conditions". General Conditions are binding upon the permittee and enforceable pursuant to Chapter 403, Florida Statutes.

7. **Permit Acceptance.** By acceptance of this Permit, the permittee certifies that he/she has read and understands the obligations imposed by the Specific and General Conditions contained herein and also including date of permit expiration and renewal deadlines. It is a violation of this permit for failure to comply with all conditions and deadlines.

8. **Regulations.** Chapter 62-701, F.A.C., effective August 12, 2012, is incorporated into this permit by reference. In the event that the regulations governing this permitted operation are revised, the Department shall notify the permittee, and the permittee shall request modification of those specific conditions, which are affected by the revision of regulations to incorporate those revisions.

Amended 10/16/2013

SPECIFIC CONDITION, PART A Solid Waste Facility General Requirements (continued)

9. Prohibitions.

- a. The prohibitions of Rule 62-701.300, F.A.C., shall not be violated by the activities at this facility.
- b. In the event that surface depressions which may be indicative of sinkhole activity, or subsurface instability, are discovered onsite, or within 500 feet of the site, the Department shall be notified in accordance with [Specific Condition #C.6.b](#), below. Written notification shall be submitted **within 7 days of discovery**. The written notification shall include a description of the depression, the location and size of the depression shown on an appropriate plan sheet, and a corrective action plan, which describes the actions, necessary to prevent the unimpeded discharge of waste or leachate into ground or surface water.
- c. Waste Burning. Open burning of solid waste is prohibited except in accordance with Rule 62-701.300(3) and Chapter 62-256, F.A.C. All fires which require longer than one (1) hour to extinguish must be promptly reported to the Department in accordance with [Specific Condition #C.6.b](#), below.

SPECIFIC CONDITIONS: PART B – Construction Requirements

1. **Construction.** All significant construction activities shall be approved by the Department prior to initiating work, unless specifically authorized otherwise.

- a. Construction of the Phase 3 portion of the Class I landfill and related appurtenances is authorized by [Construction Permit 21375-013-SC/01](#), (including modifications, if any), or its successors.
- b. Construction of the leachate force and decommissioning of the on-site leachate treatment plant is authorized in accordance with the information provided in **Permit Modification 21375-022-SO/MM**. Certification of construction completion of the leachate force main shall be submitted to the Department in accordance with Specific Condition #B.2.a. and approved by the Department prior to use of the leachate force main.

2. **Certification of Construction Completion.** All information required by this Specific Condition shall be signed and sealed by a registered professional engineer or land surveyor as appropriate.

At the completion of construction, information listed below shall be provided to the Department as part of the Certification of Construction Completion.

- a. **Within sixty (60) days** after any specified construction has been completed or as otherwise specified in this permit, the following activities shall be completed and submitted by the permittee to the Department. Operation of the constructed systems, structures, equipment, etc., shall not be initiated prior to Department approval of the information required by this Specific Condition.
 - 1) The owner or operator shall submit a Certification of Construction Completion, Form 62-701.900(2), signed and sealed by the professional engineer responsible for the construction to the Department for approval, and shall arrange for Department representatives to inspect the construction in the company of the permittee, the engineer, and the facility operator.
 - 2) The owner or operator shall submit Record Drawings/Documents showing all changes (i.e. all additions, deletions, revisions to the plans previously approved by the Department including site grades and elevations). The Record Documents shall include as-built plans details and elevations (survey) as appropriate.
 - 3) The owner or operator shall submit a narrative indicating all changes in plans and the cause of the deviations, and certification by the design engineer to the Department.
 - 4) The engineer of record shall provide a report to verify conformance with the project specifications. The report including all related testing results shall be submitted to the Department along with the completion of construction documents.

SPECIFIC CONDITIONS: PART C – Operation Requirements

1. **Facility Operation Requirements.**

- a. The permittee shall operate this facility in accordance with Rule 62-701.500, F.A.C., the **Operations Drawings** [ref. SC#A.2.a.(4)], the **Operations Plan** [ref. SC#A.2.a(1)], the **Emergency Incidents and Contingency Plan** [EIC Plan] [ref. SC#A.2.a(5)], and any other applicable requirements.
 - 1) Operation of the Waste Tire Collection Center shall be in accordance with Chapters 62-701 and 62-711, F.A.C., and **Permit #126602-003-WT/02** (including modifications, if any), or its successors.
 - 2) Construction and operation of the proposed Class I transfer station, new Customer Service Area, Yard and Wood Waste Processing Facility, Household Hazardous Waste Facility, and Recycling Collection Center at the existing Citrus Central Solid Waste Management Facility site shall be in accordance with Chapters 62-701, F.A.C., and **Permit #296143-001-SO/30** (including modifications, if any), or its successors.
- b. This permit does not authorize the operation of Cell 3 until the following requirements have been completed and submitted by the permittee, and approved by the Department:
 - 1) Certification of Construction Completion requirements of **Specific Conditions #B.2., and #B.3.**, of **Construction Permit No. 21375-013-SC/01**, or its successors;
 - 2) Construction details for the proposed compliance wells MW-20 and MW-21 as required by **Specific Conditions #E.3., #E.5.b., and #E.5.d.**; the results of the “initial sampling event” conducted at constructed wells for the parameters listed in **Specific Condition #E.4.b.**, to meet the reporting requirements of **Specific Condition #E.10.a.**;
 - 3) Documentation of compliance with the financial assurance requirements of **Specific Condition #D.4.c.**
- c. This permit does not authorize waste filling in Phases 1 and 1A in accordance with the **Step 4 through 7 Fill Sequences**, as depicted on the **Sheet 5 of 9** of the **Operation Drawings** until the following requirements have been completed and submitted by the permittee, and approved by the Department:
 - 1) Completion of the Phase 1/1A Leachate Riser Rehabilitation and submittal of a final report in accordance with **Specific Condition #C.8.j.**
- d. Waste shall not be disposed (unloaded, spread, or compacted) during non-daylight hours, unless sufficient lighting is provided to adequately assess the materials and remove unacceptable wastes [ref. **Op. Plan, Sec. 5**].
- e. Leachate shall not be deposited, injected, dumped, spilled, leaked, or discharged in any manner to soils, surface water or groundwater outside the liner and leachate management systems at any time during the construction or operation of this facility.
- f. Top gradients of intermediate cover shall be designed to prevent ponding or low spots and minimize erosion. **Daily**, the owner or operator shall operate the facility, maintain grades, or utilize berms and swales, to prevent ponded water within the disposal areas.
- g. The Class I disposal area shall be operated to limit the leachate head to one foot above the liner.
- h. Site Inspections.
 - 1) The owner or operator shall inspect the site for erosion and settlement (low spots and improperly graded areas) daily on operating days. Erosion and settlement shall be repaired in accordance with **Specific Condition #C.6.**
 - 2) The owner or operator shall inspect the landfill facility for the presence of objectionable odors at the property boundary **daily on operating days**. In the event that objectionable odors are detected at the property boundary, the owner or operator shall abate the odors in accordance with **Specific Condition #C.5.**

SPECIFIC CONDITIONS: PART C – Operation Requirements (continued)

- 3) The owner or operator shall inspect the normal traffic areas of the facility for litter **daily** [ref. [Op. Plan, Sec. 7.9](#)]. The property boundaries shall be inspected for litter **at least weekly**. Litter shall be collected and disposed of in the Class I landfill, **at least once per day**, or more often as necessary. In the event that the litter control program is ineffective, the operator shall notify the Department, and implement additional litter control measures **within 30 days**.
 - i. In the event of fire, hurricane or other severe natural event, inoperable equipment, lack of qualified personnel, or stormwater control problems which allow prolonged (**greater than 72 hours**) contact of ponded water with waste, the facility shall cease disposing waste in the affected area until appropriate drainage has been restored.
 - j. *Equipment.* In the event of equipment breakdown or scheduled maintenance, the owner or operator shall ensure that sufficient reserve equipment is operating at the site within 24 hours of the occurrence [ref. [Op. Plan, Sec. 11.2](#)]. In the event that sufficient reserve equipment is not obtained within 24 hours, the permittee shall notify the Department in accordance with [Specific Condition #C.6.b.](#), below and provide a schedule for corrective actions.
 - k. Fires.
 - 1) In accordance with Rule 62-701.320(16), F.A.C., in the event of a fire which requires offsite assistance from the local fire protection authorities, the operator shall implement the procedures outlined in the facility **Operations Plan** [ref. [Op. Plan, Sec. 2.3.4](#); [EIC Plan, Sec. G.1.](#)], and shall promptly report the incident to the Department in accordance with [Specific Condition #C.6.](#), below. Trenches cut into the waste shall not be used to extinguish fires without prior Department approval.
 - 2) Hot loads that are inadvertently accepted at the facility shall be managed in accordance with the procedures in [Section 2.3.4](#) of the facility **Operations Plan**. Residue from extinguished hot loads shall be disposed of offsite as Class I waste.
 - 3) In the event of a fire within the disposal area, a temporary area, within the disposal footprint away from the affected area, will be established for waste acceptance until the fire is completely extinguished [ref. [Op. Plan, Sec. 2.3.4](#)].
 - l. Temporary Transfer Operation. In the event that the permittee elects to operate a temporary transfer station at the facility, the Department shall be notified at least 48 hours prior to operation. This notification shall specify the final disposal location for the transferred waste, and shall include a site plan (reduced size) that shows the location and configuration of the transfer station within the lined landfill area. Leachate from the temporary transfer station shall not be discharged outside the landfill liner or leachate collection system. The temporary transfer operation shall:
 - 1) be operated as described in [Section 2.3.5](#) of the **Operations Plan**;
 - 2) be operated for a maximum of 30 days. In the event that the permittee elects to operate the temporary transfer station for greater than 30 days, then a separate permit or modification of this Operation Permit may be required.
 - m. Waste streams generated by the operation or maintenance of the facility and equipment shall be managed such that any residual contaminants (such as gasoline, oil, paint, antifreeze, PCBs, etc.) shall be stored such that the residues or constituents thereof are not spilled, leaked, dumped, or otherwise discharged onto the ground or into surface or groundwaters.
2. **Operating Personnel.**
- a. A trained operator (trained in accordance with the facility Training Plan) [ref. [Op. Plan, Sec. 2.1](#)] shall be on duty at the facility whenever the facility is operating and shall be responsible for operating and maintaining the facility in an orderly, safe, and sanitary manner.
 - b. A sufficient number of trained spotters (at least one trained spotter) shall be at the tipping areas (i.e. Citizen's Service Area (CSA) and landfill working face) at all times that waste is being accepted at the facility to inspect each load

SPECIFIC CONDITIONS: PART C – Operation Requirements (continued)

of waste as it is unloaded and spread, and shall remove prohibited materials prior to processing [ref. [Op. Plan, Sec. 2.4](#)]. Training of spotters shall be in accordance with the facility Training Plan [ref. [Op. Plan, Sec. 2.1](#)].

c. A sufficient trained personnel shall be available, to adequately operate the facility in compliance with this permit and Department rules. In the event that a trained operator or spotter is not available at the site, the facility shall be closed and shall not accept waste. In the event that unacceptable wastes are not adequately removed from the waste prior to disposal, additional trained spotters shall be required.

d. The permittee shall notify the Department in writing of a change of the County's primary on-site supervisor within 7 days of the effective start date of this new responsible individual. Training documentation shall be maintained at the landfill site, and copies shall be provided to the Department upon request.

3. **Control of Access.** Access to, and use of, the facility shall be controlled as required by Rule 62-701.500(5), F.A.C. [ref. [Op. Plan, Sec. 5](#)]. Adequate access to the working face shall be provided for all weather conditions while the facility is receiving waste for disposal [ref. [Op. Plan, Sec. 2.3.3](#)].

4. **Monitoring of Waste.**

a. Wastes shall be monitored as required by Rule 62-701.500(6), F.A.C., including a load checking program and associated activities. The owner or operator shall conduct three random load checks per week at the active working face. Documentation of the three random load checks, including descriptions (type and quantity) of unacceptable wastes discovered, shall be maintained on-site, and copies provided to the Department upon request. Load checks shall document the occurrence, type of unacceptable wastes, removal and disposition of unauthorized wastes discovered in the loads [ref. [Op. Plan, Sec. 6.1](#)].

b. The permittee shall not accept hazardous waste or any hazardous substance for disposal at this site. Hazardous wastes are wastes listed in 40 CFR 261 Subpart D as hazardous or are wastes characterized in 40 CFR 261 Subpart C as hazardous. Hazardous substances are those defined in Section 403.703, Florida Statute or in any other applicable state or federal law or administrative rule. Sludges or other wastes which may be hazardous should be disposed of in accordance with Rules 62-701.300(4) and 62-701.500(6)(b), F.A.C. In the event that hazardous wastes are discovered, the Department shall be notified in accordance with [Specific Condition #C.7](#). Hazardous waste shall be managed and disposed of in accordance with the procedures in [Sections 2.4 and 6.2](#) of the **Operations Plan**.

c. The permittee shall maintain a program which prohibits the disposal of bulk industrial wastes which operating personnel reasonably believe to either be or contain hazardous waste, without first obtaining a chemical analysis of the material showing the waste to be non-hazardous. The chemical analysis of any such material so placed in the landfill, along with the customer's name and date of disposal, shall be kept on file by the operating authority on-site.

d. Sludges generated from onsite processes (e.g., stormwater or leachate collection, removal or treatment system maintenance) shall be dewatered and adequately characterized as nonhazardous prior to disposal.

5. **Control of Nuisance Conditions.**

a. The owner or operator shall control odors, vectors (mosquitoes, other insects, rodents), and fugitive particulates (dust, smoke) arising from the operation so as to protect the public health and welfare. Such control shall minimize the creation of nuisance conditions on adjoining property. Complaints confirmed by Department personnel upon site inspection, shall constitute a nuisance condition, and the permittee must take immediate corrective action to abate the nuisance.

b. The owner or operator shall inspect the site at least **daily** for the presence of offsite odors [ref. [Op. Plan, Sec. 9.5](#)]. In the event that odors are detected at or beyond the property boundary, the owner or operator shall abate the odors in accordance with [Section 9.5](#) of the **Operations Plan**.

SPECIFIC CONDITIONS: PART C – Operation Requirements (continued)

- c. In the event that the odor control measures performed at the facility, do not sufficiently abate objectionable odors offsite, **within sixty (60) days** of initial detection, the owner or operator shall submit an odor abatement plan to the Department for approval. The odor abatement plan shall include at a minimum, a description of the proposed corrective actions and a schedule for implementation [ref. [Op. Plan, Sec. 9.5](#)].
- d. Dust control activities (i.e. application of water sprays from a water tank truck) shall be implemented such that they do not cause the discharge of contact storm water or leachate from the lined disposal areas.
6. **Facility Maintenance and Repair.**
- a. The site shall be properly maintained including maintenance of access roads to disposal areas, equipment, stormwater and leachate management systems, cover systems and berms, gas monitoring system, landfill gas collection and control system, surface water monitoring system, and groundwater monitoring system. Erosion and ponded water in intermediately covered or final covered disposal areas shall be prevented. Erosion in the stormwater management system shall be minimized.
- b. In the event of damage to any portion of the landfill site facilities, unauthorized leachate discharge, failure of any portion of the landfill systems, damaged or dry groundwater monitoring wells, damage to the liner or leachate collection, removal or treatment systems, fire, explosion, the development of sinkhole(s) or other subsurface instability at the site, landfill gas exceedances in onsite structures, etc., the permittee shall **immediately (within 24 hours)** notify the Department explaining such occurrence and remedial measures to be taken, method to prevent reoccurrence, and time needed for repairs. **Written, detailed notification shall be submitted to the Department within seven (7) days following the occurrence.** Routine maintenance does not require notification but shall be noted on daily reports.
- c. In the event that any portion of the groundwater or gradient monitoring system is damaged or unable to be sampled, corrective actions shall be completed **within sixty (60) days** of the written notification specified in [Specific Condition #C.6.b.](#), unless otherwise approved by the Department. Corrective actions which include relocation or installation of new groundwater monitoring wells shall be in accordance with [Specific Condition #E.5.](#), or as otherwise approved by the Department.
- d. In the event that the stormwater or leachate management systems or liner system is damaged or is not operating effectively, corrective actions shall be implemented **within thirty (30) days** of the written notification specified in [Specific Condition #C.6.b.](#), unless otherwise approved by the Department.
- e. Intermediately covered areas, or areas which discharge to the stormwater management system, which exhibit significant erosion shall be repaired as specified below:
- 1) **Within 3 days** if the soil cover materials have eroded such that greater than 50% of the soil in that location has been eroded [ref. [Op. Plan, Sec. 7.10.3](#)], or
 - 2) **By the end of the next working day** if waste or liner is exposed.
- f. In the event that the intermediately covered side slopes exhibit chronic, "significant" erosion as defined above, a corrective action plan shall be submitted to the Department **within thirty (30) days** of written notification and request from the Department and corrective actions shall be implemented in accordance with the Department approved corrective action plan.
- g. Settlement. Areas which exhibit settlement (low spots and improperly graded areas) that may cause ponding of water shall be repaired (additional soil placed, regraded, **then seeded, sodded or mulched**) **within seven (7) days**.

SPECIFIC CONDITIONS: PART C – Operation Requirements (continued)

7. **Stormwater System Management.**

a. The site shall have a surface water management system designed, constructed, operated, and maintained to prevent surface water from running on to waste filled areas and the mixing of stormwater with leachate, and a stormwater runoff control system designed, constructed, operated, and maintained to collect and control stormwater to meet the requirements of Chapter 62-330, F.A.C., and the requirements for management and storage of surface water in accordance with Rule 62-701.500(10), F.A.C., to meet applicable standards of Chapters 62-3, 62-302, and 62-330, F.A.C. All stormwater conveyances shall be inspected at least weekly to verify adequate performance. Conveyances not performing adequately shall be repaired within three (3) working days. Documentation of all inspections and repairs shall be kept on file at the facility.

b. All stormwater conveyances shall be inspected weekly and after a significant rainfall event (greater than 2" rainfall in a 24-hr. period) to verify adequate performance. Conveyances not performing adequately shall be repaired in accordance with the procedures specified in the **Operations Plan** [ref. [Op. Plan, Sec. 10](#)]. Documentation of all inspections and repairs shall be kept on file at the facility.

c. Maintenance of the surface water management system shall be conducted in accordance with [Section 10.2](#) of the **Operations Plan**.

d. The permittee shall operate the facility, maintain grades, or utilize berms and swales, to minimize ponded water within the disposal areas [ref. [Op. Plan, Sec. 7.10](#)].

8. **Leachate Management.**

a. Leachate shall be managed in accordance with the requirements of Rule 62-701.500(8), F.A.C., [Section 8](#) of the **Operations Plan**, and other applicable Department rules.

b. The leachate storage tanks (including leachate storage, and treatment, tanks) shall be inspected as required by Rule 62-701.400(6)(c)9., F.A.C.

c. Leachate, which has accumulated in low areas within the disposal area, shall be removed **daily** for disposal.

d. Leachate Collection and Removal System (LCRS) Inspections/Maintenance.

1) **Between June 15, 2015 and September 15, 2015**, the entire leachate collection and removal system shall be water pressure cleaned and/or video inspected to verify adequate performance [ref. [Op. Plan, Sec. 8.9](#)]. Components not performing adequately shall be cleaned and/or repaired. **No later than October 15, 2015**, a *final report* summarizing the inspection results (with a copy of the inspection report) and describing the related corrective actions (repairs) if required (with photographic documentation for all repairs and a copy of the inspection videotape, if applicable) shall be submitted to the Department, to verify adequate performance of the leachate collection and removal system. The *final report* shall be signed and sealed by a professional engineer. The permittee shall retain a copy of the final report, each inspection report and any inspection videotape at the facility for reference.

2) Unless otherwise specified in this permit, the leachate collection and removal system components shall be inspected and maintained as described in [Section 8.2](#) of the **Operations Plan**.

3) The leachate level indicators in the disposal cells, leachate storage tanks and leachate treatment tanks shall be inspected **at least once each business day**, or more frequently if needed, to ensure proper operation [ref. [Op. Plan, Sec. 8.2](#)].

4) In the event that the pumps, pump stations or level sensors are not operating as designed, the Department shall be notified in accordance with [Specific Condition #C.6.b](#). Otherwise, documentation of all inspections shall be kept on file at the facility, and provided to the Department upon request.

SPECIFIC CONDITIONS: PART C – Operation Requirements (continued)

- 5) Each pump and pump station and related sensors and controller mechanisms shall be inspected on a semi-annual basis. Pump performance shall be verified and current draw recorded. Pumps showing reduced performance shall be removed for maintenance and repair, and a replacement pump installed if required for continued compliance. Documentation of all inspections shall be kept on file at the facility, and provided to the Department upon request.
- 6) Upon the discovery of any defective (obstructed, separated, deformed) portion of the leachate collection system, the disposal of waste in the affected area shall cease in the affected area until the leachate collection system performance has been restored. Construction of improvements to any part of the LCRS, including significant repairs to the leachate collection system, may require a permit modification pursuant to [Specific Condition #A.3](#). The design and related supporting documents for the construction of improvements shall be substantially equivalent to those required for new construction.
- e. Leachate Quantities.
- 1) In the event of a failure of leachate metering or pumping equipment which is not corrected **within 24 hours of detection**, the Department shall be notified, and corrective actions implemented in accordance with [Specific Condition #C.6](#).
- 2) Leachate generation reports shall be compiled monthly and submitted to the Department **quarterly, by January 15th, April 15th, July 15th and October 15th each year**. Leachate generation reports shall include the number of open, intermediate and closed acres, and the quantities of leachate collected, recirculated, treated and disposed on-site, and hauled/piped off-site to a wastewater treatment facility, and daily precipitation amounts greater than one tenth of an inch. The reports shall include quantities for the leachate collection and leakage detection systems separately [[ref. Op. Plan, Sec. 8.2](#)].
- f. Leachate Leakage Action Rates. Leakage into the leakage detection systems (LDS) in Phases 1A and 2 should not exceed 930 gpd and 600 gpd respectively (9.3 acres and 6 acres @ 100 gal/acre/day, respectively); and in Phase 3 should not exceed **100 gal/acre/day** based on EPA recommended action leakage rates published in the [Federal Register/Vol. 57 No. 19/ Wednesday January 29, 1992/Rules and Regulations](#). Exceedance of the leakage action rate indicates that deficiencies in the primary liner system may exist. In the event that the quantity of leachate that is removed from the LDS exceeds the action leakage rate, the Department shall be notified and a corrective action plan provided in accordance with [Specific Condition C.6.b](#). The approved plan of action shall be implemented within 15 days of Department approval, or in accordance with an alternate schedule approved by the Department.
Amended 6/4/2012.
- g. Leachate Tank System Operation.
- 1) In the event of damage to any portion of the leachate storage tanks systems, the permittee shall **immediately (within 24 hours)** notify the Department explaining such occurrence and remedial measures to be taken and time needed for repairs. Written detailed notification shall be submitted to the Department **within seven (7) days** following the occurrence.
- 2) The exposed exterior of the leachate storage tank containment area, truck loadout area, and other leachate tank system appurtenances shall be inspected **at least monthly** for defects, leaking and other deficiencies. The containment area and other leachate tank system appurtenances shall be inspected at least daily for leakage or other damage.
- 3) The leachate storage tank system (including leachate storage, and treatment, tanks) shall be inspected as required by Rule 62-701.400(6)(c)9., F.A.C., and in accordance with the conditions of this permit. **No later than November 1, 2012 and November 1, 2015** the interior of the tank shall be inspected. A copy of the inspection report shall be submitted to the Department **within 30 days** of the inspection. In the event that deficiencies are noted in the inspection report, **within fifteen (15) days** of the owner's receipt of the written inspection report, the owner or operator shall propose corrective measures (including a schedule for implementation) to the Department. The deficiencies shall be corrected in accordance with the schedule approved by the Department.

SPECIFIC CONDITIONS: PART C – Operation Requirements (continued)

- h. Leachate Disposal.
- 1) The primary leachate disposal method is treatment in the on-site leachate treatment plant and effluent disposal in on-site effluent ponds until the constructed leachate force main is in operation, at which time operation of the on-site leachate treatment plant shall be discontinued. On site treatment and disposal and subsequent off-site leachate transmission and disposal shall be in accordance with Section 8.5 of the **Operations Plan**.
Amended 6/4/2012.
 - 2) In the event that the on-site treatment system is unable to accept leachate for disposal, leachate shall be transported to one of several Citrus County Utilities WWTF [ref. Op. Plan, Sec. 8.2]. The landfill owner or operator shall notify the Department and shall explain the contingency measures and corrective actions which will be implemented in accordance with Specific Condition C.6.b. The contingency measures shall be implemented **within seven (7) days** of the cessation of leachate acceptance at the on-site treatment system or in accordance with an alternate schedule approved by the Department.
 - 3) Leachate shall not be discharged to the environment from leaks, spills or other unpermitted discharges from the force main piping or pumps. Trucking loading shall be operated to prevent leachate spills from discharging to the environment. In the event that the leaks, spills or other evidence of leachate discharge is observed at the facility, corrective actions shall be required to ensure that appropriate procedures and/or designs are used to prevent discharge of leachate to the environment.
- i. Leachate Recirculation.
- 1) Spray irrigation of leachate effluent from the leachate treatment facility is allowed only within the bermed working face in Phases 2 and 3 from a spray bar mounted on the rear of a tank truck in accordance with the procedures in Section 8 of the **Operations Plan**. Under no circumstance shall leachate be allowed to discharge as runoff to adjacent storm water systems or conveyance ditches. Leachate effluent shall not be sprayed during weather conditions or in quantities that may cause runoff, surface seeps, wind-blown spray, or exceedances of limits of leachate head on the liner. The spray irrigation of treated leachate effluent shall not cause ponding on landfilled areas [ref. Op. Plan, Sec 8].
 - 2) Leachate may be applied in Phase 3 once 30 ft. of waste is in place at a maximum rate of 3,552 gals/day. Once 70 ft of waste is in place in Phases 2 and 3, a maximum of 4,663 gals/day may be applied [ref. Op. Plan, Sec 8].
- j. Phase 1/1A Leachate Riser Rehabilitation.
- 1) Within 30 days of issuance of this permit, the permittee shall provide a rehabilitation completion report that includes, a narrative description of the work conducted, a video inspection of the repair, detail drawings of the rehabilitated leachate riser pipes and leachate pump system, and information demonstrating that the rehabilitated side slope riser system will adequately function to remove leachate from the Phase 1/1A leachate collection system.
 - 2) Within 30 days of Department approval of the Phase 1/1A leachate riser rehabilitation completion report, the permittee shall either submit a minor permit modification in accordance with Specific Condition #D.2.b. to revise Section 8 of the **Operations Plan** to describe the operation of the revised Phase 1/1A leachate collection system, based on the rehabilitation of the of the side slope riser system or provide written notification that no revision to the **Operations Plan** is required.
9. **Special Wastes Handling Requirements.** The design, operation, and monitoring of disposal or control of any "special wastes" shall be in accordance with the procedures in Section 2.4 of the **Operations Plan**; Rules 62-701.300(8) and 62-701.520, F.A.C.; and any other applicable Department rules, to protect the public safety, health and welfare. The special wastes shall be stored and managed such that discharge of contaminants to the environment is prevented. The special wastes shall be handled on a first-in, first-out basis. The special wastes shall be stored in a location, which does not interfere with the sequence of filling.

SPECIFIC CONDITIONS: PART C – Operation Requirements (continued)

- a. Wastes which may include residual contaminants (such as gasoline, oil, paint, antifreeze, PCBs, etc.) shall be stored and managed such that the residues or constituents thereof are not spilled, leaked, dumped, or otherwise discharged onto the soil or into surface or groundwaters.
- b. Special wastes (such as lead acid batteries, white goods, etc.), found at the working face, shall be stored in locations which do not adversely affect the sequence of filling, and shall be managed as described in [Section 2.4](#) of the **Operations Plan**.
- c. The special wastes shall be handled on a first-in, first-out basis and stored in the designated areas as identified in [Section 2.4](#) of the Operations Plan. Unless otherwise specified in this permit, special wastes shall be removed from the facility for recycling and/or disposal **within 30 days of receipt or when the designated storage area/container is full, whichever occurs first**, unless another frequency for removal is approved in writing by the Department.
- d. Asbestos. Asbestos shall be managed in accordance with [Section M.3](#) of the Engineering Report [[ref. SC#A.2.a., Eng. Report, Sec M.3](#)], Rule 62-701.520(4), F.A.C., and all other applicable federal and Department rules.
- e. Contaminated Soil. Contaminated soil (except dredge spoil) shall be disposed within the working area and shall have representative analytical results that demonstrate that the material is not hazardous and that the material has been adequately dewatered prior to delivery so that the material passes the paint filter test [[ref. SC#A.2.a., Eng. Report, Sec. M.4](#)].
- f. White Goods. White goods, which may contain chlorofluorocarbons (CFCs, such as freon), shall be stored and managed at the CSA in a manner such that the CFCs are not discharged to the atmosphere. White goods which have had the refrigerant appropriately removed shall be clearly marked.
- g. Scrap metals. Scrap metals which may include residual contaminants such as gasoline, oil, paint, antifreeze, PCBs, etc., shall be stored and managed at the CSA such that the residues or constituents thereof are not spilled, leaked, dumped, or otherwise discharged onto the soil or into surface or groundwaters. Scrap metals storage containers shall be tarped at the end of each working day and in the event of inclement weather. The maximum quantity of scrap metal which may be stored at the CSA is limited to 50 tons [[ref. EIC Plan, Appendix Three](#)].
- h. Lead acid batteries. The batteries shall be stored on two pallets at the CSA in a manner which prevents the discharge of contaminants to the environment. The maximum quantity of batteries which may be stored at the CSA is limited to 150 batteries (50-75 per pallet). [[ref. EIC Plan, App. Three](#)].
- i. Yard Waste. Yard waste shall be managed in accordance with the **Operations Plan**, the facility's Source-Separated Organics Processing Facility Registration, and Rule 62-701.320, F.A.C. [[ref. Op. Plan, Sec 2.4](#)]. A 50/50 mixture of mulched yard trash/land clearing debris and soil may be used for sideslope stabilization and erosion control in the Class I Landfill.
- j. Tires. Storage shall be limited to **115 tons** of tires. Tires removed from the incoming waste stream shall be managed at the facility's waste tire processing facility in accordance with Chapters 62-701 and 62-711, F.A.C., and **Permit #126602-003-WT/02** (including modifications, if any), or its successors.
- k. The household hazardous waste collection/storage ("HHW C/S") facility shall be operated in accordance with the **Hazardous Waste Facility Emergency Incidents and Contingency Plans** [[ref. EIC Plan, Appendix Five](#)], as follows [[ref. Op. Plan, Sec 2.4](#)]:
- 1) HHW received at the Citizen Convenience Center shall be identified, and then relocated for storage within the containment area of the HHW Collection/Storage Facility at the end of each collection day.
 - 2) Spillage shall be removed and properly packaged for disposal. Soils which have been contaminated by spills shall be removed and packaged for proper disposal on the same day as the spill occurred.

SPECIFIC CONDITIONS: PART C – Operation Requirements (continued)

- 3) Liquids, including contaminated rainwater, shall not be discharged outside of the containment structures.
 - 4) Latex paints shall be stored within a secondary containment area and may either be collected by a contractor or used in an approved alternate daily cover (ADC) process.
 - 5) Waste received at the HHW C/S Facility shall be stored within containment areas at all times.
 - 6) Records on the quantities of HHW collected and removed for disposal shall be compiled quarterly and maintained at the facility for Department review upon request.
- l. Used Oil & Antifreeze. Used oil and antifreeze are each placed into double-wall containers within the CSA and collected by a contractor.
- m. Citizen Service Area [CSA]: The operation of the citizen waste drop-off facility shall comply with the following procedures:
- 1) Only residential customers **and self-haul businesses** shall use the facilities, that is, no solid waste collectors or commercial haulers will be allowed usage.
 - 2) An attendant shall be at the CSA when waste is being received. Operating hours shall be posted, and fencing and gates shall be used to prevent unauthorized access when the facility is closed.
 - 3) Only roll-off containers and/or dumpsters shall be utilized for waste storage. No compactors of any type shall be used.
 - 4) All processable and non-processable solid waste, with the exception of recyclables, shall be removed from the site at least daily or when a container is full. At the close of business each day, or in the event of inclement weather, all processable and non-processable waste shall be covered with a waterproof tarp until the facility is again receiving solid waste.
 - 5) The CSA shall be inspected for unauthorized materials and household hazardous waste at least daily. Unauthorized wastes and household hazardous wastes shall be removed from the CSA daily on operating days.
 - 6) The maximum quantities of waste/materials that shall be stored in the CSA are as indicated in **Appendix Three** of the **Emergency Incidents and Contingency Plan**.
10. **Waste Handling Requirements.**
- a. Unauthorized Wastes. A sufficient number of spotters shall be utilized at the facility for removing unacceptable wastes. Unauthorized wastes shall be removed from the site for proper disposal in accordance with the **Operations Plan** [ref. Op. Plan, Sec. 2.4]. Spotting may be conducted at the working face from the equipment (i.e., not from the ground) while waste is being disposed, under the following conditions:
- 1) The heavy equipment operator is trained as an operator or spotter;
 - 2) When unauthorized waste is discovered, the heavy equipment operator shall either move the unauthorized waste away from the active area for subsequent removal and proper management by another person on the ground, or shall stop operation and notify another person on the ground or on other equipment who shall come to the active area and remove the unauthorized waste before operations are resumed; and

SPECIFIC CONDITIONS: PART C – Operation Requirements (continued)

- 3) Each load of waste must be visually inspected for unauthorized waste prior to being compacted or covered.
 - b. A trained spotter shall be at the working face, the CSA, and other special waste management areas at all times that wastes are received.
11. **Waste Covering Requirements.** All solid waste disposed of in the Class I landfill shall be covered as required by Rule 62-701.500(7), F.A.C.
- a. **Initial Cover.** Initial cover shall be applied and maintained at the end of each working day in the Class I landfill in accordance with Rule 62-701.500(7)(e), F.A.C., so as to protect the public health and welfare.
 - 1) All solid waste disposed of in the Class I landfill must be covered with at least 6 inches of compacted earth or other suitable material as approved by the Department (in writing), at the end of each working day [\[ref. Op. Plan, Sec. 2.8.2\]](#). Working areas which have received initial cover and exhibit erosion which results in exposed waste shall be repaired **by the end of the next working day**.
 - 2) A 50/50 mixture of mulched yard trash/land clearing debris and soil may be spread over initial cover for soil stabilization and erosion control [\[ref. Op. Plan, Sec 2.8.2\]](#).
 - 3). Alternate daily cover materials (ADCM) shall be approved by the Department prior to use at the facility. Tarps, ProGuard SB alternate daily cover material, ConCover, Posi-Shell and FINN Waste Cover alternate daily cover material, and 50/50 mixtures of soil/mulch are approved for use as alternate initial cover [\[ref. Op. Plan, Sec. 2.8.2\]](#). ADCM shall be utilized as described in Section 2.8.2 of the **Operations Plan**. Other Department-approved ADCM may be used as initial cover only, but shall not be used outside of bermed working face area without specific prior Department approval.
 - b. **Intermediate Cover.** Intermediate cover shall be applied and maintained in accordance with Rules 62-701.500(7)(a) and (f), F.A.C. Cover materials other than soil (unless identified herein) shall not be used for intermediate cover without prior written Department approval.
 - 1) An intermediate cover of 12 inches of compacted soil and 6 inches of mulch for erosion control and slope stabilization, in addition to the six (6) inch initial cover shall be applied within seven (7) days of cell completion if final cover or an additional lift is not to be applied within 180 days of cell completion. A 50/50 mixture of soil/mulch is approved for use as alternate intermediate cover [\[ref. Op. Plan, Sec. 2.8.2\]](#).
 - 2) Soil materials, which have been previously used for intermediate or initial cover, shall not be re-used for intermediate cover. These materials may be re-used as initial cover provided the runoff from these areas is managed as leachate.
12. **Working Face.**
- a. As required by Rule 62-701.500(7)(d), F.A.C., the permittee shall minimize the size of the working face to minimize leachate, and unnecessary use of cover material. The permittee shall maintain the working face of a cell only wide enough to efficiently accommodate the maximum quantity of vehicles discharging waste simultaneously and to minimize the exposed area [\[ref. Op. Plan, Sec. 7.4\]](#).
 - b. Interceptor berms shall be maintained around the active working area to prevent leachate runoff from the working face from entering the stormwater management system. Runoff from outside the working face area will not be considered stormwater if the flow passes over areas which have not been intermediately covered as defined by Rule 62-701.200(55), F.A.C., and stabilized to control erosion, or waste is exposed.

SPECIFIC CONDITIONS: PART C – Operation Requirements (continued)

13. **Method and Sequence of Filling.**

- a. The method and sequence of filling shall be in accordance with the **Operations Drawings** [ref. [SC#A.2.a.\(4\), Sheet 5 of 9](#)], and as described in the **Operations Plan** [ref. [Op. Plan, Sec.2.8.1](#)], or as otherwise approved in writing by the Department.
- b. Waste shall be spread in 2 ft thick layers and compacted to 1 ft thickness before applying the next layer of waste and in accordance with the method, procedures, and sequence described in the facility **Operations Plan** [ref. [Op. Plan, Sec.2.7](#)]. Slopes shall be maintained in accordance with the **Operations Drawings**.
- c. Initial Waste Placement.
 - 1) Protective sand layer placement and rain tarp removal prior to initial waste placement shall be in accordance with the procedures in [Section 2.9.1](#) of the **Operations Plan**.
 - 2) No disposal vehicles shall be operated directly on the liner protective layer. During the initial placement of waste in each cell, soil platforms or similar protective measures shall be placed adjacent to the working face to keep vehicles off the liner protective cover.
 - 3) The first lift of waste shall be a minimum of four (4) feet in compacted thickness and consist of selected wastes containing no large rigid objects that may damage the liner or leachate collection system and shall be conducted in accordance with the procedures in [Section 2.8.1](#) of the **Operations Plan**. At least 7 days prior to the initiation of waste placement in each cell, the Department shall be notified in order to allow Department observation of the select waste type and placement.
- d. The permittee shall clearly stake/mark the location of the edge of the liner and maintain the locations as the landfill increases in elevation.
- e. The owner or operator shall conduct a topographic survey of, and shall estimate the remaining disposal capacity and site life of each disposal area as required by Rule 62-701.500(13)(c), F.A.C. **Annually, no later than January 15th each year**, a copy of this survey, supporting capacity calculations, signed and sealed by a registered professional engineer and/or licensed professional land surveyor as appropriate shall be submitted to the Department. The survey shall demonstrate that the above-grade sideslopes are no greater than the design slopes, that the top elevation does not exceed design elevation, and that all other design features and related improvements conform to the Department-approved permit drawings. The capacity estimate shall include updated design life calculations.

SPECIFIC CONDITIONS: PART D – Recordkeeping

1. **Report Submittals.**

- a. Unless specified otherwise in this permit, all submittals, notifications, or requests for permit modification shall be provided to the Southwest District Solid Waste Section, 13051 North Telecom Parkway, Temple Terrace, Florida 33637-0926.

2. **Operation Plan and Operating Record.**

- a. Each landfill owner or operator shall have an operational plan which meets the requirements of Rule 62-701.500(2), F.A.C. A copy of the Department approved permit, operational plan, construction reports and record drawings, and supporting information shall be kept at the facility at all times for reference and inspections. Operating records as required by Rule 62-701.500(3), F.A.C., are part of the operations plan, and shall also be maintained at the site.
- b. Proposed changes to the current Department-approved **Operations Plan** shall be submitted in writing to the Department for review and may require a permit modification in accordance with [Specific Condition #A.3](#). The **Operations Plan** shall be updated as operations change and for renewal of the permit. Revised pages shall be provided as replacement pages with revisions noted (deletions may be struckthrough (~~struckthrough~~) and additions may be underlined (underlined) or a similar method may be used) and each page numbered with the document title and date of revision.

SPECIFIC CONDITIONS: PART D – Recordkeeping (continued)

3. **Waste Records.**

a. Waste records shall be maintained as required by Rule 62-701.500(4), F.A.C. The owner or operator of the facility shall weigh each load of waste as it is received (with scales at the facility) and record, in tons per day, the amount of waste debris and material received. This information shall be compiled **monthly** and submitted to the Department (Solid Waste Section, Department of Environmental Protection, 2600 Blair Stone Road, M.S. 4565, Tallahassee, Florida 32399-2400) **quarterly, by January 15th, April 15th, July 15th and October 15th of each year**. In the event that the scales become inoperable, waste may be received for disposal for a maximum time period of 24 hours or as otherwise approved by the Department, until normal operations resume.

b. The following reports, documents and other information shall be kept at the facility for reference, and copies shall be provided to the Department upon request:

- 1) Waste quantity reports required by Rule 62-701.500(4), F.A.C.
- 2) A log of the facility operator's daily and weekly inspections, and any subsequent corrective actions;
- 3) Load checking records;
- 4) A list of incidents of disposal of contaminated soil or other industrial wastes or sludges. This list should include the generator's name and address, and a description of the waste disposed; and
- 5) Operator and spotter training certificates and other documentation;
- 6) Log of odor complaints and corrective action;
- 7) Records as described in Rule 62-701.500(13). These records shall include all certifications for construction completion;
- 8) Documentation of incidents reported pursuant to Specific Condition C.6.; and
- 9) Water quality and gas monitoring reports.
- 10) Gas collection and control system monitoring records [[ref. Op. Plan, Sec.2.9.1.3](#)].

4. **Financial Assurance.** The permittee shall provide adequate financial assurance for this facility and related appurtenances in accordance with Rule 62-701.630, F.A.C.

a. All costs for closure shall be adjusted and submitted for approval **annually, by September 1st each year** to: Solid Waste Manager, Solid Waste Section, Department of Environmental Protection, 13051 North Telecom Parkway, Temple Terrace, Florida 33637-0926.

b. Proof that the financial mechanism has been adequately funded shall be submitted **annually** to: Financial Coordinator, Solid Waste Section, Department of Environmental Protection, 2600 Blair Stone Road, Tallahassee, Florida 32399-2400.

c. Proof of the initial funding of the financial assurance mechanism shall be submitted **no later than 60 days prior to** receipt of waste in the [Phase 3](#) portion of the landfill.

SPECIFIC CONDITIONS: PART E – Water Quality Monitoring Requirements

1. Water Quality Monitoring Quality Assurance.

a. All field work done in connection with the facility's Water Quality Monitoring Plan regarding the collection of ground water, surface water, leachate influent, leachate treatment plant effluent, and leachate treatment plant sludge samples shall be conducted in accordance with the Standard Operating Procedures (SOPs) described in DEP-SOP-001/01 (revised March 31, 2008, effective December 3, 2008) [or as replaced by successor SOPs], as referenced in Rule 62-160.210(1), F.A.C. All laboratory analyses done in connection with the facility's Water Quality Monitoring Plan shall be conducted by firms that hold certification from the Department of Health, Environmental Laboratory Certification Program under Chapter 64E-1, F.A.C., as referenced in Rule 62-160.300(1), F.A.C. The SOPs utilized and the laboratory's list of certified test methods and analytes must specifically address the types of sampling and analytical work that are required by the permit and shall be implemented by all persons performing sample collection or analysis related to this permit. Alternate field procedures and laboratory methods may be used if approved according to the requirements of Rules 62-160.220 and 62-160.330, F.A.C., respectively.

b. The field testing, sample collection and preservation, and laboratory testing, including the collection of quality control samples, shall be in accordance with methods approved by the Department in accordance with Rule 62-4.246 and Chapter 62-160, F.A.C. Approved methods published by the Department or as published in Standard Methods, A.S.T.M., or EPA methods shall be used.

2. Zone of Discharge.

a. The zone of discharge shall extend horizontally 100 feet from the limits of the landfill disposal areas or to the property boundary, whichever is less, and shall extend vertically to the first semi-confining unit within the upper Floridan aquifer.

b. The permittee shall ensure that the water quality standards for Class G-II ground water will not be exceeded at the boundary of the zone of discharge according to Rule 62-520.420(1), F.A.C., and that the ground water minimum criteria referenced in Rule 62-520.400(1), F.A.C., will not be exceeded outside the footprint of the landfill disposal areas.

3. Ground Water Monitor Well Locations. The ground water monitoring network is designed and shall be constructed in accordance with the document entitled "Water Quality and Leachate Monitoring Plan, Central Landfill, Citrus County, Florida," prepared by SCS Engineers, dated September 22, 2010 [ref. SC#A.2.a.(2)]. The ground water monitor wells are located on the figure entitled "Attachment 1, Site Plan," prepared by SCS Engineers, received September 30, 2010 (**attached**), as follow:

<u>Well #</u>	<u>Scheduling Notes</u>	<u>WACS Testsite #</u>	<u>Aquifer Monitored</u>	<u>Well Designation</u>	<u>Location</u>
MW-3	A	150	Floridan	Background	See figure
MW-7	A	179	Floridan	Background	See figure
MW-10	A	22010	Floridan	Compliance	See figure
MW-11	A	22011	Floridan	Compliance	See figure
MW-12	A	22012	Floridan	Compliance	See figure
MW-13	A	22013	Floridan	Compliance	See figure
MW-14	A	22014	Floridan	Compliance	See figure
MW-15	A	22015	Floridan	Compliance	See figure
MW-17	A	22017	Floridan	Compliance	See figure
MW-20	B, X	23691	Floridan	Compliance	See figure
MW-21	B, Y	27449	Floridan	Compliance	See figure
MW-18	A	22709	Floridan	Assessment	See figure
MW-19	A	22710	Floridan	Assessment	See figure
MW-6	A	168	Floridan	Intermediate	See figure
MW-1R	A, Z	165	Floridan	Piezometer	See figure
MW-2	A	149	Floridan	Piezometer	See figure
MW-5	A	167	Floridan	Piezometer	See figure
MW-8R	A	180	Floridan	Piezometer	See figure

SPECIFIC CONDITIONS: PART E – Water Quality Monitoring Requirements (continued)

<u>Well #</u>	<u>Scheduling Notes</u>	<u>WACS Testsite #</u>	<u>Aquifer Monitored</u>	<u>Well Designation</u>	<u>Location</u>
MW-9	A	181	Floridan	Piezometer	See figure
MW-16	A	22016	Floridan	Piezometer	See figure
MW-AA	A	169	Floridan	Piezometer	See figure
MW-B	A	65	Floridan	Piezometer	See figure
MW-E	A	171	Floridan	Piezometer	See figure
PZ-1 A	A	22711	Floridan	Piezometer	See figure
PZ-2 A	A	22712	Floridan	Piezometer	See figure

Scheduling Notes:

A = existing well/piezometer; construction details previously submitted.

B = proposed compliance wells MW-20 and MW-21 shall be installed in accordance with the construction details provided in Attachment 2 of the document entitled "Water Quality and Leachate Monitoring Plan, Central Landfill, Citrus County, Florida," prepared by SCS Engineers, dated September 22, 2010 [ref. SC#A.2.a.(2)]; a ground water "initial sampling event" shall be conducted **within 7 days of well installation and development** for the parameters referenced in [Specific Condition #E.5.c.](#)

X = documentation of well construction details prepared in accordance with [Specific Conditions #E.5.b., and #E.5.d.](#), and the results of the ground water "initial sampling event" shall be **submitted as part of the certification of the Phase 3 construction completion** [ref. SC#B.3.a.(9) of permit #21375-013-SC/01].

Y = documentation of well construction details prepared in accordance with [Specific Conditions #E.5.b., and #E.5.d.](#), and the results of the ground water "initial sampling event" shall be **submitted within 30 days of receipt of laboratory results.**

Z = the designation of existing "background well" MW-1R will change to "piezometer" upon initiation of waste disposal in the Phase 3 expansion area.

All monitor wells and piezometers are to be clearly labeled and easily visible at all times. Bollards or other devices shall be installed to protect the monitor wells located in areas of high traffic flow within the facility. The permittee shall keep all monitor wells locked to minimize unauthorized access.

4. Ground Water Sampling. The locations, parameters, and frequencies specified herein represent the minimum requirements for ground water monitoring. Additional samples, wells, and parameters may be required based upon subsequent analysis. Method Detection Limits must be reported at or below the Maximum Contaminant Levels established for the individual parameters to demonstrate compliance with the Class G-II ground water standards referenced in Rule 62-520.420(1), F.A.C., and with the ground water minimum criteria referenced in Rule 62-520.400(1), F.A.C. Ground water samples for analysis of metals may be field-filtered if the criteria listed in the Department's 1994 technical document entitled *Determining Representative Ground Water Samples, Filtered or Unfiltered* are met, and shall be limited to the monitor wells that are screened in unconsolidated sandy sediments. Otherwise, compliance with ground water standards shall be based on the analysis of unfiltered samples.

a. Ground water levels shall be measured at all active wells and piezometers listed in [Specific Condition #E.3.](#), during all sampling events described in [Specific Conditions #E.4.b., #E.4.c., and #E.4.d.](#), to a precision of 0.01 foot. The ground water surface contour maps prepared for each sampling event shall include ground water elevations (using a consistent, nationally recognized datum) calculated for each well and piezometer.

b. All active background wells (MW-3, and MW-7) and compliance wells (MW-10, MW-11, MW-12, MW-13, MW-14, MW-15, MW-17, MW-20 and MW-21) listed in [Specific Condition #E.3.](#), shall be sampled **semi-annually** (during the periods from Jan. 1 – June 30, and from July 1 – Dec. 31) for analysis of the following parameters:

<u>Field Parameters</u>	<u>Laboratory Parameters</u>	
Static water levels	Total ammonia – N	Iron
before purging	Chlorides	Mercury
Specific conductivity	Nitrate	Sodium
pH	Total dissolved solids(TDS)	
Dissolved oxygen	<u>Those parameters listed in</u>	
Temperature	<u>40 CFR, Part 258, Appendix I</u>	
Turbidity		
Colors & sheens (by obs.)		

SPECIFIC CONDITIONS: PART E - Water Quality Monitoring Requirements (continued)

Prior to the initiation of waste disposal in the Phase 3 expansion area, existing background well MW-1R shall be included in the routine, semi-annual sampling events. Following completion of the ground water "initial sampling event," proposed compliance wells MW-20 and MW-21 shall be included in subsequent routine, semi-annual sampling events.

c. Intermediate well MW-6 shall be sampled **semi-annually** (during the periods from Jan. 1 – June 30, and from July 1 – Dec. 31) for analysis of the following parameters:

<u>Field Parameters</u>	<u>Laboratory Parameters</u>
Static water levels before purging	Iron
Specific conductivity	Chloride
pH	Sodium
Dissolved oxygen	Total dissolved solids (TDS)
Temperature	Arsenic
Turbidity	Total Trihalomethanes
	Colors & sheens (by obs.)

Amended 10/16/2013

d. Assessment wells MW-18 and MW-19 shall be sampled **semi-annually** (during the periods from Jan. 1 – June 30, and from July 1 – Dec. 31) for analysis of the following parameters:

<u>Field Parameters</u>	<u>Laboratory Parameters</u>
Static water levels before purging	Benzene
Specific conductivity	Methylene chloride
pH	Vinyl chloride
Dissolved oxygen	
Temperature	
Turbidity	
Colors & sheens (by obs.)	

5. **Ground Water Monitor Well Construction.** The following information shall be submitted **within 90 days of installation of all** new or replacement wells and piezometers, or as stated below:

- a. Prior to construction of all new or replacement wells and piezometers (excluding the proposed compliance wells listed in [Specific Condition #E.3.](#)), the permittee shall request and receive Department approval of a minor permit modification in accordance with [Specific Condition #A.3.](#)
- b. Construction details (record drawings) for all new or replacement wells and piezometers shall be provided to the Department's Southwest District Office on Department Form #62-701.900(30), Monitoring Well Completion Report (**attached**).
- c. **Within one week of well completion and development**, each new or replacement well shall be sampled for the parameters listed in Rules 62-701.510(8)(a) and (8)(d), F.A.C.
- d. A surveyed drawing shall be submitted in accordance with Rule 62-701.510(3)(d)(1), F.A.C., showing the location of all monitor wells and piezometers (active and abandoned), horizontally located in degrees, minutes and seconds of latitude and longitude, and the elevation of the top of the well casing and ground surface by the well casing to the nearest 0.01 foot, using a consistent, nationally recognized datum. The surveyed drawing shall include the monitor well and piezometer identification numbers, locations and elevations of all permanent benchmarks and/or corner monument markers at the site. The survey shall be conducted by a Florida Licensed Professional Surveyor and Mapper.

6. **Well Abandonment.** All monitor wells and piezometers not a part of the approved Water Quality Monitoring Plan and not listed in [Specific Condition #E.3.](#), are to be plugged and abandoned in accordance with Rule 62-532.500(5), F.A.C., and the rules of the Southwest Florida Water Management District (SWFWMD). Documentation of abandonment shall include a map showing well/piezometer locations and SWFWMD abandonment records. The permittee shall submit a written report to the Department providing verification of the well/piezometer abandonment **within 30 days of abandonment**. A written request for exemption to the abandonment of a well must be submitted to the Department's Solid Waste Section for approval.

SPECIFIC CONDITIONS: PART E - Water Quality Monitoring Requirements (continued)

7. Verification/Evaluation Monitoring. If at any time monitoring parameters are detected in concentrations that are significantly above background water quality or that are at levels above the Department's water quality standards or minimum criteria specified in Chapter 62-520, F.A.C., in any detection well, the permittee has 30 days from receipt of the sampling results to resample the monitor well(s) to verify the original analysis. Should the permittee choose not to resample, the Department will consider the water quality analysis as representative of current ground water conditions at the facility. If the data is confirmed, or if the permittee chooses not to resample, the permittee shall notify the Department in writing within 14 days of this finding. Upon notification by the Department, the permittee shall initiate evaluation monitoring as described in Rules 62-701.510(7)(a) and 62-701.510(7)(b), F.A.C. If monitoring parameters are detected and confirmed at concentrations that exceed both background water quality and the Department's water quality standards or minimum criteria in any compliance well, the permittee shall notify the Department within 14 days of this finding and shall initiate corrective actions as described in Rule 62-701.510(7)(c), F.A.C.

8. Surface Water Sampling. All surface water bodies that may be affected by a contaminant release at the facility shall be monitored, except bodies of water contained completely within the property boundaries of the site which do not discharge from the site to surface waters (Rule 62-701.510(4), F.A.C.). It is not anticipated that the existing stormwater management system will discharge from the property. However, in the event that surface water discharge occurs from the stormwater management system, representative samples of each discharge event shall be collected for analysis of the parameters listed in Specific Condition #E.8.b. In the event that any modifications to the stormwater management system associated with future uses of the landfill result in periodic surface water discharges from the property, the Department may require the implementation of routine surface water monitoring.

a. The locations, parameters, and frequencies specified herein represent the minimum requirements for surface water monitoring. Additional samples, sampling locations and parameters may be required based upon subsequent analysis. Method Detection Limits must be reported at or below the surface water criteria established for the individual parameters in Chapter 62-302, F.A.C., to demonstrate compliance with Class III surface water (predominantly freshwater) criteria. Compliance with surface water criteria will be based on analysis of unfiltered samples.

b. Surface water sampling shall be conducted **per discharge event** in accordance with the Department's SOPs to comply with the requirements of Rules 62-701.510(4) and 62-701.510(6)(e), F.A.C. The Solid Waste Section of the Department shall be notified of the occurrence of each discharge event **within 24 hours of discovery.** Surface water samples shall be analyzed for the following parameters:

<u>Field parameters</u>	<u>Laboratory parameters</u>	
Specific conductivity	Unionized ammonia	Total organic carbon (TOC)
pH	Total hardness	Total nitrogen
Dissolved oxygen	(as mg/L CaCO ₃)	Chemical oxygen demand (COD)
Turbidity	Total phosphorus	Fecal coliform
Temperature	(as mg/L P)	Biochemical oxygen demand (BOD ₅)
Colors and sheens	Iron	Chlorophyll A
(by obs.)	Mercury	Total dissolved solids (TDS)
	Nitrate	Total suspended solids (TSS)
	<u>Those parameters listed in 40 CFR, Part 258, Appendix I</u>	

9. Leachate Sampling.

a. Leachate Treatment Plant Effluent Sampling. Grab samples of treated leachate effluent (unfiltered) shall be collected at the discharge from the chlorine contact tank (WACS Testsite #175) as shown on the figure entitled "Attachment 1, Site Plan," prepared by SCS Engineers, received September 30, 2010 (**attached**).
Amended 12/16/2013

1) Leachate effluent shall be sampled for the parameters identified and at the at the frequencies listed in Specific Condition #E.9.a.(2). The analytical results shall be submitted as specified in Specific Condition #E.10.b.
Amended 12/16/2013

2) Leachate effluent parameters and frequencies:

<u>Parameter</u>	<u>Frequency</u>
Chloride	Semi-annually*
Sodium	Semi-annually*
TDS	Semi-annually*
Arsenic	Semi-annually*
Total ammonia - N	Semi-annually*
Benzene	Semi-annually*
Toluene	Semi-annually*
Ethylbenzene	Semi-annually*
Total Xylenes	Semi-annually*
Vinyl Chloride	Semi-annually*
Total Trihalomethanes	Semi-annually*
Barium	Annually*
Cadmium	Annually*
Chromium	Annually*
Iron	Annually*
Mercury	Annually*
Lead	Annually*
Selenium	Annually*
Silver	Annually*

* = to be conducted concurrently with the semi-annual ground water sampling events described in [Specific Conditions #E.4.b., and #E.4.c.](#)

Amended 12/16/2013

10. Water Quality and Leachate Reporting Requirements. The results of each ground water, surface water, leachate influent, leachate treatment plant effluent, and leachate treatment plant sludge sampling event conducted at the Citrus Central landfill to comply with the Specific Conditions of this permit shall be included in Electronic Data Deliverable (EDD) reports that provide:

a. Required water quality and leachate (effluent) monitoring reports and all analytical results shall be submitted electronically. Water quality and leachate effluent monitoring reports shall be submitted in Adobe pdf file format. The water quality and leachate effluent monitoring EDD reports shall be provided to the Department in an electronic format consistent with requirements for importing the data into the Department's databases as summarized on the Department's web site at: <http://www.dep.state.fl.us/waste/categories/shw/pages/ADaPT.htm>. Water quality and leachate effluent monitoring reports shall be signed and sealed by a Florida registered professional geologist or professional engineer with experience in hydrogeological investigations and shall provide the information required by Rules 62-701.510(9)(a)1 through 62-701.510(9)(a)10, F.A.C., including:

1. Cover letter;
2. Summary of exceedances and recommendations;
3. Trend analysis for each parameter detected at well MW-6 during each semi-annual sampling event;
4. A discussion detailing exceedances of ground water standards detected at well MW-6 during each semi-annual sampling event;
5. A discussion of any concentrations of parameters listed in Specific Condition #E.9.a.(2) that are greater than their respective regulatory levels in the leachate effluent during each semi-annual or annual sampling event;
6. Ground water contour maps;

SPECIFIC CONDITIONS: PART E – Water Quality Monitoring Requirements (continued)

- 7. Chain of custody forms;
- 8. Water levels, water elevation table;
- 9. Ground Water Monitoring Report Certification, using Department Form #62-701.900(31);
- 10. Appropriate sampling information on Form FD 9000-24 (DEP-SOP-001/01); and,
- 11. Laboratory and Field data and error logs, as applicable. [In addition to the Adobe pdf file format, this data and associated error logs shall be submitted in an ADaPT-compatible, comma separated text file format.]

Amended 12/16/2013

The report of results shall be submitted to:

- Department of Environmental Protection, Southwest District Office, Solid Waste Section, 13051 North Telecom Parkway, Temple Terrace, FL 33637-0926; and,
- Department of Environmental Protection, Solid Waste Section 2600 Blair Stone Road, MS 4565, Tallahassee, FL 32399-2400.

b. The permittee shall submit to the Department the results of analyses reported for each sampling event conducted at the facility by the following due dates:

- 1. **Specific Conditions #E.4.b., #E.4.c., #E.4.d.** – results of ground water routine semi-annual sampling events shall be submitted **within 60 days from completion of laboratory analyses and no later than January 15th and July 15th of each year** for the periods July 1-Dec. 31, and Jan. 1-June 30, respectively;
- 2. **Specific Condition #E.5.c.** – results of ground water “initial sampling events” shall be submitted **within 30 days from completion of laboratory analyses;**
- 3. **Specific Condition #E.7.** – results of ground water verification events shall be submitted **within 60 days from completion of laboratory analyses;**
- 4. **Specific Condition #E.8.b.** – results of surface water “discharge sampling events” shall be submitted **within 60 days from completion of laboratory analyses;**
- 5. **Specific Condition #E.9.a.(2)** – results of leachate treatment plant effluent semi-annual and annual sampling events shall be submitted **within 60 days from completion of laboratory analyses and no later than January 15th and July 15th of each year** for the periods July 1-Dec. 31, and Jan. 1-June 30, respectively;

Amended 10/16/2013

11. Monitoring Plan Evaluation.

a. **By May 15, 2013 and by October 15, 2015**, the permittee shall submit an evaluation of the water quality monitoring data. The periods of time to be covered by the evaluations are summarized below:

Water Quality Monitoring Data Evaluation Due Date	Starting Sampling Event	Ending Sampling Event
May 15, 2013	First half 2010	Second half 2012
October 15, 2015	First half 2013	First half 2015

The evaluations shall include the applicable information as listed in Rule 62-701.510(9)(b), F.A.C., and shall include assessment of the effectiveness of the existing facility design and operation as related to the prevention of ground water and surface water contamination. Any contamination that may exist shall be addressed as part of evaluation monitoring conducted at the facility in accordance with Rule 62-701.510(7), F.A.C. The evaluations shall be sent to: Solid Waste Section, Department of Environmental Protection, Southwest District Office, 13051 North Telecom Parkway, Temple Terrace, Florida 33637-0926.

Amended 10/16/2013

SPECIFIC CONDITIONS: PART E – Water Quality Monitoring Requirements (continued)

b. The permittee shall implement corrective actions at the facility to address exceedances of ground water standards reported for monitor wells at the south and west property boundaries in accordance with Consent Order OGC File No. 05-1078 [ref. SC#A.2.b.]. Any proposed changes to the monitoring plan (monitoring well locations, sampling frequency or monitoring parameters) that result from the implementation of these corrective actions shall require a modification to the permit in accordance with [Specific Conditions #A.3., and #E.5.,](#) prior to the implementation of the monitoring plan changes.

SPECIFIC CONDITIONS: PART F – Landfill Gas Management

1. Landfill Gas – NSPS and Title V Air Requirements.

a. This solid waste permit will meet the statutory requirement to obtain an air construction permit before modifying or constructing a source of air pollution, except for those landfills that are subject to the prevention of significant deterioration (PSD) requirements of Chapter 62-212, F.A.C. Facilities that are subject to the PSD requirements shall obtain an air construction permit from the Bureau of Air Regulation prior to beginning construction or modification pursuant to Rule 62-210.400, F.A.C.

b. The permittee shall comply with any applicable Title V air operation permit application requirements of Chapter 62-213, F.A.C., and 40 CFR 60, Subparts WWW and Cc, as adopted by reference at Rule 62-204.800, F.A.C. Title V Permit applications shall be submitted to the District Air Program Administrator or County Air Program Administrator with air permitting authority for the landfill.

c. The permittee shall submit to the Division of Air Resources Management, Department of Environmental Protection, Mail Station 5500, 3900 Commonwealth Blvd., Tallahassee, FL 32399-3000, any amended design capacity report and any Non-Methane Organic Compound (NMOC) emission rate report, as applicable, pursuant to 40 CFR 60.757(a)(3) and (b).

2. Gas Monitoring and Control.

a. Landfills that receive biodegradable wastes shall have a gas management and control system designed to prevent explosions and fires, and to minimize off-site odors, lateral migration of gases and damage to vegetation. Landfill gas shall be monitored and controlled as required by Rule 62-701.530, F.A.C.

b. Landfill gas shall be monitored to demonstrate compliance with the criteria established in Rule 62-701.530(1)(a), F.A.C. (less than 25% of the lower explosive limit (LEL) for combustible gases in structures and less than 100% of the LEL for combustible gases at or beyond the property boundary).

c. The results of **quarterly gas monitoring** required by Rule 62-701.530(2)(c), F.A.C., conducted at the locations listed in [Specific Condition #F.3.](#), shall be submitted to the Department by the following dates:

Measured During

Quarter 1
Quarter 2
Quarter 3
Quarter 4

Report Submitted By

April 15th of each year
July 15th of each year
October 15th of each year
January 15th of each year

SPECIFIC CONDITIONS: PART F – Landfill Gas Management (continued)

3. **Gas Monitoring Locations.** The enclosed structures and gas monitoring probes shown on Figure 9-1 entitled “Landfill Gas Monitoring Probe Locations, Citrus County Central Landfill,” prepared by SCS Engineers, received April 21, 2010 (**attached**), shall be sampled at least **quarterly** for concentrations of combustible gases determined as a percent of the LEL calibrated to methane, as described in Rule 62-701.530(2), F.A.C.

<u>Monitoring Probes</u>	<u>Location Description</u>
Active Landfill (Phases 1/1A, 2, 3)	Existing GP-12, GP-13, GP-14, GP-15, GP-16, GP-17, GP-18 and GP-19
Closed 60-acre Landfill	Existing GP-1, GP-2, GP-3, GP-4, GP-5, GP-6, GP-7, GP-8, GP-9, GP-10 and GP-11
<u>Ambient Monitoring Locations</u>	<u>Location Description</u>
Scale House	Along baseboards, at cracks in concrete slab or flooring, ground-level cabinets, electrical outlets and panels
Administrative Building	Along baseboards, at cracks in concrete slab or flooring, ground-level cabinets, electrical outlets and panels
Leachate Treatment Plant	At cracks in concrete slab or flooring, ground-level cabinets, electrical outlet and panels
Gun Range	At cracks in concrete slabs, concrete slab penetrations, electrical outlets and switches

All gas monitoring probes are to be clearly labeled and easily visible at all times.

4. **Gas Remediation.**

a. If the results of gas monitoring show that combustible gas concentrations exceed 25% of the LEL calibrated to methane in structures or 100% of the LEL calibrated to methane at the property boundary, the permittee shall immediately take all necessary steps to ensure protection of human health and notify the Department. **Within 7 days** of detection, a gas remediation plan detailing the nature and extent of the problem and the proposed remedy shall be submitted to the Department for approval. The remedy shall be completed **within 60 days** of detection unless otherwise approved by the Department.

b. In the event that the remediation activities required by Consent Agreement OGC File No. 05-1078 for landfill gas migration result in additional gas monitoring locations or gas management systems, the permittee shall request a modification of this permit pursuant to [Specific Condition #A.3.](#), above, to incorporate the new systems and monitoring locations.

5. **Gas Collection and Control System.**

a. The permittee shall operate, monitor, and maintain the landfill gas collection and control system in accordance with the procedures provided in the [Operations Plan](#) [[ref. Op. Plan, Secs. 2.9.1 through 2.9.1.7; Appendices I through M](#)] and any other applicable requirements.

SPECIFIC CONDITIONS: PART G – Closure and Long-Term Care Requirements

1. **Closure Permit Requirements.** No later than **ninety (90) days** prior to the date when wastes will no longer be accepted for portions of the landfill which have reached closure design dimensions, the landfill owner or operator shall submit a closure permit application to the Department, to assure conformance with all applicable Department rules. A closure permit is required prior to implementing closure related activities.

SPECIFIC CONDITIONS: PART G – Closure and Long-Term Care Requirements (continued)

2. **Final Cover.** Portions of the landfill which have been filled with waste to the extent of designed dimensions shall be closed (shall receive final cover) within 180 days after reaching design dimensions, in accordance with Rule 62-701.500(7)(g), F.A.C., and all applicable requirements of Department rules.

3. **Long-Term Care Requirements.**

a. The permittee shall perform long-term care for the facility in accordance with Rule 62-701.620, F.A.C., and the information submitted as part of this permit application. [[ref. SC #A.2.a.](#), [Eng. Report, Section Q](#)].

b. Long-term care includes, but is not limited to, water quality, leachate and gas monitoring, maintenance of the final cover system, maintenance of the leachate collection and removal system, erosion control, and the prevention of ponding within disposal areas.

4. **Use of Closed Landfill Areas.**

a. The use of an approximately six-acre area in the southwest corner of the closed 60-acre Class I landfill has been approved by the Department, as follows:

- **Firearms Training Facility (existing)** – the Citrus County School Board, Withlatchoochee Technical Institute (WTI) operates the Criminal Justice Academy (CJA) which includes firearms training. The existing firearms training facility includes five shooting ranges (3 pistol ranges, 1 rifle range, 1 tactical range), each of which contain earthen berms on 3 sides. The CJA provides firearms training for: law enforcement, correctional and correctional probation officer basic recruits and sworn officers; firearms instructors; retired law enforcement officers; hunter safety for the general public through the Florida Fish and Wildlife Conservation Commission (FWC); tactical training for specialty teams; and to provide hunter safety training for the general public through the FWC. Shooting shall be limited into the constructed earthen berms, no skeet or trap shooting shall be allowed.

Firearms Training Facility Maintenance – areas within the firearms training facilities shall be maintained to provide adequate surface slopes for drainage to the existing storm water retention area. No penetrations of the closed landfill cover system shall be allowed without first obtaining written approval from the Department. Lead removal shall be conducted at least yearly (or more often depending on soil testing results) by a Department-licensed company for proper treatment or disposal. Documentation of soil testing locations and results, lead removal, and subsequent soil treatments to maintain neutral pH shall be maintained by the WTI and made available to the Department upon request. Soil testing and lead removal shall be performed to comply with the Department’s document entitled “Best Management Practices for Environmental Stewardship of Florida Shooting Ranges,” dated 2004, or successor document.

- **Temporary Soil Stockpile Area** – Soils temporarily stockpiled on a portion of the closed landfill area, shall be stockpiled in the area and manner shown on plan sheet titled, “Proposed Soil Stockpile Area”, and in accordance with the procedures described in the Section Q.6 of the Engineering Report received November 26, 2008, or as otherwise approved in writing by the Department.

b. Use of closed landfill areas requires consultation with and approval by the Department **prior to** conducting these activities in accordance with Rule 62-701.610(7), F.A.C. The Department retains regulatory control over any activities which may affect the integrity of the environmental protection measures such as the landfill cover, drainage, final cover materials (soil and vegetation), leachate collection system, bottom liner, monitoring systems or stormwater controls. A plan detailing the proposed activities and evaluation of the potential effects on the landfill systems (including engineering designs, calculation and plans, as appropriate) shall be submitted for Department review to comply with the requirements of the Department’s document entitled “Guidance for Disturbance and Use of Old Closed Landfills or Waste Disposal Areas in Florida, Version 2.1”, dated February 3, 2011, or successor document. Authorization to use the Citrus County Central Landfill for activities not described in [Specific Condition #G.4.a.](#), may require a modification of this permit to comply with [Specific Condition #A.3.](#)
Amended 03/15/2011.

Permit originally executed in Hillsborough County by Pamala Vazquez, Acting District Director, Southwest District, Florida Department of Environmental Protection.

ATTACHMENT 1		
Specific Condition	Submittal Due Date	Required Item
A.4	On or before June 15, 2015 No later than October 15, 2015	Notification of date of permit renewal application submittal Submit application for permit renewal
A.9.a.	Within 24 hours of discovery Within 7 days of verbal notification	Notification of sinkholes or subsurface instability Written notification & corrective action plan
B.2.a.	Within 60 days of completion	Submit certification of construction completion, record drawings, etc.
C.1.l.	At least 48 hrs prior to operation	Notification of temporary transfer operation
C.6.b.	Within 24 hours of discovery Within 7 days of verbal notification Within 60 days of written notification	Notification of: hazardous waste receipt, failure of landfill systems or equipment Written notification & corrective action plan Complete corrective actions for gradient or groundwater monitoring system
C.6.c.	Within 30 days of written notification	Implement corrective actions for leachate management system
C.6.d.		
C.8.d.(1)	No later than October 15, 2015	Submit leachate collection system assessment report, videotape, inspection results, etc.
C.8.e.(2) F.2.c.	Quarterly, by January 15 th April 15 th July 15 th October 15 th each year	Submit leachate generation reports Submit gas monitoring results
C.13.a(1)	No later than January 15, 2006	Submit permit modification for sequence of filling and stormwater management system
C.8.g.(1)	Within 24 hours of discovery Within 7 days of verbal notification	Notification of damage to leachate tank system Written notification and corrective action plan
C.8.g.(3)	No later than November 1, 2012 and November 1, 2015 Within 30 days of completion of tank inspection	Conduct inspection of interior of leachate tanks Submit written inspection report
C.8.j.	Within 30 days of permit issuance	Submit Phase 1/1A leachate riser rehabilitation report

ATTACHMENT 1 (continued)		
Specific Condition	Submittal Due Date	Required Item
C.13.e.	Annually, by January 15 th each year	Submit Topographic survey & remaining capacity calculations
D.4.a.	Annually, by September 1 st each year	Submit revised cost estimates
D.4.b.	Annually	Submit proof of funding
D.4.c.	No later than 60 days prior to waste acceptance in Phase 3	Submit proof of initial funding for Phase 3 closure
E.3.	Within 45 days of permit #21375-018-SO/01 issuance	Install proposed compliance well MW-21
E.3.	Within 30 days of receipt of ground water "initial sampling event" results	Provide documentation of well MW-21 construction and "initial sampling event" results
E.4.b.	Semi-annually	Sample background and compliance wells
E.4.c.	Semi-annually	Sample MW-6
E.4.d.	Semi-annually	Sample assessment wells
E.5.a., E.5.b., E.5.d.	Within 90 days of installation of new wells	Request permit modification, provide construction details for wells, submit survey
E.5.c.	Within 1 week of well development	Conduct ground water "initial sampling event"
E.6.	Within 30 days of abandonment	Submit documentation of abandonment
E.8.b.	Each discharge event	Conduct surface water sampling
E.10.b.	Within 60 days from completion of laboratory analyses Within 30 days from completion of laboratory analyses	Submit results of: - Ground water verification sampling - Surface water discharge sampling Submit results of: - Ground water initial sampling
E.10.b.	Semi-annually, by Jan. 15 th and July 15 th each year Semi-annually, by Jan. 15 th and July 15 th each year	Submit results of routine ground water sampling (SC#E.4.b., #E.4.c., #E.4.d.) Submit results of leachate effluent analyses (SC#E.9.a.(2), #E.9.b.(3), #E.9.c.)
E.11.	By May 15, 2013 and by October 15, 2015	Submit water quality monitoring plan evaluations
F.4.a.	Within 7 days of detection Within 60 days of detection	Submit gas remediation plan Complete corrective actions
G.1.	No later than 90 days prior to the date when wastes will no longer be received	Submit Closure Permit application
