Subject: Quarterly Monitoring Report,
Perimeter Gas Monitoring Probes – 3rd Quarter 2016
JED Solid Waste Management Facility, Osceola County, Florida
Operating Permit No. SO49-0199726-022

Dear Mr. Lubozynski:

Omni Waste of Osceola County, LLC (Omni) is submitting the attached quarterly results of perimeter gas probe monitoring performed by Mr. Jerry Lowery of SCS Field Services on September 15 & 26, 2016 for the JED Solid Waste Management Facility (facility). As shown on the attached Perimeter Gas Probe Monitoring Log, the Lower Explosive Limit (LEL) for methane was exceeded in one of the permanent perimeter gas probes, GP-24 during this monitoring period (regulatory levels listed in F.A.C. Rule 62-701.530(1)). In addition to the permanent perimeter probes, monitoring was performed at the temporary gas probes installed in the outer slope of the landfill perimeter berm. Methane was detected above the LEL in temporary probes TGP-5, TGP-7, and TGP-8.

As an update to the ongoing gas migration investigation and groundwater contamination assessment effort, Omni continued to install and operate dewatering pumps in forty two vertical gas wells and we continued work to attempt to dewater the horizontal collectors in Cells 6, 8, 9 and 10. Removal of leachate from these gas wells is assisting our efforts to improve gas collection from the LFG wells. The start-up operation of the Landfill Gas to Energy Project continued during the quarter.

Feel free to contact me at (813) 388-1026 or by email at kirk.wills@wasteconnections.com if you should have any questions.

Sincerely,

A handwritten signature in blue ink that reads "Kirk Wills".

Kirk Wills
South Region Engineer

Notes: Gas meter run time set at two minutes. Monitoring performed until reading stabilizes at reported value within the two minute period.

Office, scale and shop monitored with Sierra Gas Corporation - continuous combustible gas monitoring devices mounted in different areas of the structures. Instruments are checked for proper operation during quarterly monitoring period.
