Re: Pasco County Resource Recovery
Facility ID 45799
Pasco County

Dear Mr. Power:

Department personnel conducted a compliance inspection of the above-referenced facility on April 28, 2017. Based on the information provided during and following the inspection, the facility was determined to be in compliance. A copy of the inspection report is attached for your records. Please continue to address the action items specified in the inspection report.

The Department appreciates your efforts to maintain this facility in compliance with state and federal rules. Should you have any questions or comments, please contact Rachel Tift at (813) 470-5755, or via e-mail at: rachel.tift@dep.state.fl.us.

Sincerely,

A handwritten signature in blue ink, appearing to read "Steven Tafuni".

FACILITY INFORMATION:

Facility Name: PASCO COUNTY RESOURCE RECOVERY

On-Site Inspection Start Date: 04/28/2017

On-Site Inspection End Date: 04/28/2017

WACS No.: 45799

Facility Street Address: 14230 HAYS ROAD

City: SPRING HILL

County Name: PASCO

Zip: 34610

INSPECTION PARTICIPANTS:

(Include ALL Landfill and Department Personnel with Corresponding Titles)

Principal Inspector: Rachel D Tift, Inspector

Other Participants: Melissa Madden, Environmental Consultant; Diana Felix, Permitting; Gary Ackerman, Operator

INSPECTION TYPE:

Routine Operation Inspection for WPF - Waste To Energy Facility

Routine Operation Inspection for Landfill - Class III

Routine Operation Inspection for Landfill - WTE Ash Monofill

Routine Operation Inspection for Landfill - Class I

Routine Operation Inspection for WPF - Waste Tire Processing Facility

ATTACHMENTS TO THE INSPECTION CHECK LIST:

This Cover Page to the Inspection Checklist may include any or all of the following attachments as appropriate.

1.0 - SECTION 1.0 - FILE REVIEW

2.0 - SECTION 2.0 - LANDFILL OPERATION AND MAINTENANCE

1.0 - SECTION 1.0 - FILE REVIEW

Requirements:

The requirements listed in this section provide an opportunity for the Department's inspector to indicate the conditions found at the time of the inspection. A "Not Ok" response to a requirement indicates either a potential violation of the corresponding rule or an area of concern that requires more attention. Both potential violations and areas of concern are discussed further at the end of this inspection report.

COMMENTS:

1.5 - During the April 2016 sampling event, the two wells downgradient of the Class III landfill (4MW-21 and 4MW-22) did not contain sufficient water to allow sample collection. Please conduct an evaluation of the adequacy of these wells to allow sample collections during dry season conditions. Please also conduct an evaluation of the adequacy of proposed well 4MW-23, based on the construction details provided, to allow sample collection during dry season conditions. Note that the Technical Report for the Class I Landfill is due by 3/31/2018 (2nd Half 2015 - 2nd Half 2017), and the Technical Report for the Class III Landfill is due by 11/22/2018 (2nd Half 2015 - 1st Half 2018).

1.6 - Groundwater monitoring data was reviewed for groundwater standard exceedances, completeness, and quality assurance/quality control (QA/QC); however, a review of historical data trending was not performed. The November 2016 groundwater event reported an exceedance of the nitrate standard at well 2MW-17S. Please note that the facility has the opportunity to conduct a re-sampling event to confirm results that exceed groundwater standards.

1.8 - The financial assurance adequately meets the funding requirements. Please continue to work with the Financial Assurance Working Group to address the other deficiencies noted in the most recent financial assurance review (5/4/2017).

2.10 - Please note that leachate generation reports are required to be submitted quarterly by January 15th,

Inspection Date: 04/28/2017

April 15th, July 15th and October 15th each year. The leachate generation reports for Q4 2016 and Q1 2017 were provided on 5/9/2017.

2.11 - During the inspection, a pile of screened overs (not usable) from the ash reuse project appeared to have been stored in the Class I area for an extended period. Operator indicated that this material would be relocated to A4. The RDD permit has expired, and the location for processing of ash for beneficial re-use is not currently addressed in the Class I operations plan. Please work with Tallahassee permitting staff to update the operations plan to include this activity.

2.22 - The A2 Primary Liner sump blockage was discussed with the Tallahassee Solid Waste Section. It was agreed that conversion of the sideslope cleanout riser in the vicinity of the plugged sump into a permanent leachate pumping configuration was the most prudent course of action. Pasco County Utilities is in the administrative process of approving a Task Order for an environmental engineering service provider to design the conversion. The facility anticipates that construction of the conversion will be completed by the end of the year.

2.37 - Not all monitoring wells were observed during this inspection. Monitoring well 4MW-21 was found unlocked but was locked during the inspection. The cap of monitoring well 2MW-26S was found in disrepair. Photos were provided following the inspection on 5/9/2017 showing that the cap was repaired and the well locked.

2.38 - Please clarify whether the report submitted by Tim Townsend on 8/14/2014 was intended to be the Final Report referenced in Specific Condition C.6.b. of the Solid Waste Research Development and Demonstration Permit No 26254-004-SO-21. It is unclear if this permit needs to be renewed as the project status is unknown. A review of the Department files indicates that quarterly reports and groundwater data associated with this project were not been submitted in accordance with Specific Conditions C.6.a., C.6.c., and D.7.

9.14 - Please note that waste tire processing reports are required to be submitted quarterly by January 20th, April 20th, July 20th and October 20th each year. The waste tire processing reports for Q4 2016 and Q1 2017 were provided on 5/9/2017.
