Re: Lena Road Landfill
Facility ID: 44795
Manatee County

Dear Mr. Gore:

Department personnel conducted a compliance inspection of the above-referenced facility on May 26, 2017. Based on the information received during the inspection, the facility was determined to be in compliance. A copy of the inspection report is attached for your records.

The Department appreciates your efforts to maintain this facility in compliance with state and federal rules. Should you have any questions or comments, please contact Scott Borderieux at (813) 470-5758, or via e-mail at: scott.borderieux@dep.state.fl.us.

Sincerely,

FACILITY INFORMATION:

Facility Name: LENA RD COUNTY LF
On-Site Inspection Start Date: 05/26/2017
On-Site Inspection End Date: 05/26/2017
WACS No.: 44795
Facility Street Address: SR64 & LENA RD
City: BRADENTON
County Name: MANATEE
Zip: 34211

INSPECTION PARTICIPANTS:

(Include ALL Landfill and Department Personnel with Corresponding Titles)

Principal Inspector: Scott T Borderieux, Inspector

Other Participants: Melissa Madden, Inspector; Anthony Detweiler, Operation Supervisor

INSPECTION TYPE:

Routine Operation Inspection for Landfill - Class I

ATTACHMENTS TO THE INSPECTION CHECK LIST:

This Cover Page to the Inspection Checklist may include any or all of the following attachments as appropriate.

1.0 - SECTION 1.0 - FILE REVIEW

2.0 - SECTION 2.0 - LANDFILL OPERATION AND MAINTENANCE

9.0 - SECTION 9.0 - WASTE TIRE FACILITIES

1.0 - SECTION 1.0 - FILE REVIEW

Requirements:

The requirements listed in this section provide an opportunity for the Department's inspector to indicate the conditions found at the time of the inspection. A "Not Ok" response to a requirement indicates either a potential violation of the corresponding rule or an area of concern that requires more attention. Both potential violations and areas of concern are discussed further at the end of this inspection report.

Current Areas Of Concern:

Rule: 62-701.500(2)(j), 62-701.500(8)(b), 62-701.500(8)(h)

Question Number: 2.22

Explanation: The April 2017 gradient report for Lena Road LF indicates the GW-21/P-21 pair had an outward gradient. Two other gradient pairs were inward by less than 1 foot (GW-12/P-12 & GW-22/P-22). An informal report of the May 2017 event (via email, entire event not yet submitted as of writing this report) indicates that the GW-21/P-21 and GW-12/P-12 pairs had an outward gradient. As discussed during the inspection, the extreme drought conditions may be contributing to a lower groundwater table making it difficult to control gradient at these locations. Facility staff indicated that the manhole adjacent to GW-21/PZ-21 is dry and leachate removal within Stage II is maximized in the area. This pair is located ~2,000' from any waste filled portions of Stage II. Future evaluation of the leachate collection system in this area may be required. The GW-12/PZ-12 pair adjacent to Stage I is of more concern. The pond surrounding MW-12 was observed dry during the inspection. It was discussed that Lift Station 1 could be adjusted to attempt to address lowering leachate levels within the landfill to combat the gradient difference in this area. Additionally, it is anticipated that impending rainy season may correct the issue and that artificially loading the pond may be explored as a temporary measure if necessary.

Corrective Action: Section 8.e of the Operation Plan indicates that the County "intends to maintain a one-foot inward gradient across the slurry wall." In accordance with Appendix 3, Condition I.27 of Permit 39884-021-SO/01, if an outward gradient exists, steps to correct the gradient shall be included with the related monthly report. The Department requests biweekly rechecks of all pairs with an outward gradient, or less than one-foot inward gradient until the pairs return to compliance with Specific Condition I.27 and Op Plan Section 8. If not corrected, a plan for additional corrective actions shall be provided with the June submittal (due July 15, 2017).

COMMENTS:

1.6 - Groundwater monitoring data were reviewed for groundwater standard exceedances, completeness, and quality assurance/quality control (QA/QC); however, a review of historical data trending was not performed.

1.3 - It appears the Permit 39884-021-SO/01 Specific Condition E.4, Figure 1, and Operation Plan Section 9, Figure K-8 incorrectly identifies GMW-9 as the gas monitoring location. A review of Department files indicates that GMW-9 was replaced with GMW-9A in ~2003. Successor Operation Permits referenced GMW-9A and sampling data from ~2003-current have reported data for GMW-9A. Additionally, SC E.4 lists GMW-11B and GMW-11C as required gas monitoring locations, however, they do not appear on Figure 1 and have not been reported for some time. It is the Department's understanding that these monitoring locations were abandoned. Therefore, updates to the permit, figures, and Operation Plan are necessary to correctly identify the gas monitoring locations associated with the Lena Road Class I Landfill. Please work with Tallahassee Solid Waste Permitting staff to obtain permit modification.

1.5 - On March 16, 2016, the County requested to modify the monitoring network around Stage II of the landfill due to well placement and traffic. Department's Tallahassee Solid Waste Permitting staff approved, via March 18, 2016 email, the removal of GW-27/PZ-27 and GW-28/PZ-28 and the addition of GW-27R/PZ-27R pair to the monitoring network. Updates to the permit, monitoring plan, figures, and associated documents are necessary to correctly identify the groundwater and gradient monitoring locations associated with the Lena Road Class I Landfill. Please work with Tallahassee Solid Waste Permitting staff to obtain permit modification.
