Re: Compliance Assistance Offer
Enterprise Road Landfill
Facility ID No.: 87895
Pasco County

Dear Mr. Arnold:

An inspection was conducted at your facility on February 9, 2018. During this inspection, potential non-compliance was noted. The purpose of this letter is to offer compliance assistance as a means of resolving these matters.

Specifically, potential non-compliance with the requirements of chapter 403, Florida Statutes, and Chapters 62-701, Florida Administrative Code were observed. Please see the attached inspection report for a full account of Department observations and recommendations.

We request you review the items of concern noted and respond via email within **15 days** of receipt of this Compliance Assistance Offer. Your response should include one of the following:

1. Describe what has been done to resolve the non-compliance issue or provide a schedule describing how/when the issue will be addressed. See pages 8 and 9 of the inspection report for items of non-compliance.
2. Provide the requested information, or information that mitigates the concerns or demonstrates them to be invalid, or
3. Arrange for the case manager to visit your facility to discuss the items of concern.

It is the Department's desire that you are able adequately address the aforementioned issues so that this matter can be closed. Your failure to respond promptly may result in the initiation of formal enforcement proceedings.

Please address your response and any questions to Alexis Black of the Southwest District Office at 813-470-5912 or via e-mail at Alexis.Black@floridadep.gov. We look forward to your cooperation with this matter.

1.0 - SECTION 1.0 - FILE REVIEW

Requirements:

The requirements listed in this section provide an opportunity for the Department's inspector to indicate the conditions found at the time of the inspection. A "Not Ok" response to a requirement indicates either a potential violation of the corresponding rule or an area of concern that requires more attention. Both potential violations and areas of concern are discussed further at the end of this inspection report.

Explanation: Operation Plan section 5.9 indicates that CCA-treated wood, i.e. pressure treated wood, shall not be accepted at this facility. The acceptance of these materials was observed during the inspection.
Corrective Action: The review of Operation Plan section 5.9 is required for all landfill staff so as to prevent future acceptance and disposal of wood materials not authorized for disposal at this facility.

Rule: 62-701.500(7)(e)
Question Number: 2.18
Explanation: The northern end of Cells 6 and 7 were lacking sufficient initial cover. The northwest corner of Cell 7 appeared to be insufficiently covered, thus waste was exposed. The other areas of the northern end of Cell 6 and 7 were covered, but it was not sufficiently covering waste as small conglomerations of limestone prevented compaction of the cover.
Corrective Action: The application of sufficient initial cover must be complete within a month of the date listed on the attached Compliance Assistance Offer. The initial cover may consist of a 50/50 soil/mulch mix and/or a cover material pre-approved by the Department, and it must be at least six inches thick.

Current Areas Of Concern:

Rule: 62-701.500(7)(f)

Question Number: 2.19

Explanation: Cells 3 and 15 showed sections of insufficient cover: Cell 3 appeared to have two areas of concern, including a gas seep and an area disturbed by means unknown on its southern slope, and the northern slope of Cell 15 appeared to be lacking in cover.

Additionally, parts of Cells 1 through 5 and Cell 15 were covered with wood ash from Florida Power Development. Per Department correspondence dated January 14, 2014, this facility is authorized to accept this ash for disposal, not for use as cover.

Corrective Action: The application of sufficient intermediate cover must be complete within a month of the date listed on the attached Compliance Assistance Offer. The intermediate cover may consist of a 50/50 soil/mulch mix and/or a cover material pre-approved by the Department, and it must be at least one foot thick.

In regards to the use of Florida Power Development's wood ash as cover, please contact the Department to discuss this matter further.

Question Number: 2.21

Explanation: The western slopes of Cells 3, 4, and 5 appear to have significant erosion, therefore impacting each Cell's intermediate cover.

Corrective Action: Application of sufficient intermediate cover to mend the points of erosion must be complete within a month of the date listed on the attached Compliance Assistance Offer. The intermediate cover may consist of a 50/50 soil/mulch mix and/or a cover material pre-approved by the Department, and it must be at least one foot thick.

Question Number: 9.10

Explanation: The 2017 Waste Tire Processing Quarterly Report does not enclose the Annual Fire Safety Survey. This area of concern also applies to Items 9.9 and 9.10.

Corrective Action: If the survey has been completed, please submit to SWD_Waste@floridadep.gov. If the survey has not been completed, please conduct this survey and then submit to SWD_Waste@floridadep.gov within 30 days of the date listed on the attached Compliance Assistance Offer.

COMMENTS:

Item 1.2 - These records are due to the Department no later than April 15, 2018, each year per permit condition C.14.a. and C.14.b. The Waste Quantity Report was received February 6, 2018. The Annual Estimate of Remaining Life has yet to be received. This submittal must include information regarding the

Inspection Date: 02/09/2018

estimated remaining life and capacity of existing and unconstructed areas of the landfill alongside a topographic survey of the landfill to verify these estimations.

Item 1.6 - Groundwater monitoring data was reviewed for groundwater standard exceedances, completeness, and quality assurance/quality control (QA/QC); however, a review of historical trending was not performed.

Item 1.8 - Cost estimates were received and approved February 7, 2018. Financial Assurance has yet to be received. Please work with the Solid Waste Financial Coordinator directly to assess the facility's compliance with the funding mechanism requirements of Rule 62-701.630, Florida Administrative Code.

Item 9.12 & 9.13 - Please ensure that an Emergency Preparedness Manual is readily available on-site and that it contains the required information outlined in Item 9.13. Additionally, maintain a copy of the Waste Tire Processing Permit on-site.

Cell 16 is under construction. John Arnold indicated that the cell must undergo a permeability test, and then the cell construction certification will be sent to the Department for review.

Be advised of the following imminent deadlines: the groundwater monitoring plan evaluation is due April 1, 2018, and the facility's permit renewal application is due May 8, 2018.

The facility is registered to operate a Separated Organics Processing Facility (SOPF); however, a formal inspection was not completed. The Department examined the SOPF area to ensure all general operation requirements of the registration and Department rules are being followed.

The facility operated a Disaster Debris Management Site (DDMS), which was inspected for closure, and appears to be in-compliance. Angelo's has taken ownership of the material from Pasco County and anticipates beneficial use of the mulched disaster debris on-site or sending off-site for fuel. Since this facility is also a registered SOPF, it was understood that any beneficial use of mulch shall be managed within the timeframes prescribed in Chapter 62-709, F.A.C. The materials shall be used or properly disposed within 18 months of the DDMS closure date. DDMS closure confirmation email sent February 20, 2018, following the inspection.
