**Subject:** CEMEX - Tire fluff fire 24-hr notification

Good morning,

Around 12:30 yesterday (February 19), a fire broke out in a tire fluff trailer in the alternative fuels loading area prior to unloading the trailer. The cause of the fire is still under investigation, so a method to prevent reoccurrence has not yet been determined. The fire damaged the trailer the material was housed in, as well as the cover installed to shelter the trailers. Repairs are expected to be completed within two months. Further details regarding the cause and method to prevent reoccurrence will be submitted in the 7-day follow up notification.

Thanks,  
Brent Steele
