**Attachments:** Hardee County Landfill Estimate of Remaining Life 2019.pdf

All,

In accordance with Permit No. 38414-016-SO/01 Section 2 Specific Condition C.14.b, please find attached the Hardee County Landfill Estimate of Remaining Life calculations for Reporting Year 2019.

Please let me know if you have any questions.

Thanks

Shane R. Fischer, P.E.

**Subject:** Hardee County Landfill

Steve,

I spoke with Joe Dertien regarding the Hardee County Landfill Operation Permit No. 38414-016-SO/01 Section 2 Specific Condition C.14.b regarding the Estimate of Remaining Life. For this submittal since the County is just beginning the operations within Phase II Section II, the remaining site life will be approximately the design life of the area. SCS requested from Joe that for this year we do not provide a topographic survey of the area and submit the calculations based on the minor waste placed reduced from the design life of the area. In addition, SCS requested an extension for this submittal to approximately May 24, 2019. Joe was in agreement with the process for the site life calculations and the extension request but wanted me to notify you as well.

Should you have any questions or take exception to the requested process or timeframe for the submittal please let me know.

Thank you

Shane R. Fischer, P.E.

Tallahassee, Florida 32399

Subject: Remaining Disposal Capacity and Site Life – Reporting Year 2019  
Hardee County Landfill  
Permit No.: 38414-016-SO/01

Dear Mr. Dilmore:

On behalf of the Hardee County Solid Waste Division (County), SCS Engineers (SCS) has prepared the remaining disposal capacity and site life estimate for the Hardee County Landfill in accordance with Rule 62-701.500(13)(c) and Section 2 Specific Condition C.14.b of the facility's solid waste operations permit. Per correspondence SCS had with the Florida Department of Environmental Protection (FDEP) on May 16, 2019 an extension for submittal of this document was approved for May 24, 2019. In addition, since minimal volume is remaining in Phase II Section I and only minor waste has been placed in Phase II Section II, it was agreed a topographic survey of the area would not be required for this reporting period. The estimated remaining volume was assumed to be the calculated design volume of Phase II Section II of 884,021 cubic yards.

## WASTE DISPOSAL PROJECTIONS

The County supplied SCS with waste quantity records through April 2019 as shown on the calculations table presented in Attachment A. SCS used the projected population estimates prepared by the Florida Demographic Estimating Conference, December 2017 and UF, BEBR, Florida Population Studies, Volume 51, Bulletin 180, January 2018 medium county projections to estimate the waste quantity disposal rate per capita. Using these population projections and the actual tonnages disposed by the County, SCS estimated an average waste disposal ton per capita of approximately 0.700 for the years 2014 through 2018. This time period was chosen because the disposal rate has been slowly increasing during this period.

## ESTIMATED REMAINING DISPOSAL CAPACITY AND SITE LIFE

As discussed with FDEP, minimal volume is remaining in Phase II Section I and only minor waste has been placed in Phase II Section II so a topographic survey would not be required for this reporting period. The in-place waste density, 1,173 pounds per cubic yard (lbs/CY), was assumed to be the value as last calculated by SCS based on comparing the topographic survey conducted by Pickett & Associates, Inc. (Pickett) dated March 22, 2013 and the topographic survey conducted by Pickett dated April 3, 2012 submitted with the Estimate of Remaining Capacity and Life of Site report by SCS dated June 28, 2013.

To estimate the remaining life, the projected population estimates were multiplied by the average tons per capita based on waste disposal records supplied by the County from 2014 through 2018 (0.700 ) then divided by the assumed in-place density (1,173 lbs/CY).

As shown on the calculations table presented in Attachment A the anticipated life of Phase II Section II is until late April 2045 or approximately 26 years of remaining life from May 1, 2019.

If you have any questions regarding the information contained herein, please contact the undersigned at (813) 804-6714.

Sincerely,

Ian Spurlock, P.E.

2014 - 2018 average tons/day =	63.08	tons/day
Operating Days/Year =	306	
1/1/19 - 4/30/19 average tons/month =	1,815	tons/month
1/1/19 - 4/30/19 average tons/day =	60.66	tons/day
Operating Days from 5/1/19 - 12/31/19 =	214	days

**SOURCES:**

- Based on the results from the Florida Demographic Estimating Conference, December 2017 and UF, BEBR, Florida Population Studies, Volume 51, Bulletin 180, January 2018 medium county projections. Refer to Attachment B.
- Waste quantity disposed in landfill provided by Hardee County through April 2019.
- Estimated volume available in Phase II Section II assumed to be the design life based on the Construction Certification prepared by SCS and received 8/5/2015.
- In-place density assumed to be the last actual calculated value based on comparing the topographic survey conducted by Pickett dated March 22, 2013 and the topographic survey conducted by Pickett dated April 3, 2012 per the Estimate of Remaining Capacity and Life of Site report submitted by SCS dated June 28, 2013.
