Re: Pasco County Resource Recovery Facility
WACS ID 45799
Pasco County

Dear Mr. Power,

Department personnel conducted a compliance inspection of the above-referenced facility on June 19, 2019. Based on the information provided during the inspection, the facility was determined to be in compliance; however, please note that there are items that require your review and action noted in the inspection report. A copy of the inspection report is attached for your records.

The Department appreciates your efforts to maintain this facility in compliance with state and federal rules. Should you have any questions or comments, please contact Alexis Black at (813) 470-5912, or via e-mail at: Alexis.Black@floridadep.gov.

Sincerely,

A handwritten signature in blue ink, appearing to read "Steven Tafuni".

12.0 - SECTION 12.0 - WTE FACILITIES

Requirements:

The requirements listed in this section provide an opportunity for the Department's inspector to indicate the conditions found at the time of the inspection. A "Not Ok" response to a requirement indicates either a potential violation of the corresponding rule or an area of concern that requires more attention. Both potential violations and areas of concern are discussed further at the end of this inspection report.

Current Areas Of Concern:

Rule: 62-701.400(9)(b), 62-701.500(10)

Question Number: 2.28

Explanation: Two containers (numbered 5 and 6) within the Citizen Drop-off Area were leaking leachate. The stream of leachate beneath Container 6 caused the concrete beneath it to degrade to create a small hole. No measures to contain the leachate from mixing with stormwater were observed. Pasco County representatives indicated that the two containers are new and that they were aware of the issue and working to resolve it.

Corrective Action: Please provide the Department with documentation within 30 days of receipt of this inspection report demonstrating that the containers were either replaced and do not leak or that the existing containers were repaired and no longer leak, and that the degraded concrete beneath Container 6 is repaired.

COMMENTS:

Items 1.5 and 1.6: The Department is currently evaluating the latest groundwater monitoring report for groundwater standard exceedances, completeness, and quality assurance/quality control (QA/QC).

Items 1.8 and 1.9: Cost estimates were approved on September 13, 2018. Please work with the Solid Waste Financial Working Group directly to assess the facility's compliance with the funding mechanism requirements of Rule 62-701.630, F.A.C.

Item 2.6: Department personnel observed open containers storing fluorescent bulbs. Please ensure that all containers that contain fluorescent bulbs are managed and stored in conformance with Rule 62-737.400, F.A.C. and 40 C.F.R. 273: containers are entirely closed and labeled. Facility personnel were notified of these requirements during the inspection.

Item 2.22: Rule 62-701.400(6)(c)9., F.A.C., explains that the interior of all above ground leachate tanks at solid waste management facilities must be inspected whenever the tank is drained or at least every three years. Please provide the inspection findings within 30 days of receipt of this inspection report. If an inspection of this structure has yet to be completed, then please conduct an inspection as soon as possible and provide the Department with the inspection findings.

Item 2.38: Please ensure all reports required for submission are received by the Department by their due date.

Items 9.10: The Department does not have record of the latest annual fire safety survey. Please provide this survey within 30 days of receipt of this inspection report. If the fire safety survey has yet to be completed, then please conduct it as soon as possible and provide the Department with the inspection findings.

Item 9.11: Be advised that the 2019 second quarter waste tire report is due to the Department by July 20,

Inspection Date: 06/19/2019

2019.

Items 10.16.1 and 10.26: Please note that all yard trash must be processed within 6 months of being received on-site. However, logs that are separated from yard trash may remain unprocessed on-site for 1 year. All processed yard trash must be removed from the facility within 18 months of its processing date.

Item 12.7: Minor ponding was observed on the waste to energy tipping floor. Please evaluate this area of the facility for ponding and repair all deficient areas.
